

CONTENTS

List of contributors

Natural products for therapeutics from medicinal plants
Raul G. Enriquez Habib

Some examples of economically important plant secondary
metabolites
Luis M. Peña

Aspects about the obtention of secondary metabolites from plant
tissue culture
Victor M. Loyola-Vargas and Ma. Lourdes Miranda-Ham

Biosynthesis of secondary metabolites in plant cell and tissue cultures
Maria de Lourdes Miranda-Ham

The use of elicitation to study the regulation and enzymology of
secondary metabolism
Peter E. Brodelius

Induction of the synthesis of secondary metabolites in plant cell tissue
culture
Craig L. Nessler

Somaclonal variation as a tool for the isolation of elite cell lines to
produce secondary metabolites
Donald K. Dougall

Biotransformation and immobilization for production of secondary
metabolism
Peter E. Brodelius

1
The use of bioreactors for the culture of plant tissues
Gregorio Godoy-Hernández

Thiophene formation in *Tagetes* *in vitro* cultures
*Carlos Oropeza, Melina López, Irma Trejo,
Jorge Santamaría and Julián Cuello*

2
Genetic engineering for the production of secondary
metabolites
Vincenzo De Luca

2
Cytogenetics and transformed hairy root cultures
Ana María Baíza

2
The conditioners of technological innovation
Roberto Guadarrama

2
Organ culture as a source of secondary metabolites
of economic importance
Victor M. Loyola Vargas and Héctor E. Flores
