

Contents

Chapter 1

Introduction

Margaret F. Roberts and Michael Wink

1. Introduction.....	1
2. Historical Importance of Alkaloids	1
3. Biochemistry.....	2
3.1. Classification of Alkaloids.....	2
3.2. Biogenetic Grouping of Alkaloids.....	3
3.3. Occurrence and Distribution	3
4. Ecology.....	4
5. Pharmacological Activities.....	5
References.....	6

Part I. Historical and Cultural Perspectives

Chapter 2

A Short History of Alkaloids

Michael Wink

1. Introduction.....	11
2. Alkaloids and Alkaloid-Producing Plants in Antiquity.....	12
2.1. Use of Alkaloid-Producing Plants in Early Medicine.....	12
2.2. Role of Alkaloids and Alkaloidal Plants for "Murder" and "Magic" ...	14
3. Alkaloidal Plants and Fungi Playing an Important Role in the History of Mankind	17
3.1. <i>Aconitum napellus</i> (Family Ranunculaceae)	17
3.2. <i>Amanita muscaria</i> (Family Amanitaceae).....	18
3.3. <i>Areca catechu</i> (Family Arecaceae)	19
3.4. <i>Aristolochia clematitis</i> (Family Aristolochiaceae)	19
3.5. <i>Atropa belladonna</i> (Family Solanaceae)	20

3.6. <i>Banisteriopsis caapa</i> , <i>B. inebrians</i> (Family Malpighiaceae)	22
3.7. <i>Buxus sempervirens</i> (Family Buxaceae)	22
3.8. <i>Camellia sinensis</i> (Family Theaceae)	23
3.9. <i>Chelidonium majus</i> (Family Papaveraceae)	24
3.10. <i>Claviceps purpurea</i> (Family Hypocreaceae)	25
3.11. <i>Colchicum autumnale</i> (Family Liliaceae)	26
3.12. <i>Conium maculatum</i> (Family Umbelliferae)	27
3.13. <i>Datura metel</i> (Family Solanaceae)	28
3.14. <i>Delphinium consolida</i> (Family Ranunculaceae)	28
3.15. <i>Dictamnus albus</i> (Family Rutaceae)	29
3.16. <i>Ephedra fragilis</i> (Family Ephedraceae)	29
3.17. <i>Erythroxylum coca</i> (Family Erythroxylaceae)	30
3.18. <i>Hyoscyamus niger</i> , <i>H. albus</i> , <i>H. muticus</i> (Family Solanaceae)	31
3.19. <i>Lophophora williamsii</i> (Family Cactaceae)	32
3.20. <i>Lupinus albus</i> (Family Leguminosae)	32
3.21. <i>Lycopodium clavatum</i> , <i>L. annotinum</i> (Family Lycopodiaceae)	33
3.22. <i>Mandragora officinarum</i> , <i>M. autumnalis</i> (Family Solanaceae)	34
3.23. <i>Nicotiana tabacum</i> (Family Solanaceae)	35
3.24. <i>Papaver somniferum</i> (Family Papaveraceae)	35
3.25. <i>Peganum harmala</i> (Family Zygophyllaceae)	37
3.26. <i>Physostigma venenosum</i> (Family Leguminosae)	38
3.27. <i>Psilocybe mexicana</i> (Family Agaricaceae)	38
3.28. <i>Punica granatum</i> (Family Punicaceae)	39
3.29. <i>Ruta graveolens</i> (Family Rutaceae)	40
3.30. <i>Solanum dulcamara</i> (Family Solanaceae)	40
3.31. <i>Taxus baccata</i> (Family Taxaceae)	41
3.32. <i>Turbina corymbosa</i> (Family Convolvulaceae)	42
3.33. <i>Veratrum album</i> (Family Liliaceae)	42

Major Reviews	44
Key References	44

Chapter 3

Alkaloids in Arrow Poisons

H. D. Neuwinger

1. Introduction	45
2. African Arrow Poisons	46
2.1. Poisoned Weapons	47
2.2. Poison Preparation	49
2.3. Plant Sources and Their Active Principles	50
3. South American Arrow Poisons	71
3.1. Classification and Composition	72
3.2. Chemistry	73
3.3. Pharmacology, Toxicology	74
3.4. Medicinal Use	75

3.5. Other Plant Arrow Poisons	76
4. Asian Arrow Poisons	77
4.1. Indonesia, Borneo, Philippines, Hainan, Vietnam, Cambodia	78
4.2. Burma, Thailand, Malaysia	79
Appendix: Composition of African Arrow Poisons	81
References	82
General References	82
Specific References	83

Part II. Biochemistry

Chapter 4

Chemical Taxonomy of Alkaloids

Peter G. Waterman

1. Introduction	87
2. What Is an Alkaloid?	87
2.1. A Unifying Theme in the Biosynthesis of True Alkaloids	88
3. The Impact of Alkaloids on Taxonomy	88
3.1. Alkaloids Originating from Tyrosine (and Phenylalanine), Usually through Dopa	90
3.2. Indole- <i>seco</i> -Loganin-Derived Alkaloids	96
3.3. Anthranilic Acid as an Alkaloid Substrate	98
3.4. Alkaloids from Ornithine and Lysine	100
3.5. Pseudoalkaloids	104
4. Concluding Comments	105
References	105
General Reviews	105
Key References	106

Chapter 5

Enzymology of Alkaloid Biosynthesis

Margaret F. Roberts

1. Introduction	109
2. Biosynthesis of Acetate-Derived Simple Piperidine Alkaloids	110
3. Biosynthesis of Quinolizidine Alkaloids	112
4. Biosynthesis of Benzylisoquinoline Alkaloids	114
4.1. The Formation of (<i>S</i>)-Norcoclaurine	114
4.2. Biosynthesis of the Tetrahydroberberine Alkaloids	116
4.3. The Route to the Protopine and Benzophenanthridine Alkaloids	118
4.4. Biosynthesis of the Morphinan Alkaloids	120
5. Indole Alkaloid Biosynthesis	121
5.1. Formation of (<i>S</i>)-Strictosidine	123

5.2. Deglucosylation of Strictosidine	125
5.3. Formation of Corynanthe-Type Alkaloids	125
5.4. The Formation of Sarpagan-Type Alkaloids	125
5.5. Formation of Aspidosperma-Type Alkaloids	130
5.6. Biosynthesis of Dimeric Indole Alkaloids	132
6. Ergot Alkaloid Biosynthesis	132
7. Cyclophenin-Viridicatin Alkaloid Biosynthesis	137
8. Acridone Alkaloid Biosynthesis	139
9. Conclusions	139
References	140
General Reviews	140
Key References	141

Chapter 6

Genes in Alkaloid Metabolism

Kazuki Saito and Isamu Murakoshi

1. Introduction	147
2. Isolation of Genes	147
3. Regulation	149
4. Expression of Recombinant Enzymes in Heterologous Systems	150
4.1. Expression in Microorganisms	150
4.2. Expression in Transgenic Plants and Other Higher Organisms	153
5. Molecular Evolution	153
6. Prospects	154
References	155
General Reviews	155
Key References	155

Chapter 7

Production of Alkaloids in Plant Cell Culture

Margaret F. Roberts

1. Introduction	159
2. Cell Technology	161
2.1. Cell Culture	161
2.2. Establishment of Specific Cell Lines	164
2.3. Growth and Product Accumulation	166
2.4. Development of Cultures with Improved Alkaloid Yield	167
2.5. Immobilization of Plant Cells and Enzymes	169
2.6. Organ Culture	171
2.7. Plant Propagation by Tissue Culture Techniques	172
2.8. Cell Cultures for the Production of Alkaloids	173
2.9. Lysine-Derived Quinolizidine Alkaloids	184

2.10. Ornithine-Derived Alkaloids	184
2.11. Nicotinic Acid-Derived and Purine Alkaloids	186
2.12. Anthranilic Acid-Derived Alkaloids	187
2.13. Acetate-Derived Alkaloids	188
3. Industrial Interest	189
3.1. The Problem of Cost-Effectiveness	189
3.2. The Problems Associated with Scaleup	190
3.3. Areas of Potential Industrial Interest	191
4. Summary	192
References	192
General Reviews	192
Key References	194

Chapter 8

The Biosynthesis of Alkaloids in Root Cultures

Richard J. Robins

1. Introduction	199
2. The Pyrrolidine Alkaloids	200
2.1. Regulation of the Pyrrolidine Alkaloid Pathway in <i>Nicotiana</i>	202
2.2. Studying the Pyrrolidine Alkaloid Pathway by Genetic Engineering ...	203
3. The Tropane Alkaloids	205
3.1. The Biosynthetic Route to the Tropane Alkaloids	206
3.2. Regulation of the Tropane Alkaloid Pathway in <i>Datura</i> , <i>Hyoscyamus</i> , and <i>Atropa</i>	206
3.3. Genetic Engineering of Tropane Alkaloid Biosynthesis	211
4. The Pyrrolizidine Alkaloids	212
4.1. The Biosynthetic Route to the Pyrrolizidine Alkaloids	212
4.2. Regulation of the Biosynthetic Pathway	213
5. Conclusions	215
References	215
General Reviews	215
Key References	216

Chapter 9

Induction of Alkaloid Biosynthesis and Accumulation in Plants and *in Vitro* Cultures in Response to Elicitation

U. Eilert

1. Introduction	219
2. Induction of Alkaloid Production by Climatic and Soil Conditions in Field-Grown Plants	220
2.1. Induction by Heat Stress	220
2.2. Induction by Light	221

3. Induction of Alkaloid Production <i>in Vitro</i>	222
4. Induction by Wounding	223
4.1. Effects of Mechanical Wounding	224
4.2. Elicitor Induction	225
5. Concluding Remarks	232
References	233
General Reviews	233
Key References	234

Chapter 10

Compartmentation of Alkaloid Synthesis, Transport, and Storage

Michael Wink and Margaret F. Roberts

1. Introduction	239
2.1. Sites and Compartmentation of Alkaloid Formation	239
2.2. Long-Distance Transport	241
3. Alkaloid Storage	242
3.1. Vacuolar Sequestration of Alkaloids	242
3.2. Mechanisms Underlying Vacuolar Sequestration	244
4. Turnover of Alkaloids	248
5. Sequestration as an Integral Part of the Defense Concept of Plants	254
References	256
General Reviews	256
Special References	258

Part III. Ecology

Chapter 11

Chemical Ecology of Alkaloids

Michael Wink

1. Introduction	265
2. Function of Alkaloids	268
3. Plant-Herbivore Interactions	269
3.1. Invertebrates	269
3.2. Vertebrate Herbivores	281
4. Plant-Microbe Interactions	284
5. Plant-Plant Interactions	286
6. Ecological Relevance of Alkaloids	286
6.1. Are Alkaloid Concentrations in Plants Sufficiently High?	287
6.2. Occurrence of Alkaloids at the Right Site and Right Time	289
6.3. Evidence for Alkaloid-Mediated Fitness	292
7. Conclusion	296

Chapter 16

Ecological Significance of Alkaloids from Marine Invertebrates

Peter Proksch and Rainer Ebel

1. Introduction.....	379
----------------------	-----

2. Chemical Defense against Fouling and Spatial Competition	380
3. Chemical Defense against Fish	383
4. Induced Chemical Defense of the Sponge <i>Verongia aerophoba</i>	385
5. Marine Alkaloids as Waterborne Signals in Inter- and Intraspecific Communication	388
6. Origin of Alkaloids from Marine Invertebrates	389
7. Chemical Defense in the Marine versus the Terrestrial Environment	390
References	391
General Reviews	391
Specific References	392

Part IV. Alkaloids in Medicine

Chapter 17

Antimicrobially Active Alkaloids

R. Verpoorte

1. Introduction	397
2. Indole Alkaloids	398
2.1. Terpenoid Indole Alkaloids	398
2.2. Other Indole Alkaloids	404
3. Isoquinoline Alkaloids	405
3.1. Bisbenzylisoquinoline Alkaloids	410
3.2. Aporphine Alkaloids	411
3.3. Benzophenanthridine Alkaloids	413
3.4. Protoberberine Alkaloids	414
3.5. Protopines	416
3.6. Miscellaneous Isoquinoline Alkaloids	416
4. Steroidal Alkaloids	416
5. Quinoline Alkaloids	421
6. Acridone Alkaloids	421
7. Terpenoid Alkaloids	422
8. Piperidine Alkaloids	422
9. Quinolizidine Alkaloids	423
10. Pyrrolizidine Alkaloids	423
11. Miscellaneous	423
12. Conclusion	424

General Reviews	425
Key References	426

Chapter 18

Utilization of Alkaloids in Modern Medicine

T. Schmeller and Michael Wink

1. Introduction	435
-----------------------	-----

2.	Alkaloids Used in Modern Medicine.....	436
2.1.	Aconitine.....	436
2.2.	Ajmaline.....	436
2.3.	Atropine.....	437
2.4.	Berberine.....	438
2.5.	Boldine.....	438
2.6.	Caffeine.....	439
2.7.	Cathine.....	439
2.8.	Cocaine.....	440
2.9.	Codeine.....	440
2.10.	Colchicine.....	441
2.11.	Emetine.....	441
2.12.	Ephedrine.....	442
2.13.	Ergometrine.....	443
2.14.	Ergotamine.....	443
2.15.	Eserine (= Physostigmine).....	444
2.16.	Galanthamine.....	444
2.17.	Hydrastine.....	445
2.18.	Hyoscine (= Scopolamine).....	445
2.19.	Hyoscyamine.....	446
2.20.	Lobeline.....	446
2.21.	Morphine.....	446
2.22.	Narceine.....	447
2.23.	Nicotine.....	447
2.24.	Noscapine (= Narcotine).....	448
2.25.	Papaverine.....	448
2.26.	Physostigmine (see Eserine).....	449
2.27.	Pilocarpine.....	449
2.28.	Quinidine.....	449
2.29.	Quinine.....	450
2.30.	Raubasine (= Ajmalicine).....	450
2.31.	Rescinnamine.....	451
2.32.	Reserpine.....	451
2.33.	Sanguinarine.....	452
2.34.	Scopolamine (see Hyoscine).....	453
2.35.	Sparteine.....	453
2.36.	Strychnine.....	453
2.37.	Taxol.....	454
2.38.	Theobromine.....	454
2.39.	Theophylline.....	455
2.40.	Tubocurarine.....	455
2.41.	Vinblastine.....	456
2.42.	Vincamine.....	457
2.43.	Vincristine.....	457
2.44.	Yohimbine.....	457
3.	Conclusions.....	458
	References.....	458
