

CONTENTS

CONVENTIONAL AGRICULTURAL BIOTECHNOLOGY	13
Tissue culture and clonal multiplication of crops	13
<i>Potato and cassava</i>	13
<i>Horticulture</i>	14
<i>Banana and plantain</i>	15
<i>In vitro</i> conservation of germplasm	17
Tissue culture and novel production systems	17
<i>Date-palm</i>	18
<i>Oil-palm</i>	19
<i>Coffee</i>	20
Other crop biotechnologies	21
<i>Marker-assisted selection: a fast track in crop breeding</i>	22
GENETICALLY ENGINEERED PLANTS AND CROPS: DEFINITIONS	28
Genetic modification	28
Genetic engineering and transgenic plants	28
Living modified organisms	29
Role of RNA in plant genetics	29
<i>RNA interference</i>	29
TRANSGENIC CROPS	31
Extension	31
Crop species and transgenic traits	32
Research on, and release and commercialization of, transgenic crops in developing countries	33
Benefits and prospects	36
Rice	39
<i>Origins and extension</i>	39
<i>Cultivation</i>	40
<i>A major staple food</i>	43
<i>International Year of Rice (2004)</i>	46
<i>Breeding</i>	48

CONTENTS

Breeding rice for enhanced water use efficiency and drought tolerance	50
<i>Genetic transformation</i>	52
<i>Herbicide tolerance</i>	54
<i>Biotic stress resistance</i>	54
<i>Pest resistance</i>	58
<i>"Golden rice", biofortified and pharma rice</i>	59
Maize	65
Wheat	66
Soybeans	68
Banana and plantain	69
Sugar-cane	71
Coffee	73
Floriculture	74
Forestry	77
INNOVATION PROSPECTS FOR ADVANCED CROP BIOTECHNOLOGY	79
Pest and disease resistance	80
<i>Insect resistance</i>	80
<i>Insect-resistant maize</i>	80
<i>Virus resistance</i>	81
Abiotic stress tolerance	84
<i>Drought tolerance</i>	85
<i>Genetics of drought tolerance</i>	87
<i>Salt tolerance</i>	89
<i>Tolerance of metals in soils</i>	91
Plant genomics and proteomics	92
<i>Rice genomics</i>	93
<i>Crop trait development</i>	97
<i>Genetics of flower development</i>	99
Metabolomics	101
Examples from developing countries	102
<i>China</i>	102
<i>India</i>	107

CONTENTS

<i>Bt cotton</i>	107
Other crops and the Genome Research Road Map.....	108
India's bio-industry.....	110
Bio-clusters and States' initiatives in biotechnology.....	113
<i>Brazil</i>	116
Crop biotechnology: research, development and commercialization.....	116
Plant genomics and crop improvement.....	119
Ethanol production: heralding the biofuel revolution.....	122
<i>Chile</i>	123
Biotechnology policy, and government's commitments and incentives.....	124
Main areas of biotechnology research and innovation.....	126
Agriculture and food products.....	127
Forestry.....	130
Aquaculture.....	131
Biomining.....	132
<i>Argentina</i>	133
Strategic Plan for the Development of Agricultural Biotechnology.....	133
Transgenic crops.....	134
The Agrobiotechnology Institute of Rosario: synergy between public and private sectors.....	137
<i>Costa Rica</i>	142
Transgenic crops.....	143
Opportunities and prospects.....	145
FUTURE OF AGRICULTURAL BIO-INDUSTRY.....	147
Future of agriculture	147
<i>Medium-term challenges</i>	147
<i>Evolution of agricultural research and development</i>	149
<i>Contribution of agricultural biotechnology</i>	150
Changing structure of agricultural bio-industry	151
<i>Concentration in the seed and agrochemical markets</i>	155
Implications of international development and trade issues	157
<i>Agricultural trade and developing countries' expectations</i>	157
<i>The case of cotton</i>	159

CONTENTS

Effects of transgenic crops on trade	160
The case of the European Union	163
<i>Evolution of the Common Agricultural Policy</i>	163
<i>Cultivation of Bt maize in Spain</i>	165
<i>Prospects for Europe</i>	168
India: reaping more profits from agriculture	171
Argentina	174
<i>Farming, the heart of Argentine business</i>	174
<i>No-tillage farming: a new agricultural paradigm</i>	174
<i>Citrus production</i>	176
<i>Wine industry</i>	178
Brazil	178
<i>Environment and sustainable development: the Amazon forest issue</i>	178
<i>Indigenous peoples' rights and protection of their lands</i>	180
<i>Access to land and the overall policy of managing the Amazon region</i>	181
<i>Family farming and agribusiness</i>	182
<i>Brazil, the world's newest agricultural superpower</i>	183
<i>Reasons for agricultural and agribusiness expansion</i>	184
<i>Brazil, a strong advocate for international agricultural free trade</i>	187
<i>The soybean story and the extension of transgenic crops</i>	187
BENEFITS OF TRANSGENIC CROPS	192
Economic incentives and benefits	192
<i>Overall economic impact in the United States</i>	192
<i>Incentives for the farmers and benefits for the consumers</i>	193
<i>Weed management and yield increase</i>	195
<i>The case of transgenic cotton</i>	196
Environmental benefits	199
<i>Meeting agricultural productivity needs</i>	199
<i>Contribution of agricultural biotechnology</i>	200
Public health benefits	203

CONTENTS

POTENTIAL HAZARDS OF TRANSGENIC CROPS	205
Adverse environmental impact	205
<i>Increasing resistance of insect pests</i>	205
<i>Hazards to wildlife</i>	207
<i>Impact on biological diversity</i>	210
Farm-scale evaluations	211
Examples of gene flow	214
<i>Conclusions</i>	219
Adverse health impact	219
<i>Transfer of microbial DNA and antibiotic resistance</i>	219
<i>Allergenic reactions</i>	220
<i>Safety of foodstuffs derived from transgenic crops</i>	221
EVALUATION AND MANAGEMENT OF RISKS ASSOCIATED WITH TRANSGENIC CROP CULTIVATION	226
The precautionary principle	226
Applying the precautionary principle	227
<i>Application of precaution to science-based decision-making</i>	231
Risk assessment	232
<i>Criteria of risk assessment</i>	234
<i>Risks for human health</i>	236
<i>Risks for the environment</i>	237
<i>Economic assessment as part of the risk analysis process</i>	238
Attributes of a regulatory biosafety framework	239
<i>Single window system</i>	240
<i>Involvement of stakeholders</i>	240
<i>Cost effectiveness</i>	240
<i>Harmonization of regulatory procedures</i>	241
<i>Summary</i>	242
Global Project for Development of National Biosafety Frameworks; international cooperation in biosafety	242
<i>Biosafety activities of the International Centre for Genetic Engineering and Biotechnology</i>	245

CONTENTS

Biosafety systems in developing countries: measures taken for the cultivation of transgenic crops	246
<i>Africa</i>	248
<i>Asia</i>	250
<i>India</i>	251
<i>China</i>	252
<i>Philippines</i>	255
<i>Thailand</i>	257
