

CONTENTS

Chapter 1

Hematopoietic Growth Factors

I. Introduction	1
II. Hematopoiesis	1
A. Control of Hematopoietic Processes	1
B. Regulation of Hematopoiesis By Growth Factors	2
C. Gene Expression in Hematopoiesis	4
III. Hematopoietic Growth Factors	4
A. Pluripotent HGFs	5
1. Hemopoietins	5
2. Stem Cell Growth Factor	5
3. Other Pluripotent HGFs	7
B. Colony-Stimulating Factors	7
C. Cytokines	9
D. Hematopoietic Inhibiting Factors	13
1. T-Cell-Derived Growth Inhibitors	13
2. Oncostatin M	13
3. Murine Growth Inhibitory Factor	14
4. Leukocyte Inhibitory Factor	14
5. Macrophage-Derived Growth Inhibitor	14
E. Role of HGFs in Neoplastic Processes	14
F. HGFs and Oncogene-Induced Transformation	15
IV. Proto-Oncogene and Tumor Suppressor Gene Expression in Hematopoietic Cells	16
A. Expression of the <i>c-myc</i> Gene	16
B. Expression of the <i>c-fos</i> Gene	17
C. Expression of the <i>c-myb</i> Gene	17
D. Expression of the <i>vav</i> Gene	17
E. Proto-Oncogene Expression in the Induced Differentiation of Hematopoietic Neoplastic Cells	17
References	18

Chapter 2

Interleukins and Cytokines

I. Introduction	35
II. Interleukin 1	36
A. Biological Effects of IL-1	36
1. Effects of IL-1 on Hematopoietic Cells	36
2. Effects of IL-1 on the Digestive Tract	38
3. Effects of IL-1 on Bone, Cartilage and Connective Tissue	38
4. Effects of IL-1 on Vascular Cells	40
5. Effects of IL-1 on the Skin	40
6. Effects of IL-1 on the Endocrine System and the Gonads	40
7. Effects of IL-1 on Neural Tissues	41
B. IL-1 Structure and the IL-1 Gene	41
1. IL-1 α and IL-1 β	41
2. Human IL-1 α and IL-1 β Genes and Their Products	42
3. Rodent IL-1 Genes and Their Products	42
4. Secretion of IL-1 α and IL-1 β and Binding to the IL-1 Receptor	42
5. Biological Activities of IL-1 α and IL-1 β	43
6. IL-1-Related Proteins	43
C. IL-1 Production and Secretion	43
1. Production of IL-1 by Malignant Cells	44
2. Regulation of IL-1 Production and Secretion	45
3. Mechanisms of Regulation of IL-1 Production and Secretion	45

D.	IL-1 Inhibitors	46
1.	Urine-Derived Inhibitors of IL-1	46
2.	α -Melanocyte-Stimulating Hormone	46
3.	Protein p15E	47
4.	IL-1 Receptor Antagonist	47
E.	IL-1 Receptors	47
1.	Classes of Surface IL-1 Receptors	47
2.	Expression of IL-1 Receptors on the Cell Surface	48
3.	Nuclear IL-1 Receptors	48
4.	Bacterial IL-1 Receptors	48
F.	Postreceptor Mechanisms of Action of IL-1	49
1.	Production of Cyclic Nucleotides	49
2.	Changes in Ion Fluxes	49
3.	Production of Polyamines	49
4.	Production of Prostaglandins	50
5.	Protein Phosphorylation	50
6.	Phosphoinositide Metabolism	50
7.	Protein Synthesis	51
8.	Gene Expression	51
9.	Proto-Oncogene Expression	51
G.	Effects of IL-1 on the Proliferation and Differentiation of Normal and Neoplastic Cells	52
III.	Interleukin 2	53
A.	Biological Effects of IL-2	53
1.	Effects of IL-2 on T Lymphocytes	53
2.	Effects of IL-2 on NK and Large Granular Lymphocytes	54
3.	Interaction of IL-2 With Other Lymphokines	54
4.	Abrogation of IL-2 Requirement by Oncoproteins	55
5.	Effects of IL-2 on B Lymphocytes	55
6.	Effects of IL-2 on Monocytes	55
7.	Effects of IL-2 on Myelopoiesis	55
8.	Effects of IL-2 on Endocrine Cells	55
B.	The Human T-Cell Antigen Receptor Complex	56
1.	T Lymphocyte Subsets	56
2.	Structure of the T-Cell Antigen Receptor	57
3.	The T3 Molecule	58
4.	The T-Cell Activating Protein	58
5.	Activation of the T-Cell Receptor Complex	58
6.	T-Cell Receptor Gene Rearrangements	58
7.	Role of the T-Cell Antigen Receptor Complex and IL-2 in Activation of T Cells	59
C.	Structure of IL-2	60
D.	The IL-2 Gene	60
1.	Transcriptional Expression of the IL-2 Gene	60
2.	Homologies of the Flanking Regions of the IL-2 Gene	61
E.	Production of IL-2	61
1.	Role of Calcium Ions and Phosphoinositide Turnover	62
2.	IL-1 and Phorbol Esters	62
3.	Steroid Hormones	62
4.	Platelet-Activating Factor	62
5.	Age-Related Changes in IL-2 Secretion and Action	62
6.	Constitutive Production of IL-2	63
7.	Serum Inhibitors of IL-2	63
F.	The IL-2 Receptor	63
1.	The IL-2 Receptor α -Chain	64
2.	The IL-2 Receptor β -Chain	64

3. Phosphorylation of the IL-2 Receptor	65
G. Expression of the IL-2 Receptor	66
1. Factors Involved in the Induction of IL-2 Receptors	66
2. Low-Affinity IL-2 Receptors	67
3. Expression of IL-2 Receptors in Non-T Cells	67
4. Internalization and Degradation of the IL-2 Receptor	67
5. Soluble IL-2 Receptors	67
H. Regulation of IL-2 Receptor Expression	68
1. Inducers of IL-2 Receptors	68
2. Inhibitors of IL-2 Receptor Expression	68
3. Regulatory Mechanisms of IL-2 Receptor Expression	68
I. IL-2 Receptor in Leukemia and Lymphoma Cells	69
1. Adult T-Cell Leukemia and HTLV-I-Infected Cells	69
2. T-Cell Chronic Lymphocytic Leukemia	69
3. B-Cell Leukemias and Other Leukemias	69
4. Hodgkin's and Non-Hodgkin's Lymphoma	70
5. Chronic Myelogenous Leukemia	70
6. Role of IL-2 in the Proliferation of Leukemic Cells	70
7. Mechanisms of IL-2 Receptor Expression in Leukemic Cells	70
8. Significance of Altered IL-2 Receptor Expression	70
J. Postreceptor Mechanisms of Action of IL-2	71
1. Production of cAMP	71
2. GTP Binding and Hydrolysis	71
3. Phosphoinositide Metabolism, Calcium Influx, and Protein Kinase C Activity	71
4. Monovalent Ion Transport	72
5. Polyamine Synthesis	72
6. Pteridine Synthesis	72
7. Protein Phosphorylation	73
8. Induction of Gene Expression	74
9. IL-2-Induced Proto-Oncogene Expression	74
10. Induction of DNA Synthesis	75
K. IL-2 and the IL-2 Receptor Functions in Neoplastic Cells	76
1. Adult T-Cell Leukemia	76
2. Other Hematologic Diseases	77
3. Solid Tumors	77
L. IL-2 and the Acquired Immune Deficiency Syndrome	77
M. IL-2 as an Agent for Cancer Treatment	79
N. Alterations of IL-2 in Nonmalignant Diseases	79
IV. Interleukin 3	80
A. Biological Effects of IL-3	80
B. IL-3 Structure and the IL-3 Gene	82
1. Regulation of IL-3 Gene Expression	82
2. IL-3-Like Proteins	82
3. Homology Between IL-3 and HTLV Sequences	83
C. IL-3 Receptors	83
D. Post-receptor Mechanisms of Action of IL-3	84
1. Phosphoinositide Metabolism	84
2. Protein Phosphorylation	84
E. IL-3 Requirement and Oncogene Expression	85
F. Influence of IL-3 in Proto-Oncogene Expression	86
G. Role of IL-3 in Neoplastic Processes	86
H. IL-3-Induced Neoplastic Transformation	86
V. B-Cell Growth Factors	87
A. Regulation of B-Cell Differentiation and Proliferation	87
B. Effect of BCGFs on Proto-Oncogene Expression	88
C. Production of BCGFs by Neoplastic Cells	89

D. Actions of BCGFs on Neoplastic and Immortalized Cells	89
E. Neuroleukin	89
VI. Interleukin 4	89
A. The IL-4 Gene and IL-4 Structure	90
B. Biological Effects of IL-4	90
C. The IL-4 Receptor	92
D. Postreceptor Mechanisms of Action of IL-4	92
E. Role of IL-4 in Neoplastic Processes	93
VII. Interleukin 5	93
A. The IL-5 Gene and IL-5 Structure	93
B. The IL-5 Receptor	94
C. Postreceptor Mechanisms of Action of IL-5	94
VIII. Interleukin 6	94
A. Biological Effects of IL-6	95
B. IL-6 Gene and the Structure of IL-6	96
C. Production of IL-6	96
D. The IL-6 Receptor	98
E. Postreceptor Mechanisms of Action of IL-6	98
F. Role of IL-6 in Neoplasia	99
IX. Interleukin 7	99
A. IL-7 Gene and the Structure of IL-7	99
B. Biological Effects of IL-7	100
C. The IL-7 Receptor	100
D. Postreceptor Mechanisms of IL-7 Action	100
E. Role of IL-7 in Neoplasia	100
X. Interleukin 8	100
A. Production and Biological Effects of IL-8	101
B. The IL-8 Gene and IL-8 Structure	101
C. The IL-8 Receptor	101
D. Postreceptor Mechanisms of Action of IL-8	101
E. Role of IL-8 in Neoplasia	102
XI. Interleukin 9	102
XII. Interleukin 10	102
XIII. Interleukin 11	103
XIV. Interleukin 12	103
XV. Interleukin 13	104
XVI. Leukemia Inhibitory Factor	104
A. The LIF Gene and LIF Structure	105
B. Cellular Mechanisms of LIF Action	105
C. Biological Properties of LIF	105
References	105

Chapter 3

Colony-Stimulating Factors

I. Introduction	177
II. Colony-Stimulating Factor 1	177
A. Biological Effects of CSF-1	177
B. CSF-1 Structure and the CSF-1 Gene	177
C. Production of CSF-1	178
1. Regulation of CSF-1 Production	179
2. Genetic Deficiency of CSF-1	179
D. The CSF-1 Receptor	179
1. The CSF-1 Receptor and the v-Fms and c-Fms Proteins	180
2. The Human <i>c-fms</i> /CSF-1 Receptor Gene	181
3. Expression of the <i>c-fms</i> /CSF-1 Receptor Gene	181
4. Phosphorylation and Internalization of the CSF-1 Receptor	182

5. Expression of <i>c-fms</i> Transcripts in Neoplastic Cells	182
6. Growth Factor Independence of <i>v-fms</i> -Transformed Cells	182
7. Tumor Promoters, Differentiation Inducers, and <i>c-fms</i> /CSF-1 Receptor Expression	182
E. Postreceptor Mechanisms of Action of CSF-1	183
F. Regulation of Gene Expression by CSF-1	183
G. CSF-1 and Proto-Oncogene Expression	183
H. Role of CSF-1 in Neoplastic Processes	184
III. Colony-Stimulating Factor 2	185
A. Biological Effects of CSF-2	185
B. CSF-2 Structure and the CSF-2 Gene	186
C. Production of CSF-2	187
D. The CSF-2 Receptor	187
E. Postreceptor Mechanism of Action of CSF-2	188
F. Role of CSF-2 in Neoplastic Processes	188
G. CSF-2 and Proto-Oncogene Expression	189
H. Influence of Viral Oncogenes on CSF-2 Expression	190
I. Production of CSF-2 by Tumor Cells	190
J. Oncogenic Potential of the Cloned CSF-2 Gene	190
K. CSF-2 as an Agent for the Treatment of Cancer and AIDS	191
IV. Colony-Stimulating Factor 3	191
A. Biological Effects of CSF-3	191
B. CSF-3 Structure and the CSF-3 Gene	192
C. Production of CSF-3	193
D. The CSF-3 Receptor	193
E. Postreceptor Mechanism of Action of CSF-3	194
F. Effects of <i>In Vivo</i> Administration of CSF-3	194
G. Role of CSF-3 in Neoplastic Processes	195
V. Megakaryocyte Colony-Stimulating Factors	196
A. Megakaryocyte Colony-Stimulating Factor	196
B. Thrombocytopoiesis-Stimulating Factor	197
VI. Macrophage-Derived Growth Factors	197
A. Macrophage Colony-Stimulating Activity	197
B. Macrophage-Derived Growth Factor	197
C. Macrophage-Activating Factors	197
D. Macrophage Migration Factors	198
E. Macrophage Proinflammatory Proteins	198
References	198

Chapter 4

Interferons

I. Introduction	221
II. Regulation of Interferon Production	221
III. Interferon Structure and the Interferon Genes	222
IV. Interferon Receptors	223
V. Postreceptor Mechanisms of Interferon Action	223
VI. Effects of Interferon on Gene Expression	224
A. Proto-Oncogene and Tumor Suppressor Gene Expression	225
VII. Effects of Interferon on Cell Proliferation and Cell Differentiation	227
VIII. Role of Interferons in Neoplastic Processes	228
A. Interferon-Induced Differentiation of Neoplastic Cells	229
B. Cytostatic and Tumorcidal Effects of Interferon	229
C. Interferon-Induced Reversion of the Transformed Phenotype	230
D. Effect of Interferon on Oncogene-Transformed Cells	230
E. Oncosuppressor Activity of Interferons	230
References	231

Chapter 5

Tumor Necrosis Factors

I. Introduction	241
II. Tumor Necrosis Factor β	242
A. Structure of TNF- β and the TNF- β Gene	242
B. Functions of TNF- β	242
C. Antineoplastic Effects of TNF- β	242
III. Tumor Necrosis Factor α	243
A. Production of TNF- α	243
B. TNF- α Structure and the TNF- α Gene	244
C. The TNF- α Receptor	245
1. Structure and Function of the TNF- α Receptor	246
2. Molecular Heterogeneity of the TNF- α Receptor	246
3. Regulation of TNF- α Receptor Expression	247
4. TNF- α Inhibitors	247
D. Postreceptor Mechanisms of Action of TNF- α	247
1. Production of cAMP and cGMP	248
2. Production of Prostaglandins	248
3. Production of Polyamines	248
4. Membrane GTP Binding and GTPase Activity	248
5. Intracellular Calcium	248
6. Phospholipid and Sphingolipid Metabolism	248
7. Protein Phosphorylation	249
8. Transcriptional Effects	249
9. Effect of TNF- α on Proto-Oncogene Expression	249
10. Cytotoxic Effects of TNF- α	250
11. TNF- α -Induced Proteins	250
12. Effects of TNF- α on DNA Synthesis	250
E. Physiologic Effects of TNF- α	250
1. Hematopoietic, Immune, and Inflammatory Processes	251
2. Blood Vessels and Blood Coagulation	252
3. Bone, Cartilage, and Muscle	253
4. Endocrine and Reproductive Systems	253
F. TNF- α as a Growth Factor	254
G. Growth-Inhibiting and Cell-Killing Effects of TNF- α	254
H. Cachectin-Related Activities of TNF- α	255
1. Role of TNF- α in Infectious Diseases	255
2. Role of TNF- α in Cancer-Associated Cachexia	256
I. Effects of TNF- α on Tumor Cell Growth	256
1. Tumor Regression by TNF- α Treatment	256
2. Mechanisms of the Antineoplastic Effects of TNF- α	257
3. Sensitivity of Tumor Cells to TNF- α	258
4. Undesirable and Dangerous Effects of TNF- α	258
5. Combination of TNF- α with Other Agents	259
6. Tumor-Promoting Effects of TNF- α	259
7. Differentiation-Inducing Effects of TNFs on Tumor Cells	260
IV. Tumor Migration Inhibiting Factor	260
V. Tumor-Killing Factor	260
References	261

Chapter 6

Erythropoietic Growth Factors

I. Introduction	279
II. Erythroid-Potentiating Activity	279
III. Erythroid Burst-Promoting Activity	280

IV. Erythropoietin	281
A. Origin and Synthesis of Erythropoietin	281
B. Biological Effects of Erythropoietin	281
C. Structure of Erythropoietin and the Erythropoietin Gene	282
D. The Erythropoietin Receptor	282
E. Postreceptor Mechanisms of Action of Erythropoietin	283
F. Erythropoietin and Neoplastic Transformation	284
V. Erythroid Differentiation Factor	285
References	286

Chapter 7

Platelet-Derived Growth Factor

I. Introduction	293
II. Structure of PDGF and the PDGF Genes	293
A. The PDGF Genes	293
B. Molecular Forms of PDGF	293
III. Production of PDGF and PDGF-Like Polypeptides	294
IV. Functions of PDGF	296
V. The PDGF Receptor	297
A. The PDGF Receptor Gene	298
B. Biosynthesis and Structure of the PDGF Receptor	298
C. Molecular Forms of the PDGF Receptor	298
D. Phosphorylation of the PDGF Receptor	299
E. Regulation of PDGF Receptor Expression	300
F. Internalization and Processing of the PDGF Receptor	300
VI. Transductional Mechanisms of PDGF Action	300
A. Ras Proteins	300
B. Protein Phosphorylation	301
C. Phosphoinositide Metabolism and Translocation of Ca^{2+}	301
D. Na^+/H^+ Antiport and Cytoplasmic Alkalinization	303
E. Arachidonic Acid and Prostacyclin	303
F. Modulation of Cellular Responses to PDGF	303
VII. Effects of PDGF on EGF Action	303
VIII. Posttransductional Mechanisms of Action of PDGF	304
A. Protein Phosphorylation	304
B. Cytoskeletal Changes	304
C. RNA and Protein Synthesis	304
D. Proto-Oncogene Expression	305
IX. Role of PDGF in Mitogenic Processes	306
X. PDGF and the <i>Sis</i> Oncoprotein	307
A. Comparative Structures of PDGF and <i>v-Sis</i>	308
B. The <i>c-sis</i> Proto-Oncogene	308
C. <i>Sis</i> -Induced Transformation	309
XI. PDGF and PDGF-Like Factors in Relation to Neoplasia	310
A. PDGF-Induced Neoplastic Transformation	310
B. Role of PDGF and PDGF-Like Factors in Neoplastic Diseases	310
C. Production of PDGF and PDGF-Like Proteins by Transformed Cells	311
1. Human Osteosarcoma Cells	311
2. Human Neural Tumors	312
3. Other Human Tumors	313
4. Embryonal Carcinoma Cells	313
5. Virus-Transformed Cells	313
D. Role of Proto-Oncogenes in <i>v-Sis</i> -Induced Transformation	314
E. Role of PDGF in Oncogene-Induced Transformation	314
XII. Non-PDGF-Like Factors Produced by Platelets	314
References	314

Chapter 8

Transferrins

I. Introduction	335
II. Structure and Synthesis of Transferrins	335
A. Human Transferrin	335
B. Rat Transferrin	336
C. Transferrins and the B-Lym-1 Protein	336
D. Lactotransferrin	337
E. Melanotransferrin	337
F. Hormonal Regulation of Transferrin Gene Expression	337
III. The Transferrin Receptor	337
A. The Transferrin Receptor Gene	338
B. Structure of the Transferrin Receptor	338
C. Posttranslational Modification of the Transferrin Receptor	338
D. Transferrin Receptor Expression	339
1. Regulation of Transferrin Receptor Expression	339
2. Mechanism of Regulation of Transferrin Receptor mRNA	340
3. Internalization of the Transferrin Receptor	341
E. Transferrin Receptors in Normal and Neoplastic Cells	342
1. Testicular Transferrin Receptors	342
2. Placental Transferrin Receptors	342
3. Transferrin Receptors in Lymphocyte Activation	342
4. Effect of Antitransferrin Receptor Antibodies	342
5. Transferrin Receptors in Neoplastic Cells	343
6. Neoplastic Cell Differentiation and Transferrin Receptor Expression	343
IV. Effects of Transferrin on Cell Proliferation and Differentiation	344
A. Mechanisms of the Growth-Promoting Action of Transferrin	344
B. Tumor-Promoting Effects of Transferrin	344
References	344
Index	353
