Foreword	.xi
Preface	.xiii
Acknowledgments	.xv
1 Introduction	1
Analysis of Herbal Drugs	1
What Is Chromatography?	6
What Is TLC?	11
Modern TLC	19
2 Theoretical Concepts	22
General Chromatographic Principles	22
Special Aspects of TLC	33
The Stationary Phase	42
The Mobile Phase	48
The Chromatographic Result in TLC	55
Densitometry	61

3 Practical Aspects of Modern TLC	67
Sample Preparation	68
Selecting the Stationary Phase	73
Sample Application	92
Chromatogram Development	97
Derivatization	110
Visualization and Documentation of the Chromatogram	114
Densitometry	116
Reporting and Record Keeping	121
TLC Software	125
Standardization	125
Practical Recommendations	127
4 Typical Applications in Herbal Analysis	129
Why HPTLC?	129
HPTLC Analysis of Raw Material	132
HPTLC Analysis of Herbal Drug Preparations and Products	160
5 Method Development	175
Theoretical Aspects	175
Method Development in Practice	179
6 Validation	193
General Information	193
Validation of Qualitative HPTLC Methods	206
Validation of Quantitative HTPLC Methods	210
The Final Word	214
List of Abbreviations	215
Glossary of TLC Terms	218

Appendixes

A Definitions	224
B Standard Operating Procedure for HPTLC of Herbal Raw Materials and Preparations	227
C Resources	231
D Common Mobile Phases for the Screening of Unknown Herbal Drugs	233
E Most Common Nonspecific Derivation Reagents for Analysis of Herbal Drugs	234
F Worksheet	238
G Validation of Method for Identification of Eleuthero by HPTLC Fingerprint	240
Index	259
