| <i>List of tables</i>             | xiii  |
| <i>List of reviewers</i>          | xvi   |
| <i>Preface</i>                    | xxi   |
| <i>Acknowledgements</i>           | xxv   |
| <i>Acronyms and abbreviations</i> | xxvii |

## **PART I** **Legislation and energy policy** 1

|  |    |
|--|----|
| 1 Sustainable agriculture and greenhouse gas emissions<br>JONATHAN S. WEST   | 3  |
| 2 Energy and agricultural policy in relation to biomethane, with particular<br>reference to the transport sector<br>BEATRICE SMYTH | 8  |
| 3 Biomethane production with reference to land-use change<br>SURAJBHAN SEVDA, DEEPAK PANT AND ANOOP SINGH                          | 30 |

## **PART II** **Feedstocks** 47

|   |    |
|---|----|
| 4 Grass and grass silage: agronomical characteristics and biogas production<br>JOSEPH MCENIRY, NICHOLAS E. KORRES AND PADRAIG O'KIELY | 49 |
| 5 Maize and maize silage for biomethane production<br>MARKUS NEUREITER  | 66 |
| 6 Suitability of microalgae and seaweeds for biomethane production<br>JOHN A.H. BENZIE AND STEPHEN HYNES                              | 82 |

---

|  |   |            |
|--|---|------------|
| 7  | Organic wastes for biomethane production<br>ANOOP SINGH   | 99         |
| 8  | Industrial residues for biomethane production<br>MARKUS ORTNER, BERNHARD DROSG, ELITZA STOYANOVA AND<br>GÜNTHER BOCHMANN  | 111        |
| <b>PART III</b>                                  |   |            |
| <b>Anaerobic digestion technology</b>            |   | <b>137</b> |
| 9  | Anaerobic digesters: perspectives and challenges<br>ABDUL-SATTAR NIZAMI, BRADLEY A. SAVILLE AND HEATHER L. MACLEAN  | 139        |
| 10   | Biogas upgrading and compression<br>PRASAD KAPARAJU, SAIJA RASI AND JUKKA RINTALA   | 152        |
| 11   | Storage and distribution of biomethane<br>NICHOLAS E. KORRES  | 183        |
| 12   | Variation in anaerobic digestion: need for process monitoring<br>NICHOLAS E. KORRES AND ABDUL SATAR NIZAMI  | 194        |
| 13   | General principles of data warehouse and data mining in anaerobic<br>digestion<br>NICHOLAS E. KORRES, ANASTASIOS DEKAZOS, DIMITRIS N. ARGYROPOULOS,<br>AMMAR AHMED AND PAUL STACK | 231        |
| <b>PART IV</b>                                   |   |            |
| <b>Molecular biology and population dynamics</b> |   | <b>259</b> |
| 14   | Microbial communities and their dynamics in biomethane production<br>DIMITRIS N. ARGYROPOULOS, THEODOROS H. VARZAKAS AND JOHN A.H. BENZIE   | 261        |
| 15   | The role of molecular biology in optimizing anaerobic digestion and<br>biomethane production<br>DIMITRIS N. ARGYROPOULOS, CHAROULA C. PSALLIDA AND JOHN A.H. BENZIE               | 290        |
| <b>PART V</b>                                    |   |            |
| <b>Sustainability in anaerobic digestion</b>     |   | <b>315</b> |
| 16   | Life cycle assessment as a tool for assessing biomethane production<br>sustainability<br>NICHOLAS E. KORRES   | 317        |

|   |     |
|---|-----|
| 17 The use of digestate as a substitute for manufactured fertilizer<br>BRIAN J. CHAMBERS AND MATTHEW TAYLOR                                     | 359 |
| 18 The sustainability of small-scale anaerobic digesters at farm scale<br>PHILLIP HOBBS AND ALLAN BUTLER  | 375 |
| 19 Biogas technology for developing countries: an approach to sustainable<br>development<br>M.S. DHANYA, S. PRASAD AND ANOOP SINGH              | 397 |
| 20 Concluding remarks   | 422 |
| <i>Appendix A: Anaerobic digestion application in a typical Cambodia family<br/>farm – a case study</i><br>ANDREA SALIMBENI AND GIULIANO GRASSI | 427 |
| <i>Index</i>  | 432 |
