

CONTENTS

PREFACE	ix
Chapter 0	
PRELIMINARIES	1
A. Notations and Definitions	1
B. Results from Advanced Calculus	4
C. Convolutions	9
D. The Fourier Transform	14
E. Distributions	17
F. Compact Operators	22
Chapter 1	
LOCAL EXISTENCE THEORY	30
A. Basic Concepts	30
B. Real First Order Equations	34
C. The General Cauchy Problem	42
D. The Cauchy-Kowalevski Theorem	46
E. Local Solvability: the Lewy Example	56
F. Constant-Coefficient Operators: Fundamental Solutions	59
Chapter 2	
THE LAPLACE OPERATOR	66
A. Symmetry Properties of the Laplacian	67
B. Basic Properties of Harmonic Functions	68
C. The Fundamental Solution	74
D. The Dirichlet and Neumann Problems	83
E. The Green's Function	85
F. Dirichlet's Principle	88
G. The Dirichlet Problem in a Half-Space	91
H. The Dirichlet Problem in a Ball	95
I. More about Harmonic Functions	110

Chapter 3	116
LAYER POTENTIALS	116
A. The Setup	120
B. Integral Operators	123
C. Double Layer Potentials	129
D. Single Layer Potentials	134
E. Solution of the Problems	139
F. Further Remarks	
Chapter 4	142
THE HEAT OPERATOR	143
A. The Gaussian Kernel	149
B. Functions of the Laplacian	155
C. The Heat Equation in Bounded Domains	
Chapter 5	159
THE WAVE OPERATOR	160
A. The Cauchy Problem	165
B. Solution of the Cauchy Problem	174
C. The Inhomogeneous Equation	177
D. Fourier Analysis of the Wave Operator	183
E. The Wave Equation in Bounded Domains	185
F. The Radon Transform	
Chapter 6	190
THE L^2 THEORY OF DERIVATIVES	190
A. Sobolev Spaces on $\mathbb{R}^n$	200
B. Further Results on Sobolev Spaces	210
C. Local Regularity of Elliptic Operators	215
D. Constant-Coefficient Hypoelliptic Operators	220
E. Sobolev Spaces on Bounded Domains	
Chapter 7	228
ELLIPTIC BOUNDARY VALUE PROBLEMS	228
A. Strong Ellipticity	231
B. On Integration by Parts	237
C. Dirichlet Forms and Boundary Conditions	242
D. The Coercive Estimate	248
E. Existence, Uniqueness, and Eigenvalues	253
F. Regularity at the Boundary: the Second Order Case	261
G. Further Results and Techniques	263
H. Epilogue: the Return of the Green's Function	

Chapter 8

PSEUDODIFFERENTIAL OPERATORS	266
A. Basic Definitions and Properties	266
B. Kernels of Pseudodifferential Operators	271
C. Asymptotic Expansions of Symbols	279
D. Amplitudes, Adjoints, and Products	283
E. Sobolev Estimates	295
F. Elliptic Operators	297
G. Introduction to Microlocal Analysis	304
H. Change of Coordinates	310
 BIBLIOGRAPHY	 317
 INDEX OF SYMBOLS	 320
 INDEX	 322
