

CONTENTS

1 Photosynthesis—The Light Reaction 1

- 1.1 Overview 2
- 1.2 The Hill Reaction 2
- 1.3 Photosynthetic Pigments 4
 - Chlorophyll *a* 4
 - Accessory Pigments 7
- 1.4 Origin of the Z-Scheme 7
 - Emerson Enhancement 7
 - Photosystems I and II 7
- 1.5 Light Reaction: Details 8
 - The Reaction Center of Purple Bacteria: A Model for PSII 8
 - Structure of the Bacterial Reaction Center 9
 - Light Energy Is Used To Reduce a Quinone 9
- 1.6 Photosystem II 11
 - Electron Transfer 11
 - Oxidation of Water 11
- 1.7 Photosystem I 13
- 1.8 Cytochrome *b6f* Complex 14
- 1.9 Photophosphorylation (ATP Synthesis) 16
- 1.10 Light-Harvesting Complexes 18
 - Light Energy 18
 - Light Harvesting 18
 - State Transitions 18
- 1.11 Nonphotochemical Quenching 20
- 1.12 Photosynthesis Inhibitors: Herbicides 21
- Chapter Summary 21
- References for Further Information 22

2 Carbon Dioxide Fixation..... 23

- 2.1 Overview 24
- 2.2 Carboxylation 24
 - Structure of Rubisco 25
 - Binding of Substrate to Rubisco 25
 - Rubisco Catalysis 26
 - Kinetics of Rubisco 26
 - Oxygenation 26
 - Specificity Factor of Rubisco 28
- 2.3 Reduction of Glyceric Acid-3-Phosphate 29

- 2.4 Further Metabolism of GAP/DHAP 29
- 2.5 CO₂ Concentrating Mechanisms 30
 - C-4 Pathway 30
 - Carboxysomes and Other Carbon Concentrating Mechanisms 32
- 2.6 Regulation of Carbon Dioxide Fixation 32
 - Rubisco Activation 32
 - Redox Regulation 32
- Chapter Summary 35
- References for Further Information 35

3 Storage and Utilization of Fixed Carbon 36

- 3.1 Overview 37
- 3.2 Introduction to Sugars 37
- 3.3 Starch Metabolism 39
 - Biosynthesis 39
- 3.4 Oxidative Pentose Phosphate Pathway 41
- 3.5 Sucrose Synthesis 42
- 3.6 Catabolism of Glucose 44
 - Glycolysis 44
 - Citric Acid Cycle 46
 - Electron Transport System 47
 - Chemiosmotic Coupling 50
- Chapter Summary 50
- References for Further Information 51

4 Primary Cell Walls..... 52

- 4.1 Overview 53
- 4.2 Cellulose 53
 - Cellulose Synthesis 53
 - Callose 55
- 4.3 Wall Matrix 56
 - Hemicellulose 56
 - Pectin 56
 - Proteins: Enzymes 58
 - Proteins: Structural 58
- Chapter Summary 59
- References for Further Information 60

5 Nitrogen and Sulfur Metabolism. . 61

- 5.1 Overview 62

- 5.2 Nitrogen Metabolism 62
 - Nitrate Assimilation 62
 - Ammonia Transport 63
 - Nitrate Processing 63
 - Nitrogen Fixation 65

- 5.3 Sulfur Metabolism 70
 - Sulfate Assimilation 71
 - Cysteine Synthesis 71
 - Cysteine Metabolism 74

Chapter Summary 81

References for Further Information 82

6 Lipids 83

- 6.1 Overview 84
- 6.2 Fatty Acid Structure and Nomenclature 84
- 6.3 Fatty Acid Biosynthesis 86
- 6.4 Acetate-Malonate Pathway 86
- 6.5 Desaturation of 18:0 (Stearic Acid) in the Chloroplast 88
- 6.6 Desaturation of Fatty Acids in the Endoplasmic Reticulum 90
- 6.7 Lipid Biosynthesis 90
- 6.8 Oil Composition of Seeds 92
- 6.9 Very-Long-Chain Polyunsaturated Fatty Acids 93
- 6.10 Hydroperoxy Fatty Acids and Oxylipin Synthesis 94
- 6.11 Cutin and Suberin 95
- 6.12 Catabolism of TAG 96s

Chapter Summary 98

References for Further Information 99

7 Isoprenoid Compounds (Terpenes) 100

- 7.1 Overview 101
- 7.2 Biosynthesis of IPP Isopentenyl Diphosphate 101
 - Acetate-Mevalonate Pathway 101
 - Methyl-Erythritol Phosphate Pathway (MEP or DOXP Pathway) 102
- 7.3 Prenyl Transfer 104
 - Monoterpenes (10-Carbon Isoprenoids) 104
 - Sesquiterpenes (15-Carbon Isoprenoids) 104

- Triterpenes (30-Carbon Isoprenoids) 110
- Diterpenes (20-Carbon Isoprenoids) 112
- Tetraterpenes (40-Carbon Isoprenoids) 112

- 7.4 Carotenoid Cleavage 115
 - Polymers 117

Chapter Summary 117

References for Further Information 118

8 Aromatic and Phenolic Compounds 119

- 8.1 Overview 120
- 8.2 Shikimic Acid Pathway 120
 - Phenylalanine and Tyrosine Synthesis 123
 - Tryptophan Synthesis 124
- 8.3 Phenylpropanoid Pathway 125
 - Synthesis of *Trans*-Cinnamic Acid 125
 - Lignin Synthesis 126
 - Polymerization of Monolignols 129
 - Genetic Engineering of Lignin 130
- 8.4 Natural Products Derived from the Phenylpropanoid Pathway 133
 - Natural Products from Monolignols 133
- 8.5 Synthesis and Properties of Polyketides 136
 - Synthesis of Chalcones 136
 - Synthesis of Flavanones and Derivatives 139
 - Synthesis and Properties of Flavones 140
 - Synthesis and Properties of Anthocyanidins 140
 - Synthesis and Properties of Isoflavonoids 142
 - Examples of Other Plant Polyketide Synthases 143
 - Synthesis and Activity of Coumarins 145

Chapter Summary 147

References for Further Information 148

9 Alkaloids 149

- 9.1 Overview 150

- 9.2 Alkaloids Derived from Aromatic Amino Acids 150
 - Tyrosine Derivatives 150
 - Phenylalanine Derivatives 154
 - Tryptophan Derivatives 154
- 9.3 Alkaloids Derived from Basic Amino Acids 160
- 9.4 Alkaloids Derived from Purines 163
- 9.5 Aminated Terpenes: The Steroidal Alkaloids 165
- Chapter Summary 166
- References for Further Information 166

10 Plant Peptides and Proteins 167

- 10.1 Overview 168
- 10.2 Germins 168
- 10.3 Seed Storage Proteins 169
 - Globulins 169
 - Prolamins 170
 - Lectins (*Agglutinins*) 171
- 10.4 Antimicrobial Peptides 173
 - Defensins 173
 - Cyclotides 174
- 10.5 Peptide Hormones 176
 - CLE Peptide Hormones 176
 - Phytosulfokines 176
- 10.6 Cyanogenic Glycosides 177
- Chapter Summary 179
- References for Further Information 180

APPENDICES..... 181

1 Structure and Properties of the 20 α -Amino Acids Commonly Found in Proteins 181

2 Oxidation–Reduction (Redox) ... 183

- A2.1 Definitions 183
- A2.2 Example 183

3 Steady-State Enzyme Kinetics ... 185

- A3.1 Competitive Inhibition 186
- A3.2 Noncompetitive Inhibition 187
- A3.3 Uncompetitive Inhibition 188

- A3.4 References for Further Information 189

4 Protein Three-Dimensional Structure Determination 190

- A4.1 X-Ray Crystallography 190
- A4.2 NMR Spectroscopy 192
- A4.3 References for Further Information 194

5 Reactive Oxygen Species 195

- A5.1 Generation of ROS 195
- A5.2 Cellular Damage Caused by ROS 196
- A5.3 Protection from ROS 199
- A5.4 ROS May Be Active in Innate Immunity 201
- A5.5 References for Further Information 202

6 Amino Acid Biosynthesis 203

- A6.1 Amino Acids Derived from Glyceric Acid-3-P 204
- A6.2 Amino Acids Derived from Phosphoenolpyruvate 206
- A6.3 Amino Acids Derived from Pyruvate 206
- A6.4 Amino Acids Derived from Oxaloacetate 209
- A6.5 Amino Acids Derived from α -Ketoglutarate (Oxoglutarate) 212
- A6.6 References for Further Information 216

7 Light Properties and Analysis ... 217

- A7.1 Spectrophotometry 218
- A7.2 Fluorescence Spectroscopy 219
- A7.3 References for Further Information 220

- Glossary 221
- Index 227
- Photo Credits 240
