

1. Introduction	1
1.1. About the book	3
References	4
2. The Atomic Structure of Graphene and Its Few-layer Counterparts	5
2.1. Graphene	5
2.2. Bilayer, Trilayer and Few-layer Graphene	10
2.3. Relationship of Graphene to Carbon Nanotubes	12
2.4. Other Layered 2D Crystals	16
2.4.1. Introduction	16
2.4.2. Boron Nitride Nanosheets	17
2.4.3. Transition Metal Dichalcogenides	20
2.4.4. Transition Metal Oxides	23
2.4.5. Silicene	25
2.4.6. Graphene Oxide and Reduced Graphene Oxide	28
2.4.7. Graphane and Fluorographene	32
2.5. Nanostructured Graphene	33
2.5.1. Introduction	33
2.5.2. Patterning Graphene via Lithography	34
2.5.3. Sonochemical Cutting of Graphene	40
2.5.4. Crystallographically Selective Structuring of Graphene Through Anisotropic Etching	41
2.5.5. Graphene Nanoribbon Formation by 'Unzipping' Carbon Nanotubes	45
2.5.6. Bottom-up Fabrication of Graphene Nanostructures	47
References	49
3. Properties of Graphene	61
3.1. Electronic Properties	61
3.1.1. Introduction	61
3.1.2. The Band Structure of Graphene	62

3.1.3.	Transport Experiments in Graphene	64
	References	71
3.2.	Chemical Properties of Graphene	73
3.2.1.	Introduction	73
3.2.2.	Covalent Functionalisation of Graphene	74
3.2.3.	Noncovalent Functionalisation of Graphene	80
3.2.4.	Summary	83
	References	84
3.3.	Electron Spin Properties of Graphene	86
3.3.1.	Introduction	86
3.3.2.	Spin and Magnetism in Graphite	87
3.3.3.	Magnetism and Spin in Graphene	88
3.3.4.	Summary	95
	References	97
3.4.	The Mechanical Properties of Graphene	99
3.4.1.	Elastic Properties and Intrinsic Strength	99
3.4.2.	Adhesion, Tearing and Cracking of Graphene	102
3.4.3.	The Role of Defects and Structural Modification on the Mechanical Properties	103
3.4.4.	Graphene Derivatives	104
3.4.5.	Graphene-based Composites	110
	References	111
3.5.	The Thermal Properties of Graphene	114
3.5.1.	Thermal Conductivity	114
	References	125
4.	Methods for Obtaining Graphene	129
4.1.	Mechanical Exfoliation	129
4.1.1.	Introduction to Mechanical Exfoliation	129
4.1.2.	Micromechanical Exfoliation	130
4.1.3.	Mechanical Cleavage of Graphite	134
4.1.4.	Mechanical Milling of Graphite	135
4.1.5.	Summary	135
	References	136
4.2.	Chemical Exfoliation	137
4.2.1.	Introduction to Chemical Exfoliation	137
4.2.2.	Review of Chemical Exfoliation	138
4.2.3.	Different Types of Graphite	147
4.2.4.	Different Types of Solvents	148
4.2.5.	Different Types of Sonication	150
4.2.6.	How to Characterise Chemically Exfoliated Graphene	151
4.2.7.	Other 2D Crystals	153
4.2.8.	Summary	153
	References	154

4.3. Reduced Graphene Oxide	155
4.3.1. Graphene Oxide	155
4.3.2. Chemical Reduction of Graphene Oxide	156
4.3.3. Heat Treatment of Graphene Oxide	159
4.3.4. Electrochemical Reduction of Graphene Oxide	159
4.3.5. Summary	160
References	162
4.4. Bottom-up Synthesis of Graphene from Molecular Precursors	163
4.4.1. Introduction	163
4.4.2. Solution-based approaches	163
4.4.3. Solubilisation Strategies	164
4.4.4. Solvothermal Synthesis and sonication	166
4.4.5. Chemothermal-based Approaches	167
4.4.6. Self-assembly of Graphene Oxide Nanosheets	170
References	171
4.5. Chemical Vapour Deposition Using Catalytic Metals	173
4.5.1. Introduction	173
4.5.2. CVD Basics	173
4.5.3. Substrate Selection	174
4.5.4. Substrate Pretreatment	175
4.5.5. Graphene Over Ni and Cu	176
4.5.6. Early Growth	177
4.5.7. The Role of Hydrogen in The CVD Reaction	183
4.5.8. Graphene–other Metals and Alloys	184
4.5.9. Segregation routes	186
References	187
4.6. CVD Synthesis of Graphene Over Nonmetals	189
4.6.1. Introduction	189
4.6.2. Aspects to Consider with Nonmetal Catalysts	190
4.6.3. Non-metals as Catalysts for CVD-grown Graphene	191
4.6.4. Metal-assisted Routes	195
4.6.5. Non-metals as Catalysts for Carbon Nanowall Fabrication (vertical graphene)	195
4.6.6. The Basics of Plasma-Enhanced Chemical Vapour Deposition	196
4.6.7. Nanowall or Nanosheet Synthesis	197
4.6.8. Substrate-free PECVD Synthesis of Graphene Sheets	198
4.6.9. Graphene Formation from Solid-carbon Sources on Surfaces	198
References	201
4.7. Epitaxial Growth of Graphene on SiC	204
4.7.1. Introduction	204
4.7.2. Reaction Protocol	205
4.7.3. Nucleation and Growth	206

4.7.4.	Epitaxial Graphene on the SiC (0001) Face	207
4.7.5.	Face-to-Face Growth	208
4.7.6.	Laser-induced Growth of Epitaxial Graphene	209
4.7.7.	Epitaxial Graphene on the SiC (000 $\bar{1}$) Face	210
4.7.8.	Graphene Growth by Molecular Beam Epitaxy of SiC	212
4.7.9.	Graphene Synthesis on Cubic SiC/Si Wafers	212
4.7.10.	Graphene From the Carbothermal Reduction of SiO _x	213
4.7.11.	SiC/Metal Hybrid Systems for Graphene Formation	213
	References	214
4.8.	Transfer to Arbitrary Substrates	216
4.8.1.	Introduction	216
4.8.2.	Transfer of Mechanically Exfoliated Graphene to Arbitrary Substrates	216
4.8.3.	Transfer of CVD-grown Graphene on Metals to Arbitrary Substrates	219
4.8.4.	Transfer of Graphene Grown on SiC	223
4.8.5.	Towards a Universal Transfer Route for Graphene Grown on Arbitrary Substrates	225
4.8.6.	Summary	226
	References	227
5.	Characterisation Techniques	229
5.1.	Optical Microscopy	229
	References	237
5.2.	Raman Spectroscopy	238
5.2.1.	Introduction	238
	References	246
5.3.	Scanning Electron Microscopy	248
	References	253
5.4.	Transmission Electron Microscopy	254
5.4.1.	Introduction	254
5.4.2.	Atomic Resolution Imaging (TEM/STEM) and Atomic Scale Spectroscopy (EELS)	256
5.4.3.	Surface Contamination	259
5.4.4.	Determining the Number of Layers Through (Scanning) Transmission Electron Microscopy	261
5.4.5.	Characterisation of Defects in Graphene	265
5.4.6.	Characterisation of Graphene Edges	272
5.4.7.	In-situ Manipulation of Graphene in a TEM	276
	References	277
5.5.	Electron Diffraction	280
5.5.1.	Introduction	280
5.5.2.	Determining the Number of Layers Using Electron Diffraction	281

5.5.3.	Determining the Graphene Topography	284
5.5.4.	Determination of Stacking Order and Identification of Rotational Stacking Faults	287
5.5.5.	Low-energy Electron Diffraction	292
	References	294
5.6.	Scanning Tunnelling Microscopy	296
5.6.1.	Introduction to Scanning Tunnelling Microscopy	296
5.6.2.	STM Studies of Graphite	298
5.6.3.	STM of Graphene on Metals	299
5.6.4.	STM of Graphene on Insulators	304
5.6.5.	Summary	306
	References	307
5.7.	AFM as a Tool for Graphene	309
5.7.1.	Introduction	309
5.7.2.	Graphene on Different Surfaces	310
5.7.3.	AFM Studies on GO	313
5.7.4.	AFM as a Tool to Investigate and Engineer Physical Properties	313
	References	319
5.8.	Hall Mobility and Field-effect Mobility	321
5.8.1.	Introduction to the Hall Effect	321
5.8.2.	Measurement of the Hall Mobility on Graphene Samples	322
5.8.3.	Measurement of the Field-effect Mobility in Graphene	325
5.8.4.	Maximising Mobility	326
5.8.5.	Summary	331
	References	331
6.	Applications of Graphene	333
6.1.	Electronic Devices	333
6.1.1.	Introduction	333
6.1.2.	Metal-Oxide-Semiconductor Field Effect Transistors (MOSFETs)	333
6.1.3.	The Graphene MOSFET	336
6.1.4.	Opening a Band Gap	338
6.1.5.	Strain Engineering a Band Gap	338
6.1.6.	Field Induced Band Gap in Bilayer Graphene	338
6.1.7.	Graphene Nanoribbons	339
6.1.8.	Further Techniques	340
6.1.9.	The Optimisation of Mobility	340
6.1.10.	Deposition of a High- κ Gate Dielectric and Low-Resistance Metal Contacts	341
6.1.11.	The Viability of Graphene in CMOS	342
6.1.12.	Radio-Frequency (RF) Electronics	343
6.1.13.	Novel Field Effect Transistor Designs	344

6.1.14.	Gas Sensors	345
6.1.15.	Metrology and the Definition of the Ohm	346
	References	346
6.2.	Spintronics	352
6.2.1.	Introduction	352
6.2.2.	Magnetoresistance using Carbon Nanotubes	352
6.2.3.	Magnetoresistance using Graphene	357
6.2.4.	Summary	365
	References	365
6.3.	Transparent Conducting Electrodes	366
	References	380
6.4.	Nanoelectromechanical Systems (NEMS) using Graphene	384
6.4.1.	Actuation, Detection and Quality Factor of NEMS	384
6.4.2.	Graphene Electromechanical Resonators	386
	References	396
6.5.	Freestanding Graphene Membrances	397
6.5.1.	Free-Standing Graphene as the Ultimate Microscope Slide	397
6.5.2.	Graphene as a Template for Catalyst-Free Graphene Fabrication by Electrons	402
6.5.3.	Free-Standing Graphene as a Subnanometer Trans-Electrode Membrane	405
6.5.4.	Permeability of Free-Standing Graphene	406
	References	407
6.6.	Graphene-Based Energy Application	409
6.6.1.	Graphene-Based Materials in Supercapacitors	409
6.6.2.	Graphene in Electrochemical Double-Layer Capacitors (EDLCs)	411
6.6.3.	Graphene-Based Pseudo Capacitors	414
6.6.4.	Graphene-Based Materials in Lithium Ion Batteries	416
6.6.5.	Graphene-Based Materials in Fuel Cells	418
6.6.6.	Graphene-Based Materials in Solar Cells	419
	References	421
6.7.	Superstrong Graphene Composites	425
6.7.1.	Graphene-Based Composites	425
6.7.2.	Ex Situ Polymerisation	427
6.7.3.	In Situ Polymerization	434
	References	435
