Section I Pesticide Uses

1. Dose and Time Determining, and Other Factors Influencing, Toxicity	3
1.1 Introduction	3
1.1.1 Dose and Time as Fundamental Variables of Toxicity	3
1.1.2 Definition of Dose and Time	6
1.1.3 Dose and Time Relationships	6
1.1.4 Analogy to Thermodynamics	8
1.2 Kinds of Toxicity	10
1.2.1 Nature of the Injury	10
1.2.2 Duration of the Injury	10
1.3 Quantitation of Dosage-Response Relationships	12
1.3.1 ED 50 or LD 50	13
1.3.2 Measurement of Cumulative Effects	23
1.3.3 Time Relationships	27
1.3.4 Problem of Measuring Effect of Dispersed Toxicants	33
1.3.5 Measurement of Graded Responses	33
1.3.6 Dosage at the Tissue Level	33
1.3.7 Statistical Considerations	34
1.4 Dosage-Response Relationships in Different Kinds of Toxicity or Change	47
1.4.1 Toxicity (<i>Sensu Stricto</i>)	47
1.4.2 Neurotoxicity	47
1.4.3 Teratogenesis	47
1.4.4 Carcinogenesis	48
1.4.5 Mutagenesis	50
1.4.6 Hypersensitivity and Allergy	50
1.4.7 Induction of Enzymes	50
1.4.8 Metabolism and Storage	51
1.5 Factors Influencing Toxicity of any Kind	53
1.5.1 Dosage	53
1.5.2 Compound	54
1.5.3 Interaction of Compounds	56
1.5.4 Schedule of Dosage	61
1.5.5 Duration of Dosage	62
1.5.6 Route of Exposure	63
1.5.7 Species and Strain Differences	64
1.5.8 Discussion of Factors Influencing Toxicity	88

2. Pest Toxicology: The Primary Mechanisms of Pesticide Action	103
2.1 Introduction	103
2.2 Primary Targets	103
2.3 Secondary Targets	105
2.4 Common Target for Structurally Diverse Pesticides	105
2.5 Resistance as a Limiting Factor	105
2.6 Nerve	106
2.7 Photosynthesis and Pigment Synthesis	107
2.8 Biosynthesis	108
2.8.1 Herbicides	108
2.8.2 Fungicides and Insecticides	109
2.9 Respiration	111
2.10 Growth Regulators	112
2.11 Unknown, Nonspecific and Other Targets	112
2.12 Overview	113
Conclusion	116
Postscript	116
Acknowledgments	116
3. Pest Control Agents from Natural Products	119
3.1 Introduction	119
3.2 Insect Control Agents	120
3.2.1 Botanical Insecticides	120
3.2.2 Microbial Insecticides	154
3.2.3 Semiochemicals	167
3.3 Disease Control Agents	173
3.3.1 Fungicides	173
3.3.2 Bactericides	180
3.4 Herbicides	183
3.4.1 Bilanafos (Bialaphos)	183
3.4.2 Glufosinate	184
3.5 Rodenticides	188
3.5.1 Strychnine	188
3.5.2 Red Squill and Scilliroside	193
3.5.3 Ricin	196
3.5.4 <i>Salmonella</i> Bacteria	200
4. Public Health Pesticides	231
4.1 Introduction	231
4.2 Definition of Terms in Vector-Borne Diseases	231
4.3 Impact of Arthropods on Human Health	237
4.4 Integrated Pest Management and Vector Management	238

4.4.1	Noninsecticidal Methods in Vector Management	240	7.7	Frequency of Intoxication	289
4.4.2	Chemicals in Vector Management	241	7.8	Scenarios of Concern	290
	Conclusion	250	7.8.1	Acute Intoxication	290
			7.8.2	Chronic Intoxication	290
			7.8.3	Pesticide Use and Cancer in Animals	291
			7.8.4	Pesticide Use and Exposure of People in Contact with Animals	291
5.	The Changing Role of Insecticides in Structural Pest Control	257	7.9	Major Pesticide Categories	292
5.1	Introduction	257	7.9.1	Cholinesterase Inhibitors: Organophosphoruses and Carbamates	292
5.2	Pest Problems: Real or Perceived	257	7.9.2	Pyrethrins and Pyrethroids	292
5.3	Environmental and Health Concerns	258	7.9.3	Natural Products Used for Flea Control	293
5.4	Insecticide Applications	260	7.9.4	Macrocyclic Lactones	294
5.4.1	Nonresidual Insecticides	260	7.9.5	Neonicotinoids: Imidacloprid and Nitenpyram	294
5.4.2	Residual Insecticides	261	7.9.6	Fipronil	295
5.5	Soil Treatments for Subterranean Termites	263	7.9.7	Amitraz	295
5.6	Baits and Baiting	265	7.9.8	Insect Growth Regulators	295
5.7	Future Directions	266	7.9.9	Synergists and Repellants	295
	Conclusion	266	7.9.10	Rodenticides	296
			7.9.11	Metaldehyde	296
			7.9.12	Paraquat	296
6.	Vertebrate Pest Control Chemicals and Their Use in Urban and Rural Environments	271	7.10	Diagnosis of Intoxication	296
6.1	Introduction	271	7.11	Treatment of Intoxication	297
6.2	Vertebrate Pests: What are They?	271		Conclusion	298
6.3	Management Restrictions	272	8.	Pesticide Use Practices in Integrated Pest Management	303
6.4	Problems Created by Vertebrates	272	8.1	Integrated Pest Management	304
6.5	Nonlethal Management without Pesticides	272	8.2	What is Integrated Pest Management?	305
6.6	Population Reduction without Pesticides	273	8.3	The IPM Continuum	305
6.7	Pesticides: Repellents Versus Lethal Agents	274	8.4	Pesticides	306
6.8	Repellents	275	8.5	Field Scouting	306
6.9	Immobilizing Agents	277	8.5.1	Monitoring	306
6.10	Lethal Vertebrate Pesticides	277	8.5.2	Decision Support	307
6.10.1	Poison Rodent Baits	277	8.6	Reduced-Risk Pesticides	307
6.10.2	Fumigants	281	8.6.1	Behavioral Chemicals	307
6.10.3	Tracking Powders	281	8.6.2	Conventional Products and Risk	308
6.10.4	Contraceptives	282	8.7	Cultural and Physical Suppression	308
6.10.5	Glue Boards	282	8.8	Prevention	308
6.10.6	Livestock Protection Collars	282	8.9	Avoidance	308
6.10.7	Toxicant Ejector Device	283	8.10	Pesticides and Biological Controls	309
6.10.8	Flock Dispersal Agent	283	8.11	Advisory Services	309
6.10.9	Poison Bird Bait	283		Conclusion	311
	Conclusion	284	9.	Properties of Soil Fumigants and Their Fate in the Environment	315
7.	Pesticide Use and Associated Morbidity and Mortality in Veterinary Medicine	285	9.1	Introduction	315
7.1	Introduction	285	9.2	Chemical Properties, Application, and Major Environmental Issues	317
7.2	Formulations	286	9.2.1	Fumigation Methods	318
7.3	Species Sensitivities	286	9.2.2	Environmental Concerns	319
7.4	Pesticide Use in Domestic Animals	287	9.3	Processes and Factors Affecting the Fate of Fumigants in Soil	319
7.5	Regulation of Pesticides Used in Veterinary Medicine	287			
7.6	Violative Residues	289			

9.3.1	Volatilization	319	11.	Genotoxicity of Pesticides	357
9.3.2	Degradation	320	11.1	Introduction	357
9.3.3	Adsorption	320	11.2	Genotoxicity Tests	358
9.4	Fumigant Distribution in Soil and Efficacy Assessment	321	11.2.1	Bacterial Reverse Mutation Assay	360
9.5	Currently Available Soil Fumigants	322	11.2.2	In Vitro Mutation Assay in Mammalian Cells	361
9.5.1	Methyl Bromide	322	11.2.3	In Vivo Cytogenetic Assay	361
9.5.2	Methyl Iodide (Iodomethane)	323	11.2.4	Micronucleus Assay	362
9.5.3	1,3-Dichloropropene	323	11.3	Genotoxicity Testing of Pesticides	362
9.5.4	Chloropicrin	324	11.4	Patterns of Response	362
9.5.5	Methyl Isothiocyanate	324	11.4.1	Pesticides Exhibiting Both Genotoxicity and Carcinogenicity	362
9.5.6	Dimethyl Disulfide	325	11.4.2	Pesticides Exhibiting Genotoxicity with Limited or No Evidence of Carcinogenicity	365
9.5.7	Sodium Tetrathiocarbonate	325	11.4.3	Pesticides Exhibiting Carcinogenicity without Appreciable Genotoxicity	366
9.6	Strategies to Minimize Emissions	326	11.4.4	Nongenotoxic Agents without Evidence of Carcinogenicity	367
9.6.1	Application Methods	326	11.4.5	Pesticides Exhibiting Mixed Results in Genotoxicity or Cancer Tests	367
9.6.2	Plastic Films	326	11.5	Human Biomonitoring	369
9.6.3	Irrigation or Water Treatment	326	11.6	Genotoxicity and Risk Assessment	373
9.6.4	Chemical Amendment	326		Conclusion	374
9.6.5	Organic Amendment	327			
9.6.6	Target Area Treatment	327			
9.6.7	Mass Balance of Fumigants Applied to Soil	327			
	Conclusion	327			

Section II

Toxicity and Safety Evaluation

Toxicity and Safety Evaluation of Pesticides		333	12. Developmental and Reproductive Toxicology of Pesticides		381
I.1	Health Hazard Evaluation—Role in the Assessment of Pesticide Risks to Humans	334	12.1	Introduction	381
I.2	Toxicokinetic Studies	334	12.1.1	Developmental Toxicity	382
I.3	Acute Toxicity Studies	335	12.1.2	Reproductive Toxicity	383
I.4	Short-Term Studies	335	12.1.3	Epidemiology	383
I.5	Long-Term Studies	335	12.2	Exposure	384
I.6	Reproduction Studies	335	12.2.1	Timing of Exposure	384
I.7	Developmental Toxicity Studies	335	12.2.2	Prenatal Reproductive Toxicants	384
I.8	Genotoxicity/Mutagenicity Studies	335	12.2.3	Prepubertal Reproductive Toxicants	385
I.9	Neurotoxicity and Developmental Neurotoxicity Studies	335	12.2.4	Adult Reproductive Toxicants	385
I.10	Immunotoxicity	336	12.3	Mechanisms of Action	385
I.11	Endocrine Disruptor Potential	336	12.3.1	Direct-Acting	385
I.12	Mechanism of Action	336	12.3.2	Indirect-Acting	385
	Conclusion	336	12.4	Regulatory Issues	385
			12.4.1	History	386
			12.4.2	Principles of Testing and Evaluation	386
			12.4.3	Choice of Species in Testing	388
			12.4.4	Choice of Testing Doses	388
			12.4.5	Interpreting Effects	388
			12.4.6	Statistical Evaluation	389
			12.4.7	Exposure Assessment	389
			12.4.8	Impact of FQPA on Developmental and Reproductive Toxic Effects of Pesticides	390

10. Risk Assessment for Acute Exposure to Pesticides

337

10.1 Introduction

337

10.2 Toxicological Data

337

10.3 Exposure Data

338

10.4 Examples

340

10.4.1 Methyl Parathion

340

10.4.2 Methyl Bromide

344

Conclusion

349

12.5	Toxicology Studies	391	14.4.3	Mode of Action	475
12.5.1	Herbicides	391	14.4.4	Human Relevance	477
12.5.2	Insecticides	399	14.5	Application to Risk Assessment and Regulatory Decision Making	477
12.5.3	Insect Growth Regulators	414	14.5.1	Chronic Toxicity Risk Assessment – Noncancer Endpoints	478
12.5.4	Fungicides	414	14.5.2	Cancer Risk Assessment – Threshold Carcinogens	478
12.5.5	Rodenticides	421	14.5.3	Cancer Risk Assessment – Nonthreshold Carcinogens	479
12.5.6	Animal Health Products, Fumigants, and Miscellaneous Pesticides	421	14.6	Challenges	479
	Conclusion	427	14.6.1	Life Stages	479
13.	Microbial Pest Control Agents: Use Patterns, Registration Requirements, and Mammalian Toxicity	441	14.6.2	Cumulative Toxicity	480
13.1	Introduction	441		Conclusion	480
13.2	Toxicity Testing Requirements for MPCAs	445	15.	Immunotoxicity of Pesticides	483
13.2.1	Tier I	445	15.1	Introduction	483
13.2.2	Tier II	446	15.1.1	Immune System	483
13.2.3	Tier III	446	15.1.2	Pesticides	484
13.3	Toxicity of Individual MPCAs	447	15.2	Carbamates	484
13.3.1	Bacteria	447	15.2.1	Rodent Studies	485
13.3.2	Eukaryotic Pesticides (Fungi and Nonfungi (Stramenopila))	454	15.2.2	Nonrodent Studies	486
13.3.3	Viruses	456	15.2.3	Human Studies	486
	Conclusions	457	15.3	Organochlorines	486
	Acknowledgments	458	15.3.1	Rodent Studies	486
14.	The Assessment of the Chronic Toxicity and Carcinogenicity of Pesticides	463	15.3.2	Nonrodent Studies	487
14.1	Introduction	463	15.3.3	Human Studies	488
14.2	Regulatory Requirements, Test Guidelines, and Protocols	464	15.4	Organophosphates	488
14.2.1	Species and Study Duration	464	15.4.1	Rodent Studies	488
14.2.2	Route of Administration	466	15.4.2	Nonrodent Studies	489
14.2.3	Dose Levels	466	15.4.3	Human Studies	489
14.2.4	Chemical Purity	467	15.5	Phenoxy Compounds	489
14.3	Assessment of Chronic Toxicity (Noncancer) Endpoints	467	15.5.1	Rodent Studies	490
14.3.1	Mortality	468	15.5.2	Human Studies	490
14.3.2	Clinical Observations	468	15.6	Pyrethroids and Pyrethrins	490
14.3.3	Body Weight, Body Weight Gain, and Food Consumption	468	15.6.1	Rodent Studies	490
14.3.4	Ophthalmoscopic Examination	469	15.6.2	Nonrodent Studies	490
14.3.5	Clinical Pathology	469	15.6.3	Human Studies	491
14.3.6	Organ Weight	472	15.7	Triazines	491
14.3.7	Macroscopic and Microscopic Pathology	472	15.7.1	Rodent Studies	491
14.3.8	Additional Endpoints	473	15.7.2	Nonrodent Studies	491
14.3.9	Overall Assessment	473	15.7.3	Human Studies	492
14.4	Assessment of Carcinogenic Potential	474	15.8	Regulations	492
14.4.1	Overall Approach	474	15.8.1	Immunotoxic Guidelines	492
14.4.2	Statistical Considerations	475	15.8.2	Immunotoxic Testing	492
				Conclusion	493

Contents of Volume 1

16.5	Biotransformation	501
16.6	Pharmacokinetics	501
16.7	Toxicology Profile	501
	16.7.1 Acute Toxicity	501
	16.7.2 Subchronic Toxicity	502
	16.7.3 Chronic Toxicity and Oncogenicity	503
	16.7.4 Genotoxicity	503
	16.7.5 Reproductive Toxicity	503
	16.7.6 Developmental Toxicity	504
	16.7.7 Neurotoxicity	504
16.8	Hazard Identification	505
	16.8.1 Acute Toxicity	505
	16.8.2 Subchronic Toxicity	506
	16.8.3 Chronic Toxicity	506
	16.8.4 Genotoxicity/Oncogenicity	506
16.9	Exposure Assessment	506
	16.9.1 Occupational	506
	16.9.2 Bystanders at Application Sites	510
16.10	Dietary Exposure	510
	16.10.1 DPR Residue Database and Exposure Analysis	510
	16.10.2 Tolerances in California	512
	16.10.3 Residue Adjustments: Percentage of the Crop Treated	512
	16.10.4 Highest Measured Acute Residue Values	512
16.11	Occupational and Bystander Air Aggregate Exposure	513
	16.11.1 Aggregate (Dermal + Inhalation + Dietary) Exposure in Occupational Scenarios	513
16.12	Risk Characterization	513
	16.12.1 MOE Calculations	514
	16.12.2 MOE Results	514
16.13	Issues Related to Sensitive Populations	514
16.14	Endocrine Disruption and the FQPA Safety Factor	515
16.15	Tolerance Assessment Updated by DPR for 2006	516
16.16	Summary	516
	16.16.1 Occupational and Bystander MOEs	516
	16.16.2 Dietary MOEs	516
	Conclusion	516

Section III

Emerging Approaches in Safety Evaluation

17. Genetic Polymorphism and Susceptibility to Pesticides	525
17.1 Introduction	525

17.2	Diseases with Putative “Gene–Pesticide” Interactions	525
17.2.1	Pesticides, Genes, and Cancer Risk	525
17.2.2	Pesticides, Genes, and Parkinson’s Disease	526
17.3	Importance of Environmental Exposure Assessment in $G \times E$ Studies of Pesticides	528
17.4	Specific Genes and Polymorphisms Relevant to Putative Gene–Pesticide Interactions	529
17.4.1	Cytochromes P450S	529
17.4.2	Paraoxonase	536
17.4.3	Additional Carboxylic Esterases	538
17.4.4	Glutathione S_{α} Transferase	539
17.4.5	Additional Putative Pesticide Susceptibility Genes	540
	Conclusions	541
18.	Pesticides as Endocrine- Disrupting Chemicals	551
18.1	Introduction	551
18.2	Steroid Hormones	553
18.2.1	Estrogen Receptor Function	553
18.2.2	Androgen Receptor Function	554
18.2.3	Steroidogenesis Inhibitors	555
18.2.4	Inducers of Steroid Clearance	557
18.2.5	Enhancers of Steroid Action	557
18.3	Hypothalamic–Pituitary–Gonadal Axis	558
18.3.1	Dithiocarbamates	558
18.3.2	Atrazine	558
18.3.3	Pyrethroids	559
18.4	Thyroid Hormone	560
18.4.1	2,4-D	560
18.4.2	Triclosan	561
18.5	Impact on Testing Guidelines	561
18.5.1	Multigenerational Studies	561
18.5.2	Endocrine Disruptors Screening Program	562
	Conclusion	565

36.2.4 Phase II Reactions: Conjugations	871	39.2.6 Storage and Redistribution	925
36.3 Major Xenobiotic Biotransformation Reactions	873	39.2.7 Storage with Repeated Exposure	925
Conclusions	873	39.3 Pharmacokinetics	926
37. Absorption	877	39.3.1 Noncompartmental Models	926
37.1 Introduction	877	39.3.2 Overview of Classical Compartmental Models	928
37.2 Factors that Influence the Transfer and Availability of Chemicals in the Body	878	39.3.3 One-Compartment Model	928
37.2.1 Properties of Cell Membranes	878	39.3.4 Multicompartment Models	932
37.2.2 Transport Mechanisms	878	39.3.5 Physiologically Based Models	934
37.2.3 Protein (Macromolecular) Binding	879	Conclusion	938
37.3 Absorption	880	40. Metabolic Interactions of Pesticides	941
37.3.1 Percutaneous Absorption	881	40.1 Chemical Factors Affecting Pesticide Metabolism: Introduction	941
37.3.2 Absorption From the Gastrointestinal Tract	886	40.2 Induction	941
37.3.3 Absorption From the Respiratory Tract	887	40.2.1 Induction of Microsomal Enzyme Activity	941
37.3.4 Absorption After Exposure by Other Routes	888	40.2.2 Induction of Other Enzymes	948
37.4 Summary and Future Directions	888	40.2.3 Mechanism of Induction	948
38. Metabolism of Pesticides	893	40.3 Inhibition	948
38.1 Introduction	893	40.3.1 Types of Inhibition and Experimental Demonstration	948
38.2 External Transformation	893	40.3.2 Synergism and Potentiation	950
38.3 Biotransformation	894	40.3.3 Antagonism	950
38.3.1 Biotransformation in the Liver	898	40.3.4 Pesticides as Inhibitors	951
38.3.2 Biotransformation in Extrahepatic Tissues	907	40.4 Biphasic Effects: Inhibition and Induction	951
38.4 Toxicity of Metabolites	909	40.5 Activation	953
38.5 Physiological Factors Affecting Biotransformation	910	40.6 Hepatotoxicity	953
38.5.1 Developmental Effects	910	Conclusion	953
38.5.2 Species Differences	910		
38.5.3 Individual and Strain Differences	910	41. Pesticide Excretion	961
38.5.4 Gender Differences	910	41.1 Introduction	961
38.5.5 Genetic Factors	911	41.2 Renal Function	961
38.6 Tolerance and Resistance	911	41.2.1 Overall Aspects	961
38.6.1 Tolerance	911	41.2.2 Glomerular Filtration	962
38.6.2 Resistance	911	41.2.3 Tubular Reabsorption	962
Conclusions	912	41.2.4 Tubular Secretion	962
39. Distribution and Pharmacokinetics	923	41.3 Biliary Excretion	963
39.1 Introduction	923	41.4 Respiratory Excretion	963
39.2 Distribution	923	41.5 Other Routes of Excretion	963
39.2.1 Total Body Water	924	41.5.1 Gender-Linked Routes of Excretion	963
		41.5.2 Alimentary Elimination	964
		41.5.3 Obscure Routes of Excretion	964
		41.6 Cellular Elimination	964
		41.7 Excretion of Pesticides and their Metabolites as Biomarkers of Exposure	965
		Conclusion	966

Section VII Exposure Measurement and Mitigation

42. Exposure Framework	971
42.1 Introduction	971
42.2 Exposure Science	971
42.3 Exposure Assessment	973
42.4 Considerations for Pesticide Exposure Assessments	974
Conclusion	976
43. Sampling and Analysis for Nonoccupational Pesticide Exposure Assessments	977
43.1 Introduction	977
43.2 Design of Nonoccupational Observational Exposure Measurement Studies	978
43.3 Sample Collection Methods	981
43.3.1 Criteria for Selection of Sample Collection Methods	981
43.3.2 Methods for Estimating Inhalation Exposure	984
43.3.3 Methods for Estimating Dermal Exposure	984
43.3.4 Indirect Methods for Estimating Dermal Exposure	985
43.3.5 Methods for Estimating Indirect Ingestion	985
43.3.6 Direct Methods for Estimating Dietary Exposure: Duplicate Diet Samples	986
43.3.7 Water Collection Methods	986
43.3.8 Soil Measurement Methods	986
43.3.9 Collection of Biomonitoring Samples	986
43.3.10 Collection of Ancillary Information Such as Activity Data and Questionnaires	987
43.4 Analytical Methods for Pesticide Measurements	987
43.4.1 General Principles	987
43.4.2 Method Performance Requirements	989
43.4.3 State-of-the-Science	991
Conclusion	991
Acknowledgments	992
44. Modeling and Predicting Pesticide Exposures	995
44.1 Introduction	995
44.1.1 Terminology for Human Exposure Models	996

44.1.2 Pesticide Exposure Models	997
44.2 Types of Human Exposure Models	998
44.2.1 Screening-Level Exposure Models	999
44.2.2 Comprehensive Human Exposure Models	1002
44.3 Source-to-Dose Exposure Modeling for Pesticides	1002
44.3.1 Overview of the Steps in Exposure Modeling	1003
44.3.2 Human Activity-Based Exposure Modeling	1006
44.3.3 Toxicokinetic Modeling for Assessing Pesticide Uptake and Distribution	1008
44.3.4 Exposure Reconstruction and Inverse Modeling	1010
44.3.5 Sensitivity and Uncertainty Analyses	1011
44.4 Discussion: Models to Support Pesticide Regulation	1012
44.4.1 Chromated Copper Arsenate (CCA) Exposures to Children	1013
44.4.2 Assessing Chlorpyrifos Exposures and Doses	1013
Conclusion	1016
Acknowledgments	1017
45. Biomonitoring: Uses and Considerations for Assessing Nonoccupational Human Exposure to Pesticides	1021
45.1 Introduction	1021
45.2 Linking Pesticide Exposure to Health Effects	1021
45.3 The Uses of Biomonitoring	1022
45.3.1 Assessing Population-Based Exposure Trends	1022
45.3.2 Improving Estimates of Exposure and Dose	1026
45.4 Biomarker Selection and Use	1027
45.4.1 Sensitivity	1027
45.4.2 Specificity	1027
45.4.3 Validity	1029
45.4.4 Biological Relevance	1029
45.4.5 Practicality	1029
45.5 Factors Affecting the Use and Interpretation of Biomarkers of Exposure	1030
45.5.1 Kinetics	1030
45.5.2 Urinary Excretion Rate	1031
45.6 Summary and Suggestions for Future Research	1033
Conclusion	1034
Acknowledgments	1034

46. Pesticide Exposure from Residential and Recreational Turf	1037
46.1 Introduction	1037
46.2 Assessment of Transferable Turf Residues	1039
46.3 Activities on Residential and Recreational Turf	1041
46.4 Exposure Assessment Methodology	1042
46.5 Calculation of the Safe Residue Level	1043
46.6 Regulatory Approach to Postapplication Exposure to Turf	1043
Conclusion	1044
47. Lawn and Turf: Management and Environmental Issues of Turfgrass Pesticides	1047
47.1 Turf Environments	1047
47.1.1 Usage and Functional Aspects	1047
47.2 Turf Pesticides and Use	1048
47.2.1 Turf Pesticide Industry	1048
47.2.2 Control of Turf Pests	1049
47.2.3 Turf Pest Management	1055
47.3 Turf Pesticide Issues	1057
47.3.1 Environmental Issues	1057
47.3.2 Exposure Issues	1063
47.3.3 Best Management Practices	1069
Conclusions	1073
48. Pet Care Products Used for Insect Pest Control	1077
48.1 Introduction	1077
48.2 Pet Ownership and Pet Care in the United States	1078
48.3 Pet Care Products: How They are Used to Control Insect Pests	1079
48.3.1 Exposure Monitoring Studies	1079
48.3.2 Pet Care Product Applicator and Postapplicator Exposure Assessment Methods	1082
48.4 Case study: Illustration of EPA Methodology	1084
48.4.1 Properties of Formulation	1086
48.4.2 Postapplication Dermal and Incidental Ingestion Exposure Variables	1087
48.4.3 Activity Patterns	1087
48.4.4 Research Data and Assessment Methodology Needs for Pet Care Pesticide Products	1087
Conclusion	1089
49. Residential Exposure Assessment: An Overview	1091
49.1 Introduction	1091
49.2 Overview of General Issues	1092

49.3 Lessons Learned from Key Studies	1093
49.4 Guidance for Residential Postapplication Exposure Assessment Methods and Data Sources for Exposure Factors	1094
49.5 Research Needs	1094
50. Modeling Dietary Exposure with Special Sections on Modeling Aggregate and Cumulative Exposure	1099
50.1 Overview	1099
50.2 Exposure Models	1101
50.2.1 General Exposure Model	1101
50.2.2 General Dietary Model	1102
50.2.3 Probabilistic or Monte Carlo Models	1103
50.2.4 Combination of Screening and Probabilistic Models	1103
50.2.5 Contact Factors for Dietary Exposure Model: Food Consumption	1103
50.2.6 Common Types of Food Consumption Surveys	1104
50.2.7 Estimating Residues in Foods	1106
50.2.8 Considerations for Cumulative Exposure Assessments	1106
50.2.9 Consideration for Aggregate Exposure Assessments	1107
50.2.10 Estimating Aggregate and Cumulative Exposures Using a Calendar Model	1107
50.2.11 Toxicity Data Used to Place the Exposure Assessment in Context	1108
50.3 Sample Model Calculation Methodologies	1108
50.3.1 Typical Exposure Methodology Sequence	1108
50.3.2 Monte Carlo Simulation Methodology	1109
50.3.3 Degradation Calculation Methodology	1109
50.3.4 Risk (MOE) Calculation Methodology	1110
50.4 Uncertainty	1110
50.4.1 Scenario Uncertainty	1110
50.4.2 Parameter Uncertainty	1110
50.4.3 Model Uncertainty	1110
50.5 Example of Aggregate Exposure	1110
50.5.1 Description	1110
50.5.2 Adult Applicator Dermal and Inhalation Exposures	1111
50.5.3 Adult and Toddler Postapplication Dermal Exposures	1111

50.5.4	Toddler Postapplication Incidental Ingestion Exposures	1112	52.6.1	Patch Method for Dermal Exposure	1130
50.5.5	Reporting Results	1112	52.6.2	Use of Fluorescent Tracers and Visible Dyes: Quantification by Analysis or Video Imaging	1131

Section VIII Regional and Global Environmental Exposure Assessments

56. Ecotoxicological Risk Assessment of Pesticides in the Environment	1191
56.1 Introduction	1191
56.1.1 Risk Assessment of Pesticides	1191
56.1.2 Assessing Risks from Pesticides in Relation to Other Substances	1193
56.1.3 Protection Goals, Assessment Endpoints, and Measures of Effects	1195
56.2 The Risk Assessment Analysis	1199
56.2.1 Characterizing Effects	1200
56.2.2 Characterizing Exposure	1203
56.3 Risk Assessment of Pesticides	1206
56.3.1 Scoring Systems and Setting of Criteria	1206
56.3.2 The Hazard Quotient	1207
56.3.3 Probabilistic Risk Assessment	1207
56.4 Risk Communication	1212
Conclusion	1213

57. Environmental Transport and Fate	1219
57.1 Introduction	1219
57.2 Principles	1221
57.2.1 The Dissipation Process	1221
57.2.2 Environmental Compartments	1221
57.2.3 Structure	1222
57.2.4 Activation-Deactivation	1224
57.3 Environmental Transport and Fate Modeling	1224

100.5.1	Overview	2171
100.5.2	Resistance to Anticoagulant Rodenticides	2173
100.5.3	Warfarin	2174
100.5.4	Coumafuryl	2182
100.5.5	Diphacinone	2182
100.5.6	Brodifacoum	2184
100.5.7	Chlorophacinone	2188
100.5.8	Difenacoum	2190
100.5.9	Bromadiolone	2192
100.5.10	Difethialone	2193
100.6	Vitamin D-Related Compounds	2194
100.6.1	Ergocalciferol	2194
100.6.2	Cholecalciferol	2197
100.7	Miscellaneous Synthetic Organic Rodenticides	2200
100.7.1	Chloralose	2200
100.7.2	Norbormide	2202
100.7.3	Bromethalin	2204
100.7.4	Banned Compounds	2205
100.7.5	On-going Research for New Chemical Families with Rodenticidal Properties	2205
	Conclusion	2206
101.	Toxicology and Safety Evaluation of the New Insect Repellent Picaridin (Saltidin)	2219
101.1	Introduction	2219
101.2	General Overview	2219
101.2.1	Chemistry	2219
101.2.2	Mode of Action	2219
101.2.3	Effectiveness Against Disease Vectors	2220
101.3	Metabolism and Toxicokinetics	2221

101.4 Mammalian Toxicology	2223
101.4.1 Acute Toxicity	2223
101.4.2 Subchronic toxicity	2224
101.4.3 Chronic Toxicity and Oncogenicity	2224
101.4.4 Genotoxicity	2225
101.5 Developmental Toxicity	2225
101.5.1 Rat	2225
101.5.2 Rabbit	2225
101.6 Reproductive Toxicity	2225
101.7 Neurotoxicity	2226
101.7.1 Acute	2226
101.7.2 Subchronic	2226
101.8 Dermal Absorption	2226
101.8.1 Rat	2226
101.8.2 Human Volunteers	2226
101.8.3 Human Skin	2226
101.9 Exposure and Safety Evaluation Conclusion	2227

102. Chlorantraniliprole: An Insecticide of the Anthranilic Diamide Class

2231

102.1 Introduction	2231
102.2 Identity, Properties, and Uses	2231
102.2.1 Chemical Name	2231
102.2.2 Synonyms	2231
102.2.3 Physical and Chemical Properties	2231
102.2.4 History, Formulations, and Uses	2232
102.3 Biological Mode of Action	2232
102.4 Absorption, Distribution, Metabolism, and Excretion	2232
102.4.1 Toxicokinetics in Rats	2232
102.4.2 Metabolic Pathways in Rats	2233
102.4.3 Plasma Concentrations of Parent and Metabolites in Feeding Studies	2233
102.5 Toxicity to Laboratory Animals	2233
102.5.1 Acute Toxicity	2233
102.5.2 Subchronic Toxicity	2235
102.5.3 Chronic Toxicity and Oncogenicity	2237
102.5.4 Effects on Adrenal Function	2237
102.5.5 Effects on Reproduction and Development	2238
102.5.6 Neurotoxic Effects	2239
102.5.7 Immunotoxic Effects	2240
102.6 Genotoxicity	2240
102.7 Toxicity to Humans	2240
102.7.1 Direct Observations and Health Records	2240

102.7.2 Diagnosis of Poisoning	2240
102.7.3 Sensitization Observations	2241
102.7.4 Proposed Treatment	2241
102.8 Reference Values and Conclusions	2241
Acknowledgments	2242

Section XV Fumigants

103. Sulfuryl Fluoride

2245

103.1 Chemistry and Formulations	2245
103.2 Uses	2245
103.3 Hazard Identification: Toxicity to Laboratory Animals (Pre-1980)	2246
103.3.1 Acute Toxicity	2246
103.3.2 Subchronic Toxicity	2246
103.4 Toxicity to Laboratory Animals (Post-1980)	2246
103.4.1 Acute Toxicity	2246
103.4.2 Acute Neurotoxicity	2247
103.4.3 Time to Incapacitation	2247
103.4.4 Therapeutic/Amelioration of Toxicity	2247
103.4.5 Repeated Exposures	2248
103.4.6 Subchronic Toxicity	2248
103.4.7 Chronic Toxicity	2252
103.4.8 Teratology Studies	2254
103.4.9 Reproduction Toxicity	2254
103.4.10 Genetic Toxicity	2255
103.4.11 Uptake and Metabolism	2255
103.5 Toxicology in Humans	2256
103.6 Conclusion	2256
103.6.1 Risk Characterization	2256

104. Phosphine

2259

104.1 Identity, Properties, and Uses	2259
104.1.1 Physical Properties	2259
104.1.2 Chemistry	2259
104.2 Sources, Uses, and Formulations	2260
104.2.1 Natural Sources	2260
104.2.2 Commercial Sources	2260
104.3 Toxicology	2260
104.3.1 Overview	2260
104.4 Toxicity and Mode of Action	2260
104.4.1 Acute Toxicity	2260
104.5 Animal Dose/Response	2261
104.5.1 Threshold for Lethality	2261
104.5.2 Acute and Subacute Dose/Response	2261
104.6 Absorption, Distribution, Metabolism, and Excretion	2261
104.7 Cellular and Molecular Studies	2261

104.7.1 General	2261
104.7.2 Cytochromes and Cytochrome Oxidase	2262
104.7.3 Hemoglobin	2262
104.8 Peroxidases, Lipid Peroxidation, Catalase, and Cholinesterase	2262
104.9 Genotoxicity, Cancer and Reproductive Effects	2263
104.10 Treatment of Poisoning	2263
104.11 Regulatory Notes (Exposure Guidelines)	2264
104.12 Summary and Comments	2264

105. Methyl Bromide

2267

105.1 Introduction	2267
105.2 Chemical Properties and Pesticidal Uses of Methyl Bromide	2267
105.3 Toxicology of Methyl Bromide	2268
105.3.1 Acute Toxicity	2268
105.3.2 Subchronic Toxicity	2269
105.3.3 Genetic Toxicity	2270
105.3.4 Developmental and Reproductive Toxicity	2272
105.3.5 Chronic Toxicity and Oncogenicity: Inhalation	2273
105.3.6 Chronic Toxicity and Oncogenicity: Dietary	2273
105.3.7 Neurotoxicity	2274
105.3.8 Specific Target Organ Effects	2275
105.4 Metabolism	2275
105.4.1 Absorption	2275
105.4.2 Distribution	2276
105.4.3 Identification and Quantitation of Metabolites	2276
105.4.4 Excretion	2277
105.5 Human Exposure Conclusion	2277

106. 1,3-Dichloropropene

2281

106.1 Chemistry and Formulations	2281
106.1.1 Chemical Name	2281
106.1.2 Structure	2281
106.1.3 Synonyms	2281
106.1.4 Physical and Chemical Properties	2281

106.1.5 Formulations	2281
106.2 Uses	2281
106.3 Hazard Identification	2282
106.3.1 Acute Toxicity	2282
106.3.2 Repeated Dose Toxicity	2282
106.3.3 Effects on Reproduction	2283
106.3.4 Absorption, Distribution, Metabolism, and Excretion	2283
106.3.5 Short-Term Assays	2285
106.3.6 Chronic Toxicity and Oncogenicity Assays	2285
106.4 Dose Response	2286
106.5 Toxicology in Humans	2288
106.5.1 Experimental Exposure	2288
106.5.2 Accidental Poisoning	2288
106.5.3 Use Experience	2288
106.6 Summary Risk Characterization	2289

107. Metam-Sodium

2293

107.1 Introduction	2293
107.2 Acute toxicity	2294
107.3 Subchronic Toxicity	2294
107.4 Genetic Toxicity	2295
107.5 Developmental and Reproductive Toxicity	2297
107.6 Chronic/Oncogenicity Toxicity	2298
107.7 Neurotoxicity	2302
107.8 Other Studies (Mammalian)	2303
107.9 Metabolism	2304

108. Methyl Iodide

2307

108.1 Background	2307
108.2 Methyl Iodide Properties	2307
108.3 Registration Issues	2308
108.4 Exposure Issues	2309
108.4.1 Quantifying Exposure of Plant Pests to Mel	2309
108.5 Crop Production	2311
108.6 Environmental Fate of Methyl Iodide as a Soil Fumigant	2311
108.6.1 Transformation in Aqueous Solution	2311
108.6.2 Transformation in Soil	2312
Conclusion	2316
