<i>Preface</i>	ix
1. Introduction	1
<i>Mieczysław Jurczyk and Karolina Jurczyk</i>	
1.1 Motivation	1
1.2 Nanomaterials	6
1.3 Nanobiotechnology	9
2. Stomatognathic System	17
<i>Karolina Jurczyk</i>	
2.1 Elements of the Stomatognathic System	17
2.2 Implantology Issues in the Stomatognathic System	22
2.3 Characteristics of the Stomatognathic System	25
3. Biomaterials	29
<i>Mieczysław Jurczyk and Karolina Jurczyk</i>	
3.1 Introduction	29
3.2 Metallic Biomaterials	33
3.2.1 Stainless Steel	35
3.2.2 Cobalt Alloys	39
3.2.3 Titanium and Titanium Alloys	42
3.2.4 Noble Metal Alloys	50
3.3 Ceramic Biomaterials	50
3.3.1 Bioinert Ceramics	52
3.3.1.1 Alumina	52
3.3.1.2 Zirconia	53
3.3.1.3 Carbon	55
3.3.2 Bioactive Ceramics	56
3.3.3 Bioresorbable Ceramics	59
3.4 Polymers	61
3.4.1 Acrylic Resins	62
3.4.2 Composite Resins	63
3.5 Composite Biomaterials	65

4. Nanotechnology	81
<i>Mieczysław Jurczyk and Mieczysława U. Jurczyk</i>	
4.1 Synthesis of Nanopowders	83
4.1.1 Top-Down Approach	83
4.1.1.1 Milling processes	83
4.1.1.2 Nanoprocessing	85
4.1.1.3 Mechanical alloying	86
4.1.2 Bottom-Up Approach	91
4.1.2.1 Wet chemical processes	91
4.1.2.2 Form in place processes	92
4.1.2.3 Gas phase synthesis	93
4.2 Nanopowder Consolidation	95
4.2.1 Consolidation Methods	96
4.2.2 Nanosintering	97
4.2.3 Pore Effects and Grain Growth	98
4.3 Severe Plastic Deformation	98
4.3.1 Equal Channel Angular Pressing	99
4.3.2 Cyclic Extrusion Compression Method	100
4.3.3 High Pressure Torsion	100
4.3.4 Other Severe Plastic Deformation Methods	101
5. Corrosion of the Metallic Biomaterials and Implants	107
<i>Jarosław Jakubowicz</i>	
5.1 Corrosion of the Ti-Based Alloys	107
5.2 Corrosion of the Ti-Based Porous Materials	127
5.3 Corrosion of the Hydroxyapatite Ti-Coated Compounds	132
5.4 Corrosion of the Other Dental Materials	138
6. Nanostructured Stainless Steels	147
<i>Maciej Tulinski</i>	
6.1 Nickel-Free Stainless Steels	148
6.2 Nanostructured Nickel-Free Stainless Steels	153
6.3 Nickel-Free Stainless Steels/ Hydroxyapatite Nanocomposites	158
7. Ti-Based Ceramic Nanocomposites	165
<i>Katarzyna Niespodziana and Mieczysław Jurczyk</i>	
7.1 Introduction	165
7.2 Ti-HA Nanocomposites	167

7.2.1	Microstructure and Phase Constitution	167
7.2.2	Mechanical Properties	171
7.2.3	Corrosion Properties	174
7.3	Ti-SiO ₂ Nanocomposites	176
7.4	Ti-45S5 Bioglass Nanocomposites	179
7.5	Ti-Al ₂ O ₃ Nanocomposites	180
8.	Shape Memory NiTi Materials	185
	<i>Andrzej Miklaszewski</i>	
8.1	Background	185
8.2	Overview of Shape Memory Materials	189
8.2.1	MSMAs — Magnetic Shape Memory Alloys	189
8.2.2	SMPs — Shape Memory Polymers	192
8.3	Brief History of SMAs	194
8.4	SMAs — Introduction to Properties	196
8.4.1	Thermally Induced Transformation	198
8.4.2	Mechanically Induced Transformation	199
8.4.3	SME — Shape Memory Effect	201
8.4.4	TWSME — Two-Way Shape Memory Effect	202
8.5	Receiving of Nickel-Titanium Shape Memory Alloy	204
8.6	Biocompatibility and Corrosion Resistance of Nickel Titanium SMA	211
8.7	Shape Memory Materials Application	213
9.	Surface Treatment of the Ti-Based Nanomaterials	221
	<i>Jaroslav Jakubowicz</i>	
9.1	Introduction	221
9.2	Electrochemical Anodic Oxidation	224
9.2.1	Electrochemically Grown Porous TiO ₂	224
9.2.2	TiO ₂ Nanotubes and Nanofibers	251
9.2.3	Ti-Based Nanocomposites	273
9.2.4	Ti-Based Nanoalloys	276
9.3	Formation of Electrochemically Grown Ca/P Layer	280
10.	Carbon Materials	305
	<i>Jaroslav Jakubowicz</i>	
10.1	Carbon Thin Films	305
10.2	Carbon Nanotubes	309
10.3	Carbon Nanofibers	317
10.4	Carbon Nanoparticles	324

11. Nanomaterials in Preventive Dentistry	333
<i>Karolina Jurczyk and Mieczysława U. Jurczyk</i>	
11.1 Nanodentistry	334
11.2 Biomimetic Nanomaterials	334
11.3 Antimicrobial Effect of Nanometric Bioactive Glass 45S5	337
11.4 Nano-Sized Calcium-Deficient Apatite Crystals	340
12. Osteoblast Behavior on Nanostructured Implant Materials	345
<i>Karolina Jurczyk and Mieczysława U. Jurczyk</i>	
12.1 Introduction	345
12.2 Biocompatibility	347
12.3 Nanostructured Biomaterials	352
12.3.1 Nanostructured Biointerfaces	354
12.3.2 Osteoblastic Cell Behavior on Nanostructured Surface of Metal Implants	355
12.3.3 Adhesion of Osteoblast-Like Cells on Nanostructured Hydroxyapatite	365
12.3.4 Size Effect of Hydroxyapatite Nanoparticles on Proliferation and Apoptosis of Osteoblast Cells	366
12.3.5 Biocompatibility of Ti-Bioceramic Nanocomposites	369
12.3.6 Biocompatibility of Ni-Free Stainless Steel	371
13. Applications of Nanostructured Materials in Dentistry	387
<i>Karolina Jurczyk and Mieczysława U. Jurczyk</i>	
13.1 Bulk Nanostructured Titanium	388
13.2 Dental Implants with Nanosurface	392
13.3 Nanostructured Materials for Permanent and Bioresorbable Medical Implants	396
13.4 Nanostructured Dental Composite Restorative Materials	399
<i>Index</i>	407
