List of Contributors and Addresses	viii
R. M. M. Crawford: Introduction and tribute to the late Professor D. H. N. Spence	xi

PART I: AQUATIC PLANTS

A: The Aquatic Environment

M. G. Holmes & W. H. Klein. The light and temperature environments	3
M. J. Dring. Light climate in intertidal and subtidal zones in relation to photosynthesis and growth of benthic algae: a theoretical model	23
G. Russell. Salinity and seaweed vegetation	35
I. Ridge. Ethylene and growth control in amphibious plants	53

B: Photosynthesis under Water

G. Bowes. Aquatic plant photosynthesis: strategies that enhance carbon gain	79
K. Sand-Jensen. Environmental control of bicarbonate use among freshwater and marine macrophytes	99
J. E. Keeley. The adaptive radiation of photosynthetic modes in the genus <i>Isoetes</i> (Isoetaceae)	113
J. A. Raven, H. Griffiths & J. J. Macfarlane. The application of carbon isotope discrimination techniques	129

C: Growth, Development and Dispersal in Aquatic Plants

D. H. N. Spence, M. R. Bartley & R. Child. Photomorphogenic processes in freshwater angiosperms	153
B. Frankland, M. R. Bartley & D. H. N. Spence. Germination under water	167
C. D. K. Cook. Dispersion in aquatic and amphibious vascular plants	179

PART II: AMPHIBIOUS PLANTS AND FLOODING TOLERANCE

A: Oxygen Stress in Seeds and Seedlings

- R. A. Kennedy, M. E. Rumpho & T. C. Fox.** Germination physiology of rice and rice weeds: metabolic adaptations to anoxia 193
- B. B. Vartapetian, H. H. Snkhchian & I. P. Generozova.** Mitochondrial fine structure in imbibing seeds and seedlings of *Zea mays* L. under anoxia 205

B: Root Physiology under Oxygen Stress

- T. ap Rees, L. E. T. Jenkin, A. M. Smith & P. M. Wilson.** The metabolism of flood-tolerant plants 227
- I. A. Mendelssohn & K. L. McKee.** Root metabolic response of *Spartina alterniflora* to hypoxia 239
- A. Bertani, I. Brambilla & R. Reggiani.** Effect of exogenous nitrate on anaerobic root metabolism 255
- D. D. Davies, P. Kenworthy, B. Mocquot & K. Roberts.** The effects of anoxia on the ultrastructure of pea roots 265

C: Whole Plant Responses to Oxygen Stress

- D. D. Hook & S. Denslow.** Metabolic responses of four families of loblolly pine to two flood regimes 281
- C. Studer & R. Braendle.** Ethanol, acetaldehyde, ethylene release and ACC concentration of rhizomes from marsh plants under normoxia, hypoxia and anoxia 293
- T. J. Gaynard & W. Armstrong.** Some aspects of internal plant aeration in amphibious habitats 303
- M. C. Drew.** Mechanisms of acclimation to flooding and oxygen shortage in non-wetland species 321
- G. R. Stewart & M. Popp.** The ecophysiology of mangroves 333
- D. A. Rugg & T. A. Norton.** *Pelvetia canaliculata*, a high-shore seaweed that shuns the sea 347
- C. A. Maggs & M. D. Guiry.** Environmental control of macroalgal phenology 359
- R. M. M. Crawford, L. S. Monk & Z. M. Zochowski.** Enhancement of anoxia tolerance by removal of volatile products of anaerobiosis 375

D. R. Drakeford & D. M. Reid. Some rapid responses of sunflower to flooding	385
R. Braendle & R. M. M. Crawford. Rhizome anoxia tolerance and habitat specialization in wetland plants	397
T. L. Setter, I. Waters, B. J. Atwell, T. Kapanchanakul & H. Greenway. Carbohydrate status of terrestrial plants during flooding	411
