

CONTENTS

Preface	ix
----------------------	-----------

POLYMERS

1. Progress and Prospects for Energy Conservation in Plastics Processing	3
Rudolph D. Deanin	
2. Concepts in Energy Savings in Plastics Processing	9
Nick R. Schott and Howard Derby	
3. Energy Efficiency in Plasticating Screw Extrusion	21
C. I. Chung, E. M. Mount, III, and D. E. McClelland	
4. Energy Conservation Through Silicone Liquid Polymer Processing System	37
J. L. Elias, M. T. Maxson, and C. L. Lee	
5. Microwave Curing of Silicone Elastomers and Foams for Energy Savings	45
C. L. Lee	
6. The Importance of Curing Conditions in Overall Energy Requirements for Organic Coatings	51
V. D. McGinniss, L. J. Nowacki, and S. V. Nablo	
7. Electron-Curable Coatings and Adhesives: Formulation Basics and Application Technology	71
J. P. Guarino and E. P. Tripp	
8. Optimization of Cure Conditions during Processing of Acrylic Latex Coatings	81
Chor Huang and Edward J. Leeson	
9. New Energy Saving Reactive Acrylic Liquid Polymers for the Pressure Sensitive Adhesives Industry	97
Y. S. Lee	

TEXTILES

10. Energy Conservation in Cotton Ginning	109
Roy V. Baker and Oliver L. McCaskill	
11. Sizing and Desizing Textiles with Degraded Starch and Ultrasonic Techniques to Conserve Energy	127
G. M. Elgal, G. F. Ruppenicker, Jr., and N. B. Knoepfler	

12. Energy and Related Savings from Controlled Low Wet Pick-Up Application of Textile Chemicals and Dyes via Semistable Foams .	145
George M. Bryant	
13. The Utilization of Foams in the Wet Processing of Textiles	155
R. S. Gregorian, R. A. Bafford, and C. G. Namboodri	
14. Low Energy Curing Pigment Padding and Printing: Use of a Highly Active Catalyst System	175
D. V. Parikh	
15. Radiation-Curable, 100% Reactive Pigment Prints: The Effect of Paste Rheology on Print Quality	187
L. H. Wadhwa and W. K. Walsh	
16. Dyebath and Auxiliary Bath Reuse for Energy and Mass Conservation	201
F. L. Cook and W. C. Tincher	
17. Energy Consumption and Conservation: Textile Drying	243
David Brookstein	
18. Effective Use of Textiles for Energy Conservation	255
Tyrone L. Vigo and Charles B. Hassenboehler, Jr.	
Index'	281
