### WATER QUALITY INDICES BASED PREDOMINANTLY ON PHYSICO-CHEMICAL CHARACTERISTICS

#### 1. Why Water-Quality Indices 3

- 1.1. Introduction 3
- 1.2. Water-Quality Indices (WQIs) 4
- 1.3. Back to Water-Quality Indices (WQIs) 5
- 1.4. The First Modern WQI: Horton's Index 5
- 1.5. More on the Benefits of WQI 6
- 1.6. WQIs Based on Bioassessment 6
- References 7

#### 2. Approaches to WQI Formulation 9

- 2.1. Introduction 9
- 2.2. The Common Steps 9
- 2.3. Parameter Selection 10
- 2.4. Transformation of the Parameters of  
Different Units and Dimensions to a  
Common Scale: Making Subindices 11
- 2.5. Assignment of Weightages 15
- 2.6. Aggregation of Subindices to Produce a  
Final Index 15
- 2.7. Characteristics of Aggregation Models 18
- References 23

#### 3. 'Conventional' Indices for Determining Fitness of Waters for Different Uses 25

- 3.1. General 26
- 3.2. Brown's or the National Sanitation  
Foundation's Water-Quality Index  
(NSF-WQI) 26

- 3.3. Nemerow and Sumitomo's Pollution  
Index 29
- 3.4. Prati's Implicit Index of Pollution 30
- 3.5. Deininger and Landwehr's  
PWS Index 31
- 3.6. McDuffie and Haney's River Pollution  
Index (RPI) 32
- 3.7. Dinius' Water-Quality Index (1972) 33
- 3.8. O'Connor's Indices 34
- 3.9. Walski and Parker's Index 34
- 3.10. Stoner's Index 35
- 3.11. Bhargava's Index (1983, 1985) 36
- 3.12. Dinius' Second Index 38
- 3.13. Viet and Bhargava's Index (1989) 39
- 3.14. The River Ganga Index of  
Ved Prakash et al. 39
- 3.15. Smith's Index (1990) 40
- 3.16. Chesapeake Bay Water-Quality Indices  
(Haire et al. 1991) 47
- 3.17. The Aquatic Toxicity Index 47
- 3.18. Li's Regional Water Resource Quality  
Assessment Index (1993) 48
- 3.19. A Two-Tier WQI 48
- 3.20. Use of WQI To Assess Pond Water  
Quality (Sinha, 1995) 48
- 3.21. Use of WQI to Study Hanuman Lake,  
Jabalpur (Dhamija and Jain 1995) 50
- 3.22. Coastal Water-Quality Index for Taiwan  
(Shyue et al. 1996) 50
- 3.23. The Modified Oregon Water-Quality Index  
(Cude, 2001) 51
- 3.24. The 'Overall Index of Pollution' 52
- 3.25. The Canadian Water-Quality Index  
(CCME, 2001) and the Index of  
Said et al. (2004) 54
- 3.26. A 'Universal' Water-Quality Index 54
- 3.27. Improved Methods of Aggregation 55
- 3.28. A First-Ever WQI For Vietnam 57
- 3.29. A Comparison 61
- References 61

4. Combating Uncertainties in Index-based Assessment of Water Quality: The Use of More Advanced Statistics, Probability Theory and Artificial Intelligence	63	6.9. ICAGA'S Fuzzy WQI	97
References	66	6.10. Use of Ordered Weighted Averaging (OWA) Operators for Aggregation	102
5. Indices Based on Relatively Advanced Statistical Analysis of Water-Quality Data	67	6.11. Fuzzy Water-Quality Indices for Brazilian Rivers (Lermontov et al., 2008, 2009; Roveda et al., 2010)	105
5.1. Introduction	67	6.12. A Hybrid Fuzzy – Probability WQI	107
5.2. Harkin's Index	68	6.13. An Entropy-Based Fuzzy WQI	109
5.3. Beta Function Index	69	6.14. A Fuzzy River Pollution Decision Support System	112
5.4. An Index with a Multi-pronged ('Mixed') Aggregation Function	69	6.15. A Fuzzy Industrial WQI	114
5.5. WQI for Mediterranean Costal Water of Egypt Based on Principal-Component Analysis	71	6.16. Impact of Stochastic Observation Error and Uncertainty in Water-Quality Evaluation	114
5.6. WQI for Rio Lerma River	71	References	114
5.7. A New WQI Based on A Combination of Multivariate Techniques	71	7. Probabilistic or Stochastic Water-Quality Indices	119
5.8. Indices for Liao River Study	74	7.1. Introduction	119
5.9. Water-Quality Index Based on Multivariate Factor Analysis (Coletti et al., 2010)	75	7.2. A 'Global' Stochastic Index of Water Quality	121
5.10. Study of Anthropogenic Impacts on Kandla Creek, India	76	7.3. A Modification in the Global Stochastic Index by Cordoba et al. (2010)	124
References	77	References	125
6. Water-Quality Indices Based on Fuzzy Logic and Other Methods of Artificial Intelligence	79	8. 'Planning' or 'Decision-Making' Indices	127
6.1. Introduction	80	8.1. Introduction	128
6.2. Fuzzy Inference	80	8.2. Water-Quality Management Indices	128
6.3. A Primer on Fuzzy Arithmetic	81	8.3. Dee's WQI-Based Environmental Evaluation System	131
6.4. Towards Application of Fuzzy Rules in Developing Water-Quality Indices: The Work of Kung et al. (1992)	83	8.4. Zoeteman's Pollution Potential Index (PPI)	131
6.5. Assessment of Water Quality Using Fuzzy Synthetic Evaluation and Other Approaches Towards Development of Fuzzy Water-Quality Indices	86	8.5. Environmental Quality Index Presented by Inhaber (1974)	132
6.6. Reach of Fuzzy Indices in Environmental Decision-Making	88	8.6. Johanson and Johanson's Pollution Index	134
6.7. A WQI Based on Genetic Algorithm	92	8.7. Ott's NPPI	134
6.8. The Fuzzy Water-Quality Index of Ocampo-Duque et al. (2006)	93	8.8. Water-Quality Indices for Operational Management	134
		8.9. Index to Regulate Water-Management Systems	136
		8.10. Index to Assess the Impact of Ecoregional, Hydrological and Limnological Factors	136
		8.11. A Watershed-Quality Index	137
		8.12. Index for Watershed Pollution Assessment	137

- 8.13. A GIS-Assisted Water-Quality Index for Irrigation Water 137
- 8.14. A System of Indices for Watershed Management 141
- 8.15. A Fuzzy WQI for Water-Quality Assessment of Shrimp Farms 141
- 8.16. An Index to Assess Acceptability of Reclaimed Water for Irrigation 143
- 8.17. An Index for Irrigation Water-Quality Management 143
- 8.18. Index for the Analysis of Data Generated by Automated Sampling (Continuous Monitoring) Networks 144
- 8.19. An Index of Drinking-Water Adequacy for the Asian Countries 147
- 8.20. Indices for the Prediction of Stream of Quality in an Agricultural Setting 148
- 8.21. An Index to Assess Extent of Wastewater Treatment 149
- 8.22. Use of Indices for Prioritising Placement of Water-Quality Buffers to Control Nonpoint Pollution 151
- References 151

## 9. Indices for Assessing Groundwater Quality 155

- 9.1. Introduction 156
- 9.2. The WQI of Tiwari and Mishra (1985) 156
- 9.3. Another Oft-Used Groundwater-Quality Index Development Procedure 156
- 9.4. Index of Aquifer Water Quality (Melloul and Collin, 1998) 158
- 9.5. Groundwater-Quality Index of Soltan (1999) 159
- 9.6. A Groundwater Contamination Index 160
- 9.7. An Index for Surface Water as well as Groundwater Quality 160
- 9.8. Use of Groundwater-Quality Index, Contamination Index and Contamination Risk Maps for Designing Water-Quality Monitoring Networks 161
- 9.9. Attribute Reduction in Groundwater-Quality Indices Based on Rough Set Theory 163
- 9.10. Index Development Using Correspondence Factor Analysis 163
- 9.11. Indices for Groundwater Vulnerability Assessment 165

- 9.12. Groundwater-Quality Index to Study Impact of Landfills 165
- 9.13. Indices for Optimising Groundwater-Quality Monitoring Network 167
- 9.14. Economic Index of Groundwater Quality Based on the Treatment Cost 168
- 9.15. The Information-Entropy-Based Groundwater WQI of Pei-Yue et al. (2010) 168
- 9.16. A WQI for Groundwater Based on Fuzzy Logic 169
- 9.17. Use of WQI and GIS in Aquifer-Quality Mapping 170
- References 173

## 10. Water-Quality Indices of USA and Canada 175

- 10.1. Introduction 175
- 10.2. WQIs of Canada 176
- 10.3. WQIs of the USA 180
- 10.4. The WQI of Said et al. (2004) 180
- References 185

## 11. WQI-Generating Software and a WQI-based Virtual Instrument 187

- 11.1. Introduction 187
- 11.2. The Basic Architecture of Qualidex 187
- Reference 204

# II

## WATER QUALITY INDICES BASED ON BIOASSESSMENT

### 12. Water-Quality Indices Based on Bioassessment: An Introduction 207

- 12.1. Introduction 207
- 12.2. Biotic Indices in the Context of the Evolution of Water-Quality Indices 208
- 12.3. Stressor-Based and Response-Based Monitoring Approaches 211
- 12.4. Biotic Indices – General 214
- References 215

13. The Biotic Indices	219
13.1. Introduction	220
13.2. The Challenge of Finding 'Control' Sites	221
13.3. The Cost Associated with the Use of Biological Assessments of Water	221
13.4. Organisms Commonly used in Bioassessment	222
13.5. Biotic Indices for Freshwater and Saline water Systems Based on Macroinvertebrates	223
13.6. Biotic Indices as Indicators of Water Safety and Human Health Risks	234
13.7. Comparison of Performances of Different Biotic Indices	235
13.8. Biotic Indices and Developing Countries	239
13.9. Limitations of Biotic Indices	239
13.10. WQIs and BIs: An Overview	239
References	241

14. Indices of Biological Integrity or the Multi-metric Indices	249
14.1. Introduction	250
14.2. The First IBI (KARR, 1981)	251
14.3. The Driver—Pressure—Stress—Impact—Response (DPSIR) Paradigm and The IBI	254
14.4. Illustrative Examples of IBI Development	262
14.5. Overview of IBIs Based on Different Taxa	288
14.6. IBIs for Different Aquatic Systems	301
14.7. Inter-IBI Comparison	304

14.8. The Present and the Future of IBI	314
14.9. The Now Well-Recognised Attributes of IBI	321
14.10. The Shortcomings of IBI	322
References	324

15. Multivariate Approaches for Bioassessment of Water Quality	337
15.1. Introduction	337
15.2. Rivpacs	338
15.3. Variants of Rivpacs	341
15.4. The Multivariate Approaches and the IBI	345
References	348

### III

## LOOKING BACK, LOOKING AHEAD

16. Water-Quality Indices: Looking Back, Looking Ahead	353
16.1. Introduction	353
16.2. The Best WQI?	354
16.3. The Path Ahead	355
16.4. The Last Word	355
References	356
Index	357
