Chapter 1

Activated Carbon and Its Surface Structure.....	1
1.1 Crystalline Structure of Activated Carbons.....	3
1.2 Porous Structure of the Active Carbon Surface.....	4
1.3 Chemical Structure of the Carbon Surface.....	7
1.3.1 Carbon-Oxygen Surface Groups.....	8
1.3.2 Characterization of Carbon-Oxygen Surface Groups.....	10
1.3.2.1 Thermal Desorption Studies.....	11
1.3.2.2 Neutralization of Alkalies.....	17
1.3.2.3 Specific Chemical Reactions.....	21
1.3.2.4 Spectroscopic Methods.....	21
1.4 Influence of Carbon-Oxygen Surface Groups on	
Adsorption Properties.....	36
1.4.1 Surface Acidity of Carbons.....	38
1.4.2 Hydrophobicity.....	38
1.4.3 Adsorption of Polar Vapors.....	39
1.4.4 Adsorption of Benzene Vapors.....	42
1.4.5 Immersional Heats of Wetting.....	43
1.4.6 Adsorption from Solutions.....	44
1.4.7 Preferential Adsorption.....	45
1.4.8 Catalytic Reactions of Carbons.....	46
1.4.9 Resistivity.....	46
1.5 Active Sites on Carbon Surfaces.....	46
1.6 Modification of Activated Carbon Surface.....	52
1.6.1 Modification of Activated Carbon Surface	
by Nitrogenation.....	53
1.6.2 Modification of Carbon Surface by Halogenation.....	54
1.6.3 Modification of Carbon Surface by Sulfurization.....	56
1.6.4 Activated Carbon Modification by Impregnation.....	58
References.....	60

Chapter 2

Adsorption Energetics, Models, and Isotherm Equations.....	67
2.1 Adsorption on a Solid Surface.....	67
2.2 Adsorption Equilibrium.....	69
2.2.1 Adsorption Isotherm.....	69

2.2.2	Adsorption Isobar.....	70
2.2.3	Adsorption Isostere	70
2.3	Energetics of Adsorption	71
2.3.1	Molar Energy of Adsorption.....	72
2.3.2	Molar Integral Enthalpy of Adsorption	72
2.3.3	Molar Integral Entropy of Adsorption.....	73
2.3.4	Heat of Adsorption.....	73
2.3.5	Isosteric Heat of Adsorption	74
2.4	Adsorption Isotherm Equations	77
2.4.1	Langmuir Isotherm Equation	78
2.4.1.1	Langmuir Isotherm for Dissociative Adsorption.....	82
2.4.1.2	Langmuir Isotherm for Simultaneous Adsorption of Two Gases	83
2.4.1.3	Applicability of the Langmuir Isotherm	84
2.4.2	Brunauer, Emmett, and Teller (BET) Isotherm Equation	85
2.4.2.1	Derivation of the BET Equation	86
2.4.2.2	Applicability of the BET Equation to Active Carbons	91
2.4.2.3	Criticism of the BET Equation	92
2.4.2.4	Alternative Approach to Linearization of the BET Equation.....	93
2.4.2.5	Classification of Adsorption Isotherms	97
2.4.2.6	Type I Isotherms	100
2.4.2.7	Type II Isotherms.....	104
2.4.2.8	Type III and Type V Isotherms	105
2.4.2.9	Type IV Isotherm.....	111
2.4.3	Potential Theory of Adsorption	112
2.4.3.1	Dubinin Equation for Potential Theory.....	116
2.4.4	Freundlich Adsorption Isotherm	120
2.4.5	Temkin Adsorption Isotherm	121
2.4.5.1	Derivation of the Isotherm for a Uniform Surface	122
2.4.6	Capillary Condensation Theory	123
2.4.6.1	Evidence in Support of the Capillary Condensation Theory	124
2.4.7	Applicability of Langmuir, Freundlich or Temkin Isotherms to Adsorption Data.....	125
2.4.7.1	Linearity of the Plot	125
2.4.7.2	Variation of Heat of Adsorption (q) with Surface Coverage (θ).....	126
2.4.7.3	Appropriate Range θ	126
2.4.8	Adsorption Hysteresis	126
2.4.9	Theory of Volume Filling of Micropores (TVFM)	131
2.4.9.1	Filling of Micropore Volume in Adsorption	135
	References.....	141

Chapter 3

Activated Carbon Adsorption from Solutions.....	145
3.1 Types of Isotherms for Adsorption from Solution Phase	146
3.1.1 Preferential Adsorption	146
3.1.2 Absolute Adsorption	146
3.2 Types of Adsorption Isotherms.....	146
3.2.1 Classification of Adsorption from Solutions.....	148
3.2.2 Adsorption from Dilute Solutions	148
3.2.2.1 Potential Theory of Adsorption from Dilute Solutions	159
3.2.3 Adsorption from Solutions at Higher Concentrations (Composite Miscible Solutions)	161
3.2.3.1 Derivation of Composite Isotherm	161
3.2.3.2 Classification of Composite Isotherms.....	164
3.3 Factors Influencing Adsorption from Binary Solutions	167
3.3.1 Adsorbent-Adsorbate Interaction	168
3.3.2 Departures from Usual Composite Isotherm Shapes	179
3.3.3 Porosity of the Adsorbent	183
3.3.4 Surface Heterogeneity	183
3.3.5 Steric Effects	184
3.3.6 Orientation of Adsorbed Molecules.....	184
3.4 Determination of Individual Adsorption Isotherms from Composite Isotherms.....	185
3.5 Thickness of the Adsorbed Layer.....	189
3.6 Chemisorption from Binary Solutions.....	192
3.7 Traube's Rule	193
References.....	196

Chapter 4

Carbon Molecular Sieves.....	201
4.1 Preparation of Carbon Molecular Sieves (CMS or MSC).....	202
4.2 Characterization of Carbon Molecular Sieve Carbons.....	210
4.2.1 Characterization of Carbons by Adsorption of Organic Vapors	213
4.2.2 Characterization of Carbons by Immersional Heats of Wetting.....	222
4.3 Adsorption by Carbon Molecular Sieves	227
References.....	238

Chapter 5

Activated Carbon Adsorption Applications.....	243
5.1 Liquid Phase Applications of Activated Carbon Adsorption	244
5.1.1 Food Processing	244
5.1.2 Preparation of Alcoholic Beverages	244

5.1.3	Decolorization of Oils and Fats	245
5.1.4	Activated Carbon Adsorption in Sugar Industry	246
5.1.4.1	Decolorization with Powdered Activated Carbons	247
5.1.4.2	Decolorization with Granulated Activated Carbons	249
5.1.5	Application in Chemical and Pharmaceutical Industries	250
5.1.6	Activated Carbon for the Recovery of Gold	251
5.1.6.1	Mechanism of Gold Recovery by Activated Carbon Adsorption.....	252
5.1.6.2	Desorption of Gold from Active Carbon Surface	259
5.1.6.3	Desorption of Gold Using Inorganic Salts.....	260
5.1.6.4	Desorption of Gold by Organic Solvents.....	260
5.1.7	Purification of Electrolytic Baths	261
5.1.8	Refining of Liquid Fuels.....	263
5.2	Gas-Phase Applications.....	263
5.2.1	Recovery of Organic Solvents	263
5.2.2	Removal of Sulfur Containing Toxic Components from Exhaust Gases and Recovery of Sulfur	267
5.2.2.1	Removal of Sulfur Dioxide from Waste Gases.....	267
5.2.2.2	Removal of Hydrogen Sulfide and Carbon Disulfide.....	272
5.3	Activated Carbon Adsorption in Nuclear Technology	277
5.4	Activated Carbon Adsorption in Vacuum Technology	279
5.5	Medicinal Applications of Activated Carbon Adsorption	279
5.6	Activated Carbon Adsorption for Gas Storage.....	289
	References.....	292

Chapter 6

	Activated Carbon Adsorption and Environment: Removal of Inorganics from Water.....	297
6.1	Activated Carbon Adsorption of Inorganics from Aqueous Phase (General)	299
6.2	Activated Carbon Adsorption of Copper	304
6.2.1	Mechanism of Copper Adsorption.....	315
6.3	Activated Carbon Adsorption of Chromium	316
6.3.1	Mechanism of Adsorption of Cr(III) Ions	325
6.4	Activated Carbon Adsorption of Mercury.....	326
6.5	Adsorptive Removal of Cadmium from Aqueous Solutions.....	335
6.6	Activated Carbon Adsorption of Cobalt from Aqueous Solutions	340
6.7	Activated Carbon Adsorption of Nickel	346
6.8	Removal of Lead from Water	351
6.9	Adsorptive Removal of Zinc.....	353
6.10	Activated Carbon Adsorption of Arsenic	355
6.11	Adsorptive Separation of Cations in Trace Amounts from Aqueous Solutions.....	358

6.12 Mechanism of Metal Ion Adsorption by Activated Carbons	361
References	364

Chapter 7

Activated Carbon Adsorption and Environment: Adsorptive Removal of Organics from Water	373
7.1 Activated Carbon Adsorption of Halogenated Organic Compounds	374
7.2 Activated Carbon Adsorption of Natural Organic Matter (NOM)	383
7.3 Activated Carbon Adsorption of Phenolic Compounds	387
7.4 Adsorption of Nitro and Amino Compounds	402
7.5 Adsorption of Pesticides	411
7.6 Adsorption of Dyes	416
7.7 Activated Carbon Adsorption of Drugs and Toxins	426
7.8 Adsorption of Miscellaneous Organic Compounds	429
7.9 Mechanism of Adsorption of Organics by Activated Carbons	434
References	436

Chapter 8

Activated Carbon Adsorption and Environment: Removal of Hazardous Gases and Vapors	443
8.1 Removal of Volatile Organic Compounds at Low Concentrations	443
8.2 Removal of Oxides of Nitrogen from Flue Gases	445
8.3 Removal of Sulfur Dioxide from Flue Gases	451
8.4 Evaporated Loss Control Device (ELCD)	452
8.5 Protection of Upper Respiratory Tract in Hazardous Environment	452
8.6 Activated Carbon Adsorption of Mercury Vapors	461
8.7 Removal of Organosulfur Compounds	462
8.8 Adsorptive Removal of Miscellaneous Vapors and Gases	463
References	470
