
Table of Contents

Preface.....	ix
Contributors.....	xi
PART I: GENOME VISUALIZATION AND ANNOTATION	
1 Comparative Analysis and Visualization of Genomic Sequences Using VISTA Browser and Associated Computational Tools <i>Inna Dubchak</i>	3
2 Comparative Genomic Analysis Using the UCSC Genome Browser <i>Donna Karolchik, Gill Bejerano, Angie S. Hinrichs, Robert M. Kuhn, Webb Miller, Kate R. Rosenbloom, Ann S. Zweig, David Haussler, and W. James Kent</i>	17
3 Comparative Genome Analysis in the Integrated Microbial Genomes (IMG) System <i>Victor M. Markowitz and Nikos C. Kyrpides</i>	35
4 WebACT: An Online Genome Comparison Suite <i>James C. Abbott, David M. Aanensen, and Stephen D. Bentley</i>	57
5 GenColors: Annotation and Comparative Genomics of Prokaryotes Made Easy <i>Alessandro Romualdi, Marius Felder, Dominic Rose, Ulrike Gausmann, Markus Schilhabel, Gernot Glöckner, Matthias Platzer, and Jürgen Sühnel</i>	75
6 Comparative Microbial Genome Visualization Using GenomeViz <i>Rohit Ghai and Trinad Chakraborty</i>	97
7 BugView: A Tool for Genome Visualization and Comparison <i>David P. Leader</i>	109

- 8 CGAS: A Comparative Genome Annotation System
Kwangmin Choi, Youngik Yang, and Sun Kim 133

PART II: SEQUENCE ALIGNMENTS

- 9 BLAST QuickStart: Example-Driven Web-Based BLAST Tutorial
David Wheeler and Medha Bhagwat 149
- 10 PSI-BLAST Tutorial
Medha Bhagwat and L. Aravind 177
- 11 Organizing and Updating Whole Genome BLAST Searches with ReHAB
David J. Esteban, Aijazuddin Syed, and Chris Upton 187
- 12 Alignment of Genomic Sequences Using DIALIGN
Burkhard Morgenstern 195
- 13 An Introduction to the Lagan Alignment Toolkit
Michael Brudno 205
- 14 Aligning Multiple Whole Genomes with Mercator and MAVID
Colin N. Dewey 221
- 15 Mulan: Multiple-Sequence Alignment to Predict Functional Elements in Genomic Sequences
Gabriela G. Loots and Ivan Ovcharenko 237
- 16 Improving Pairwise Sequence Alignment between Distantly Related Proteins
Jin-an Feng 255

PART III: IDENTIFICATION OF CONSERVED SEQUENCES AND BIASES IN CODON USAGE

- 17 Discovering Sequence Motifs
Timothy L. Bailey 271
- 18 Discovery of Conserved Motifs in Promoters of Orthologous Genes in Prokaryotes
Rekin's Janky and Jacques van Helden 293
- 19 PhyME: A Software tool for Finding Motifs in Sets of Orthologous Sequences
Saurabh Sinha 309

20	Comparative Genomics-Based Orthologous Promoter Analysis Using the DoOP Database and the DoOPSearch Web Tool <i>Endre Barta</i>	319
21	Discovery of Motifs in Promoters of Coregulated Genes <i>Olivier Sand and Jacques van Helden</i>	329
22	Fastcompare: A Nonalignment Approach for Genome-Scale Discovery of DNA and mRNA Regulatory Elements Using Network-Level Conservation <i>Olivier Elemento and Saeed Tavazoie</i>	349
23	Phylogenetic Footprinting to Find Functional DNA Elements <i>Austen R. D. Ganley and Takehiko Kobayashi</i>	367
24	Detecting Regulatory Sites Using PhyloGibbs <i>Rahul Siddharthan and Erik van Nimwegen</i>	381
25	Using the Gibbs Motif Sampler for Phylogenetic Footprinting <i>William Thompson, Sean Conlan, Lee Ann McCue, and Charles E. Lawrence</i>	403
26	Web-Based Identification of Evolutionary Conserved DNA <i>cis</i> -Regulatory Elements <i>Panayiotis V. Benos, David L. Corcoran, and Eleanor Feingold</i>	425
27	Exploring Conservation of Transcription Factor Binding Sites with CONREAL <i>Eugene Berezikov, Victor Guryev, and Edwin Cuppen</i>	437
28	Computational and Statistical Methodologies for ORFeome Primary Structure Analysis <i>Gabriela Moura, Miguel Pinheiro, Adelaide Valente Freitas, José Luís Oliveira, and Manuel A. S. Santos</i>	449

PART IV: IDENTIFICATION AND STRUCTURAL CHARACTERIZATION OF NONCODING RNAs

29	Comparative Analysis of RNA Genes: The caRNAC Software <i>Hélène Touzet</i>	465
30	Efficient Annotation of Bacterial Genomes for Small, Noncoding RNAs Using the Integrative Computational Tool sRNAPredict2 <i>Jonathan Livny</i>	475

31 Methods for Multiple Alignment and Consensus Structure
Prediction of RNAs Implemented in MARNA
Sven Siebert and Rolf Backofen..... 489

32 Prediction of Structural Noncoding RNAs With RNAz
Stefan Washietl..... 503

33 RNA Consensus Structure Prediction With RNAalifold
Ivo L. Hofacker..... 527

Index..... 545

Table of Contents

Preface v
Contributors..... xi
Table of Contents—Volume 1 xv

PART I: COMPARATIVE ANALYSIS OF DOMAIN AND PROTEIN FAMILIES

1 Computational Prediction of Domain Interactions
Philipp Pagel, Normann Strack, Matthias Oesterheld, Volker Stümpflen, and Dmitrij Frishman 3

2 Domain Team: Synteny of Domains is a New Approach in Comparative Genomics
Sophie Pasek 17

3 Inference of Gene Function Based on Gene Fusion Events: The Rosetta-Stone Method
Karsten Suhre 31

4 Pfam: A Domain-Centric Method for Analyzing Proteins and Proteomes
Jaina Mistry and Robert Finn 43

5 InterPro and InterProScan: Tools for Protein Sequence Classification and Comparison
Nicola Mulder and Rolf Apweiler 59

6 Gene Annotation and Pathway Mapping in KEGG
Kiyoko F. Aoki-Kinoshita and Minoru Kanehisa..... 71

PART II: ORTHOLOGS, SYNTENY, AND GENOME EVOLUTION

7 Ortholog Detection Using the Reciprocal Smallest Distance Algorithm
Dennis P. Wall and Todd DeLuca 95

8 Finding Conserved Gene Order Across Multiple Genomes
Giulio Pavesi and Graziano Pesole..... 111

9	Analysis of Genome Rearrangement by Block-Interchanges <i>Chin Lung Lu, Ying Chih Lin, Yen Lin Huang, and Chuan Yi Tang</i>	121
10	Analyzing Patterns of Microbial Evolution Using the Mauve Genome Alignment System <i>Aaron E. Darling, Todd J. Treangen, Xavier Messeguer, and Nicole T. Perna</i>	135
11	Visualization of Syntenic Relationships With SynBrowse <i>Volker Brendel, Stefan Kurtz, and Xioakang Pan</i>	153
12	Gecko and GhostFam: Rigorous and Efficient Gene Cluster Detection in Prokaryotic Genomes <i>Thomas Schmidt and Jens Stoye</i>	165

PART III: EXPERIMENTAL ANALYSIS OF WHOLE GENOMES: ANALYSIS OF COPY NUMBER AND SEQUENCE POLYMORPHISMS

13	Genome-wide Copy Number Analysis on GeneChip® Platform Using Copy Number Analyzer for Affymetrix GeneChip 2.0 Software <i>Seishi Ogawa, Yasuhito Nanya, and Go Yamamoto</i>	185
14	Oligonucleotide Array Comparative Genomic Hybridization <i>Paul van den IJssel and Bauke Ylstra</i>	207
15	Studying Bacterial Genome Dynamics Using Microarray-Based Comparative Genomic Hybridization <i>Eduardo N. Taboada, Christian C. Luebbert, and John H. E. Nash</i>	223
16	DNA Copy Number Data Analysis Using the CGHAnalyzer Software Suite <i>Joel Greshock</i>	255
17	Microarray-Based Approach for Genome-Wide Survey of Nucleotide Polymorphisms <i>Brian W. Brunelle and Tracy L. Nicholson</i>	267
18	High-Throughput Genotyping of Single Nucleotide Polymorphisms with High Sensitivity <i>Honghua Li, Hui-Yun Wang, Xiangfeng Cui, Minjie Luo, Guohong Hu, Danielle M. Greenawalt, Irina V. Tereshchenko, James Y. Li, Yi Chu, and Richeng Gao</i>	281

19	Single Nucleotide Polymorphism Mapping Array Assay <i>Xiaofeng Zhou and David T. W. Wong</i>	295
20	Molecular Inversion Probe Assay <i>Farnaz Absalan and Mostafa Ronaghi</i>	315
21	novoSNP3: Variant Detection and Sequence Annotation in Resequencing Projects <i>Peter De Rijk and Jurgen Del-Favero</i>	331
22	Rapid Identification of Single Nucleotide Substitutions Using SeqDoC <i>Mark L. Crowe</i>	345
23	SNPHunter: A Versatile Web-Based Tool for Acquiring and Managing Single Nucleotide Polymorphisms <i>Tianhua Niu</i>	359
24	Identification of Disease Genes: Example-Driven Web-Based Tutorial <i>Medha Bhagwat</i>	371
25	Variable Number Tandem Repeat Typing of Bacteria <i>Siamak P. Yazdankhah and Bjørn-Arne Lindstedt</i>	395
26	Fluorescent Amplified Fragment Length Polymorphism Genotyping of Bacterial Species <i>Meeta Desai</i>	407
27	FLP-Mapping: A Universal, Cost-Effective, and Automatable Method for Gene Mapping <i>Knud Nairz, Peder Zipperlen, and Manuel Schneider</i>	419
	Index.....	433
