

Immunochromatographic Identification of a New Thermostable β -galactosidase from a <i>Bacillus</i> Species	79
M. Schultze	

Mass Spectrometer Monitoring of a Yeast Fermentation	82
J. C. Weaver, C. R. Perley and C. L. Cooney	

Affinity Chromatographic Investigations on Enzyme Coenzyme Complexes of Covalent Enzymes	89
B. Limbach and H. J.	

CONTENTS

KEYNOTE PAPER	1
Achievements and Predicted Developments in Enzyme Engineering	3
E. Katchalski-Katzir	
SESSION I. ENZYME PRODUCTION	31
Chairmen: R. Kula and M. Weibel	
Comparative Quantitative Physiology of High Cellulase Producing Strains of <i>Trichoderma Reesei</i>	33
D. D. Y. Ryu, R. Andreotti, J. Medeiros and M. Mandels	
Bacterial Exo-Enzyme and Exo-Toxin Export	41
E. A. Pepper, J. Melling and R. C. W. Berkeley	
Enzyme Purification by Liquid-Liquid Extraction	45
H. Hustedt, K. H. Kroner, U. Menge and M.-R. Kula	
Continuous Isolation of Yeast-Lytic Enzymes from Citophaga	49
J. A. Asenjo	
Characterization of Membranes for Enzyme Retention	57
E. Flaschel	
Cloning of the Penicillin G-Acylase Gene of <i>Escherichia coli</i> ATCC 11105 on Multicopy Plasmids	61
H. Mayer, J. Collins and F. Wagner	
Immobilized Tannin as Protein Adsorbent-Preparation, Characteristics, and Applications	71
I. Chibata, T. Tosa, T. Mori and T. Watanabe	
Aminoalkylpolysaccharide Sorbents in Purification of Enzymes	75
G. B. Gerasimiene, A. A. Glemza, D. A. Kazlauskas, D. P. Karpaviciene, V. V. Kuliene	

Immunochemical Identification of a New Thermostable β -galactosidase from a Bacillus Species	79
M. Schulein	
Mass Spectrometer Monitoring of a Yeast Fermentation.	85
J. C. Weaver, C. R. Perley and C. L. Cooney	
Affinity Chromatographic Investigations on Enzyme Coenzyme Complexes of CoA-Dependent Enzymes	89
B. Limbach and H. -L. Schmidt	
SESSION II. ENZYMES AND ENERGY TRANSDUCTION	93
Chairmen: I. V. Berezin and S. Suzuki	
Principles of Bioelectrocatalysis	95
I. V. Berezin, S. D. Varfolomeev and M. V. Lomonosov	
Cofactor Modified Electrodes for Energy Transfer.	101
L.B. Wingard, Jr.	
Immobilized Thylakoids and Chromatophores: Hydrogen Production and ATP Regeneration	109
V. Larreta Garde, M. F. Cocquempot, J. N. Barbotin, B. Thomasset and D. Thomas.	
Some Aspects of Direct Bioelectrocatalytic Regeneration of Cofactors	119
I. V. Osipov, S. D. Varfolomeev	
A New Enzyme Transducer Combination: The Enzyme Transistor.	123
B. Danielsson, K. Mosbach, I. Lundstrom, L. Stibler	
A Simple, General Method for Preparation of Hydro-Soluble Polymeric Adenine Nucleotide Coenzymes.	127
F. Le Goffic, S. Sicsic and C. Vincent	
Cofactor Reaction-Diffusion Kinetics for an Alcohol Dehydrogenase Membrane.	133
L. B. Wingard, Jr. and J. R. Millis	
Approaches to Stabilization of Hydrogenase and Nitrogenase Against Oxygen Inactivation	135
A. M. Klibanov, N. O. Kaplan and M. D. Kamen	

CONTENTS

xiii

Biochemical Energy Conversion System.	143
S. Suzuki, I. Karube, T. Matsunaga and H. Kayano	
SESSION III: BIOMASS CONVERSION	147
Chairman: G. Tsao	
Utilization of β -Glucosidase from <u>Aspergillus</u> Species in the Hydrolysis of Cellulose.	149
P. M. A. Nybergh and M. J. Bailey	
The Comparative Role of Exoglucosidase and Cellobiase in Glucose Formation from Cellulose	153
A. A. Klyosov, A. P. Sinitsyn and M. L. Rabinowitch	
Novel Enzymes from Methylophilic Microorganisms. . .	167
A. I. Laskin, C. T. Hou and R. N. Patel	
Ethanol - Butanediol Fermentation of Xylose	171
S. Veeraraghavan, Y. Y. Lee, R. P. Chambers, T. A. McCaskey	
Fluorimetric Monitoring of Methanogenesis in Anaerobic Digesters	175
E. J. Nyns, H. P. Naveau and M. J. Delafontaine	
SESSION IV: BIOMEDICAL AND ANALYTICAL APPLICATIONS OF ENZYMES AND ANTIBODIES.	177
Chairmen: M. Wilchek and P. Carr	
Enzyme Channelling Immunoassay. A New Homogeneous Enzyme Immunoassay Technique.	179
E. F. Ullman and D. J. Litman	
Human Renal Renin: Purification, Production of Specific Antibodies. Clinical Applications	187
F. X. Galen, C. Devaux, P. Sicard, T. Guyene, J. Bariety, J. Menard and P. Corvol	
Competitive Binding Studies of Carbohydrate-Lectin Interactions Using a Lectin Electrode	193
C. Borrebaeck and B. Mattiasson	
Potentiometric Enzymatic Measurement of Glucose: Possible <u>In Vivo</u> Use.	197
L. B. Wingard, Jr., S. K. Wolfson, Jr., C. C. Liu, S. J. Yao, J. G. Schiller and A. L. Drash	

Immobilized Enzyme Pipette - "Impette". P. V. Sundaram	201
Electrochemical Determination of Lipids in Serum. S. Suzuki and I. Karube	205
Immobilized Enzymes for Medical Application E. I. Chazov, V. N. Smirnov, V. P. Torchilin, I. M. Tereshin, B. V. Moskvichev	209
Photoenzography: Using Enzymes for Photographic Aims. N. F. Kazanskaya	213
The Design of Peroxide Enzyme Membrane Polarographic Sensors for Clinical and Industrial Analysis. T. A. Grooms, L. C. Clark, Jr. and B. J. Weiner	217
New Approaches Using Immobilized Enzymes for the Removal of Urea and Ammonia T. M. S. Chang	225
Enzyme-Collagen Reactor Designed from an Hemodialysis Module. P. R. Coulet, F. Paul, D. Dupret and D. C. Gautheron	231
Immobilization and Characterization of Enzymes on Hollow Fibers for a Possible Use in the Biomedical Field P. G. Pietta, D. Agnellini, G. Mazzola, G. Vecchio, S. Colombi and G. Bianchi	235
Magnetic Microspheres for Targeting of Drugs. K. Mosbach and U. Schroder	239
Modification of Enzymes with Water-Soluble Polymers I. M. Tereshin and B. V. Moskvichev	243
Detoxication of Ammonia by Immobilized Urea Cycle Enzymes Y. Miura, H. Urabe, K. Miyamoto and M. Okazaki	247
Use of the Enzyme Thermistor for Continuous Monitoring and Control in Biotechnology. B. Mattiasson, B. Danielsson and F. Winquist	251
Distribution of Damkohler Number of Spherical Matrix Particles by Image Analysis M. Sernetz, M. Chun, R. Kindt and B. Gelleri	255

On-line Determination of Reaction Rate Versus Substrate Concentration for an Enzymatically Catalysed Reaction by Means of a Microcomputer System.	259
R. Wichmann and C. Wandrey	
Microbial Sensors for Ethyl Alcohol, Acetic Acid and Ammonia	263
I. Karube and S. Suzuki	
SESSION V: LARGE-SCALE TRANSFORMATIONS USING BOUND ENZYMES.	
Chairmen: H. Samejima and W. Pitcher	267
Improved Whey Treatment by Immobilized Lactase.	269
W. Marconi, F. Bartoli, F. Morisi and A. Mariani	
Lactose Hydrolysis by Immobilized Lactase: Semi-industrial Experience	279
L. A. Dohan, J. L. Baret, S. Pain and P. Delalande	
Production of Useful Nucleotides with Immobilized Microbial Cells	295
Y. Ado, K. Kimura and H. Samejima	
Heterogeneous Biocatalysis in the Degradation of β -Glucan Polymers	305
P. Linko and Y. Y. Linko	
Absorption Into a Liquid Film in Laminar Flow Coupled with an Enzyme Catalyzed Reaction at the Solid Surface	309
J. E. Prenosil, T. Buhlmann and H. Pedersen	
Catalyst Deactivation and Optimal Operation Policy: Immobilized β -galactosidase	317
J. E. Prenosil, J. Peter and J. R. Bourne	
Stability Studies on the Immobilized Glucose Oxidase/Catalase Enzyme System.	321
R. S. Carter, J. E. Prenosil and J. R. Bourne	
Hydrodynamics and Kinetics of Hollow Fiber Enzyme Reactors.	325
J. M. Engasser, J. Caumon, A. Marc, J. Lede and M. Garnier	
Isomerase Syrups Containing Greater than 90% Fructose	329
S. A. Barker, H. A. Bowes and P. J. Somers	

SESSION VI: IMMOBILIZED CELLS AND ORGANELLES.	333
Chairmen: S. Fukui and I. Chibata	
Immobilization of Whole Microbial Cells for the Production of 6-Amino Penicillanic Acid	335
J. Klein and F. Wagner	
Application of Immobilized Biocatalysts to Bio- conversion in Hydrophobic Conditions.	347
S. Fukui, T. Omata, T. Yamane and A. Tanaka	
Alginate Bead Entrapped Yeast Cells for Continuous Inversion of Sucrose and Molasses	355
Y. Y. Linko, L. Weckstrom and P. Linko	
Physical Characterization of Biocatalyst Particles Obtained from Polymer Entrapment of Whole Cells . . .	359
J. Klein, P. Washausen, M. Kluge and H. Eng	
The Use of Free and Immobilized Cells in the Presence of Organic Solvents: The Oxidation of Cholesterol by <u>Nocardia Rhodochrous</u>	363
J. M. C. Duarte and M. D. Lilly	
Properties of Enzymes Solubilized in Hydrocarbons via Reversed Micelles	369
P. Luisi, P. Meyer and R. Wolf	
The Potential Use of Immobilized Plant Cells for the Production and Transformation of Natural Products . .	373
P. Brodelius, B. Deus, K. Mosbach and M. H. Zenk	
Immobilized Whole Cells of the Yeast <u>Trigonopsis</u> <u>variabilis</u> Containing D-Amino Acid Oxidase for the Production of α -Keto Acids.	383
P. Brodelius, B. Hagerdal and K. Mosbach	
Enzymatic Synthesis of Pantothenic Acid by <u>Escherichia</u> <u>coli</u> Cells.	389
Y. Kawabata and A. L. Demain	
Production of Useful Chemicals Using Cells Immobilized with Polyacrylamide and Carrageenan	393
I. Chibata	
Affinity Chromatographic Purification of Proteins Using Immobilized Cells	401
B. Mattiasson and M. Ramstorp	

Synthesis of Coenzymes by Immobilized Cell System . .	405
H. Yamada, S. Shimizu, Y. Tani and T. Hino	
SESSION VII: BOUND ENZYMES AND THE SYNTHESIS OF FINE	
CHEMICALS AND PHARMACEUTICALS.	
Chairmen: J. Konecny and K. Mosbach	
Continuous Deacetylation of Cephalosporins.	415
J. Konecny and M. Sieber	
Thermostability of Soluble and Immobilized Subtilisins	
After Their Modification by Dextrans and Dextrins . .	423
L. A. Nakhapetyan and V. Kh. Akparov	
Isolation and Immobilization of Porcine Ligandin	
with Glutathione Transferase Activity	427
L. Callegaro and A. Fontana	
Studies on the Stability of Soluble and Immobilized	
Alcohol Dehydrogenase from Yeast Mitochondria	431
M. J. Brougham and D. B. Johnson	
Distribution of Staphylococcal Nuclease Insolubilized	
on Sepharose.	435
J. M. Guisan, V. M. Fernandez and A. Ballesteros	
Immobilized Penicillin Acylase for Production of 6-APA	
From Penicillin-V	439
S. Gestrelus	
Preparation and Characterization of Metal Oxide-	
coated Supports for Oxidase Enzymes	443
B. R. Allen and D. J. Fink	
Enzyme Immobilization on Pyridine Containing	
Polymers.	447
F. Pittner, T. Miron, G. Pittner and M. Wilchek	
Cross-linked Pectate.	451
M. A. Vijayalakshmi, D. Picque and G. B. Broun	
Immobilization of Biocatalysts Using Ultrafiltration	
Techniques.	453
C. Wandrey, R. Wichmann, A. F. Bueckmann and	
M. R. Kula	

405	β -Galactosidase Immobilized on Benzoquinone-Activated Bead Cellulose and on Oxirane-Acrylic Beads	457
	M. Chun and M. Sernetz	
414	Application of Immobilized Carboxypeptidase Y for Deblocking in Peptide Synthesis	461
	G. P. Royer, H. Y. Hsiao and G. M. Anantharamaiah	
415	Adsorption and Distribution of Enzymes in Carriers.	465
	K. Buchholz, S. K. Duggal and A. Borchert	
423	Application of Photosensitive Immobilized α -Chymotrypsin to Synthetic Reaction.	469
	I. Karube and S. Suzuki	
APPENDIX		
	List of Participants.	473
431	Subject Index	483
432	Distribution of Staphylococcal Nuclease Immobilized on Sepharose.	
	J. M. Guisan, V. M. Fernandez and A. Baillet-Latour	
439	Immobilized Penicillin Acylase for Production of 6-APA from Penicillin-V	
	S. Gestrerius	
443	Preparation and Characterization of Metal Oxide-coated Supports for Oxidase Enzymes	
	B. R. Allen and D. J. Pisk	
447	Enzyme Immobilization on Pyridine Containing Polymers.	
	F. Pittner, T. Miron, G. Pittner and M. Wilchek	
451	Cross-linked Pectate.	
	M. A. Vijayarajakumari, D. Pique and G. B. Brown	
453	Immobilization of Biocatalysts Using Ultraviolet Techniques.	
	C. Wandrey, R. Wichmann, A. F. Beckmann and M. R. Kula
