Foreword	V
Editor's Preface and Summary	VII
List of Contributors	XIII
Suicide Substrates: Mechanism-Based Inactivators of Specific Target Enzymes (Abstract only)	
<i>Ch. Walsh</i>	1
On the Design of Transition State Analog Enzyme Inhibitors and their Future in Medicinal and Agricultural Chemistry	
<i>U. Brodbeck</i>	3
A Transition State Analogous Organophosphate Inhibitor of Carboxypeptidase A	
<i>M. Rottenberg and W. Hofmann</i>	19
Paracatalytic Self-Inactivation of Enzymes	
<i>M. Cogoli, D. Lubini and Ph. Christen</i>	27
Suicide Substrates as Irreversible Inhibitors of Flavoenzymes	
<i>S. Ghisla, A. Wenz and C. Thorpe</i>	43
Analogues of S-Adenosyl-Homocysteine as in vitro Inhibitors of Transmethylases and in vivo Inhibitors of Viral Oncogenesis and other Cellular Events	
<i>M. Robert-Géro, A. Pierre, M. Vedel, J. Enouf, F. Lawrence, A. Raies and E. Lederer</i>	61
Structural and Electronic Factors Governing the Inhibition of Cytochrome P-450- mediated Aniline Hydroxylation of Alcohols: a MO and QSAR Study	
<i>B. Testa</i>	75
Design, Biochemistry and Pharmacology of Enzyme-activated Irreversible Inhibitors of GABA-Aminotransferase	
<i>M.J. Jung</i>	85

Naphto [1,2-b]thienyl-methyl-1H-imidazoles, a New Class of Selective MAO-A-Inhibitors <i>A. Storni, B. Blattner, L. Maitre and P. Waldmeier</i>	97
Acarbose (BAY G 5421) and Homologous α -Glucosidase Inhibitors from Actinoplanaceae <i>L. Müller, B. Junge, W. Frommer, D. Schmidt and E. Truscheit</i>	109
Derivatives of Acarbose and their Inhibitory Effects on α -Glucosidases <i>B. Junge, H. Böshagen, J. Stoltefuss and L. Müller.</i>	123
Studies on the Pharmacokinetics of Acarbose in Humans <i>J. Pütter</i>	139
Treatment of Diabetes Mellitus with Acarbose <i>I. Hillebrand and P. Berchtold.</i>	153
The Inhibition and Inactivation of β -Lactamase <i>J. R. Knowles.</i>	163
Use of Padac, a Novel Chromogenic β -Lactamase Substrate, for the Detection of β -Lactamase Producing Organisms and Assay of β -Lactamase Inhibitors/Inactivators <i>P. Schindler and G. Huber</i>	169
2,4-Diamino-5-benzylpyrimidines as Inhibitors of Dihydrofolate Reductase <i>I. Kompis, R. Then, A. Wick and M. Montavon.</i>	177
2,4-Diamino-5-benzylpyrimidines as Selective Competitive Inhibitors of Bacterial Dihydrofolate Reductases <i>H. Vergin, G. B. Bishop, J. Prikryl and W. Liebenow</i>	191
Immobilisation of Nucleoside Antimetabolites on Polymer Resins and their Interaction with Adenosine Deaminase <i>F. Seela, H. Rosenmeyer and J. Ott</i>	201
Behaviour of a Chiral Deuteriofluoroacetic Acid in Enzymatic Reactions <i>R. Keck, H. Haas and J. Rétey</i>	213
Peptidyl dipeptide Carboxyhydrolase (Converting Enzyme) Inhibitors: Pharmacology and Mechanism of Action <i>Th. Unger, B. Schüll, G. Speck and D. Ganten</i>	223
Prostacyclin, Thromoxane A ₂ , Formation and Effects (Abstract only) <i>S. Moncada</i>	243

Agents Inhibiting Prostaglandin Synthesis and Inflammation:**Natural Compounds as Models**

W. Haefliger, A. Clossé and D. Hauser 245

Design and Synthesis of Reversible Inhibitors of Porcine Pancreatic and**Human Granulocyte Elastase**

(Abstract only)

C. H. Hassall, W. H. Johnson and N. A. Roberts 259

Attempts at Specific Inhibition of C3-Convertase

R. H. Andreatta, J. Rahuel, M. Wesp and P. Dukor 261

Enzyme Index 273

Inhibitor Index 275

Subject Index 279
