Preface xii

Overture by Richard H. Fleming

xiv

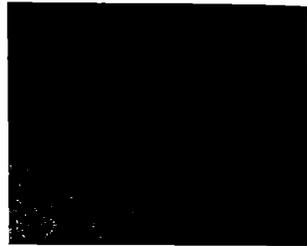

---

## **The History of Oceanography 2**

- The Early Times 4
- The Middle Ages 6
- Voyages of Discovery 7
- The Beginnings of Ocean Science 8
- The Importance of Charts and Navigational Information 9
- Science Steps Forward 11
- The *Challenger* Expedition 13
- Oceanography As Science 15
- The United States Moves into the Twentieth Century 18
- World War II 19
- Ocean Science Expands in the United States 19
- Oceanography in the Sixties, Seventies, and Eighties 20
- The Present and the Future 22

*Study Questions* 23

*Suggested Readings* 23

*Chapter*

---

## **The Water Planet 24**

- The Beginnings 26
- Origin of the Solar System 26
- The Early Planet Earth 26
- Age and Time 28
- The Age of the Earth 28
- Geologic Time 28
- Natural Time Periods 29
- The Shape of the Earth 32
- Location Systems 32
- Latitude and Longitude 32
- Chart Projections 34
- Measuring Latitude 36
- Longitude and Time 36
- Modern Navigational Techniques 37
- 1.5 Earth: The Water Planet 38
- Water on the Earth's Surface 38
- The Hydrologic Cycle 40
- Reservoirs and Residence Time 40
- Distribution of Land and Water 41
- The Oceans 42
- Box: *Satellite Oceanography* 44
- The Hypsographic Curve 47
- Summary* 48
- Key Terms* 48
- Study Questions* 48
- Study Problems* 49
- Suggested Readings* 49

## Chapter 2

### **The Sea Floor 50**

- 2.1 Bathymetry of the Sea Floor 52
    - The Continental Margin 52
    - The Ocean Basin Floor 57
    - The Ridges and Rises 59
    - The Trenches 61
  - 2.2 Measuring the Depths 61
  - 2.3 Sediments 64
    - Sediment Sources 65
    - Biogenous Oozes 66
    - Red Clay 68
    - Patterns of Deposit 68
    - Particle Size 71
    - Rates of Deposit 71
    - Sampling Methods 72
- Box: Submersibles and Remote Operating Vehicles 74*
- 2.4 Practical Considerations:
    - Seabed Resources 76
    - Sand and Gravel 76
    - Phosphorite 76
    - Sulfur 76
    - Coal 76
    - Oil and Gas 77
    - Manganese Nodules 78
    - Sulfide Mineral Deposits 79
    - Laws and Treaties 79

*Summary 79*

*Key Terms 80*

*Study Questions 80*

*Study Problems 81*

*Suggested Readings 81*

## Chapter 3

### **The Not-So-Rigid Earth 82**

- 3.1 The Interior of the Earth 84
    - Internal Layers 84
    - Evidence for the Internal Structure 85
  - 3.2 The Lithosphere 86
    - The Layers 86
    - Isostasy 87
    - The Movement of the Continents 88
    - History of a Theory 88
    - Evidence for a New Theory 89
    - Evidence for Crustal Motion 90
    - Plate Tectonics 94
    - Plate Boundaries 96
    - Rifting 98
    - Continental Margins 99
    - Driving Forces for Plate Motion 99
    - The Motion of the Plates 101
    - Rates of Motion 101
    - Hot Spots 102
    - Polar Wandering Curves 103
  - 3.3 The History of the Continents 104
    - The Breakup of Pangaea 104
- Box: Terranes 106*
- 3.4 Before Pangaea 106
  - 3.5 Current Research 110
    - Drilling Plans 110
    - Project FAMOUS 111
    - Hydrothermal Vents 111
- Box: Megaplume 114*
- 3.6 Practical Considerations: The Addition of Waste to the Sea Floor 115

*Summary 115*

*Key Terms 116*

*Study Questions 116*

*Study Problems 116*

*Suggested Readings 117*

## Chapter 4

### **The Properties of Water 118**

- 4.1 The Water Molecule 120
- 4.2 Changes of State 121
- 4.3 Heat Capacity 123
- 4.4 Cohesion, Surface Tension, and Viscosity 123
- 4.5 Compressibility 124
- 4.6 Density 124
  - The Effect of Temperature 124
  - The Effect of Salt 125
  - The Effect of Pressure 125
- 4.7 Dissolving Ability 126
- 4.8 Transmission of Energy 127
  - Heat 127
  - Light 127
  - Sound 129
- 4.9 Practical Considerations: Ice and Fog 132
  - Sea Ice 132
  - Icebergs 135
  - Fog 136

*Box: The Light from Deep-Sea Vents 137*

*Summary 138*

*Key Terms 138*

*Study Questions 139*

*Study Problems 139*

*Suggested Readings 139*

## Chapter 5

### The Salt Water 140

- 5.1 The Salts 142
    - Ocean Salinities 142
    - Dissolved Salts 143
    - Sources of Salt 145
    - Regulating the Salt Balance 145
    - Residence Time 147
    - Constant Proportions 147
    - Determining Salinity 148
  - 5.2 The Gases 148
    - The Messages in Polar Ice* 149
    - Distribution with Depth 150
    - Carbon Dioxide as a Buffer 151
    - The Carbon Dioxide Cycle 152
    - The Oxygen Balance 152
    - Measuring the Gases 152
  - 5.3 Other Substances 153
    - Nutrients 153
    - Organics 153
  - 5.4 Practical Considerations: Salt and Water 153
    - Chemical Resources 153
- Box: The Effect of Sunlight on Seawater* 155
- Desalination 155
- Summary* 158  
*Key Terms* 158  
*Study Questions* 159  
*Study Problems* 159  
*Suggested Readings* 159

## Chapter 6

### Structure of the Oceans 160

- 6.1 Heating and Cooling the Earth's Surface 162
    - The Heat Budget 162
    - Carbon Dioxide Effects 164
    - Annual Cycles of Solar Radiation 165
    - Heat Capacity 165
    - Evaporation and Precipitation Patterns 166
  - 6.2 Density Structure and Vertical Circulation 167
    - Surface Processes 167
- Box: An Atmospheric Thermostat* 168
- Changes with Depth 169
  - Density-Driven Circulation 170
  - Sigma-t 170
- 6.4 Upwelling and Downwelling 171
- 6.5 The Layered Oceans 172
    - Structure of the Atlantic Ocean 172
    - Structure of the Pacific Ocean 173
    - Structure of the Indian Ocean 173
    - Mediterranean Sea and Red Sea Water 173
    - Comparing the Oceans 173
  - 6.6 T-S Curves 175
    - T-S Curves and Water Masses 175
    - Biological Indicators 176
  - 6.7 Measurement Techniques 176
    - Water 176
    - Temperature 178
  - 6.8 Practical Considerations: Energy Sources 181
    - Salt Fountains 181
    - Osmotic Pressure 181
    - Ocean Thermal Energy Conversion 181

*Summary* 184  
*Key Terms* 184  
*Study Questions* 185  
*Suggested Readings* 185

## Chapter 7

### Winds and Currents 186

- 7.1 The Atmosphere in Motion 188
    - Winds on a Nonrotating Earth 189
    - The Effects of Rotation 189
    - Wind Bands 192
  - 7.2 Modifying the Wind Bands 193
    - Seasonal Changes 194
    - The Monsoon Effect 195
    - The Topographic Effect 197
  - 7.3 Wind-Driven Surface Currents 197
    - The Pacific Ocean Currents 198
    - The Atlantic Ocean Currents 198
    - The Indian Ocean Currents 199
    - The Ekman Spiral and Ekman Transport 199
    - Geostrophic Flow 200
    - Current Speed 200
    - Western Intensification 200
    - Formation of Eddies 201
  - 7.4 Convergence and Divergence 202
    - Permanent Zones 203
    - Seasonal Zones 203
- Box: The World Ocean Circulation Experiment* 204
- 7.5 El Niño 206
  - 7.6 Measuring the Currents 208
  - 7.7 Practical Considerations: Energy from the Currents 209
- Summary* 210  
*Key Terms* 210  
*Study Questions* 210  
*Suggested Readings* 211

**Chapter 8**

**The Waves 212**

- 8.1 How a Wave Begins 214
- 8.2 Anatomy of a Wave 215
- 8.3 Wave Motion 216
- 8.4 Wave Speed 217
- 8.5 Deep-Water Waves 217
  - Storm Centers 217
  - Swell 218
  - Dispersion 218
  - Group Speed 218
  - Wave Interaction 218
- 8.6 Wave Height 219
  - Episodic Waves 220
  - Wave Energy 222
  - Wave Steepness 222
- Box: *Universal Sea State Code* 223
- 8.7 Shallow-Water Waves 223
  - Refraction 224
  - Reflection 225
  - Diffraction 226
  - Navigation from Wave Direction 227
- 8.8 The Surf Zone 227
  - Breakers 227
  - Water Transport 228
  - Energy Release 228
- 8.9 Tsunamis 229
- 8.10 Storm Surges 230
- 8.11 Internal Waves 231
- 8.12 Standing Waves 231
- 8.13 Practical Considerations:
  - Energy from Waves 233

- Summary* 235
- Key Terms* 235
- Study Questions* 236
- Study Problems* 236
- Suggested Readings* 236

**Chapter 9**

**The Tides 238**

- 9.1 Tide Patterns 241
- 9.2 Tide Levels 241
- 9.3 Tidal Currents 242
- 9.4 Equilibrium Tidal Theory 242
  - The Moon Tide 243
  - The Tidal Day 244
  - The Tide Wave 244
  - The Sun Tide 245
  - Spring Tides and Neap Tides 245
  - Declinational Tides 247
  - Elliptical Orbits 247
  - Dynamic Tidal Analysis 247
  - The Tide Wave 248
  - Progressive Tides 249
  - Standing Wave Tides 250
  - Tide Waves in Narrow Basins 252
- 9.6 Tidal Bores 253
- 9.7 Predicting Tides and Tidal Currents 254
  - Tide Tables 255
  - Tidal Current Tables 255
- 9.8 Practical Considerations:
  - Energy from Tides 258
- Box: *Changes on a Global Scale* 262
- Summary* 264
- Key Terms* 264
- Study Questions* 264
- Study Problems* 265
- Suggested Readings* 265

**Chapter 10**

**Coasts, Shores, and Beaches 266**

- 10.1 Major Zones 268
- 10.2 Types of Coasts 270
  - Primary Coasts 270
  - Secondary Coasts 274
- Box: *Rising Sea Level* 278
- 10.3 Anatomy of a Beach 278
- 10.4 Beach Types 281
- 10.5 Beach Dynamics 282
  - Natural Processes 282
  - Coastal Circulation 284
  - Artificial Processes 286
- 10.6 Practical Considerations: Case Histories of Two Harbors 288
  - The Santa Barbara Story 288
  - The History of Ediz Hook 289
- Summary* 290
- Key Terms* 290
- Study Questions* 291
- Suggested Readings* 291

Figure 13.1

Figure 13.2

Figure 13.3

---

## **Bays and Estuaries 292**

- Estuaries 294
- Type of Estuary 294
- Circulation Patterns 296
- Temperate Zone Estuaries 297
- Embayments with High Evaporation Rates 298
- Flushing Time 298
- Use Conflicts 299
- Water Quality 299
- The Plastic Trash Problem 301
- Oil Spills 304
- Alteration of Wetlands 307
- Box* *Gang Gang Gene* 308
- Practical Considerations Case Histories 310
- The Development of San Francisco Bay 310
- The Situation in Chesapeake Bay 312
- Summary* 314
- Key Terms* 314
- Study Questions* 314
- Study Problems* 315
- Suggested Readings* 315

---

## **Oceans: Environment for Life 316**

- Buoyancy and Flotation 318
- Box* *Life at Oil and Gas Seeps*
- Osmotic Processes 319
- Temperature 320
- Pressure 320
- Gases 321
- Nutrients 321
- Light and Color 322
- Sunlight 322
- Bioluminescence 322
- Color 322
- Circulation 323
- Barriers and Boundaries 324
- Bottom Types 324
- Environmental Zones 324
- Classification of Organisms 325
- 12.13 Practical Considerations Modification and Mitigation 326
- Summary* 326
- Key Terms* 327
- Study Questions* 327
- Suggested Readings* 327

---

## **Production and Life 328**

- 13.1 Primary Production 330
- Gross and Net 330
- Standing Crop 330
- 13.2 Factors Controlling Primary Production 331
- Available Light 331
- Available Nutrients 332
- Nutrient Cycles 333
- 13.3 Global Primary Production 334
- Box* *Primary Production in Oceanic Areas*
- 13.4 Measuring Primary Production 336
- 13.5 Total Production 338
- Food Chains and Food Webs 338
- Trophic Pyramids 339
- Other Systems 342
- 13.6 Practical Considerations Human Concerns 342
- Summary* 343
- Key Terms* 344
- Study Questions* 344
- Study Problems* 345
- Suggested Readings* 345

*Chapter 14*

**The Plankton: Drifters of the Open Ocean 346**

- 14.1 The Kinds of Plankton 348
  - Phytoplankton 348
  - Zooplankton 351

*Box: A Krill-Based Ecosystem 358*

Bacteria 358

- 14.2 Classification Summary of the Plankton 359

- 14.3 Sampling the Plankton 359

- 14.4 Practical Considerations: Marine Toxins 360
  - Red Tides 360
  - Ciguatera Poisoning 362

*Summary 362*

*Key Terms 363*

*Study Questions 363*

*Suggested Readings 363*

*Chapter 15*

**The Nekton: Free Swimmers of the Sea 364**

- 15.1 The Mammals 366
  - Whales and Whaling 366
  - Dolphins and Porpoises 371

*Box: Echolocation and Communication 372*

Seals, Sea Lions, and

Waluses 373

Sea Otters 374

Sea Cows 375

Marine Mammal Protection

Act 375

The Reptiles 376

Sea Snakes 376

Sea Turtles 376

The Squid 378

The Fish 378

Sharks and Rays 380

Commercial Species of Bony

Fish 382

Deep-Sea Species of Bony

Fish 383

- 15.5 Classification Summary of the Nekton 385

- 15.6 Practical Considerations:

Commercial Fisheries 385

Anchovies 386

Tuna 386

Salmon 386

Redfish 388

Policies 388

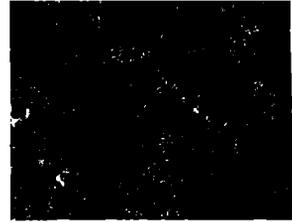

Fish Farming 389

*Summary 391*

*Key Terms 392*

*Study Questions 392*

*Suggested Readings 392*

*Chapter 16*

**The Benthos: Dwellers of the Sea Floor 394**

- 16.1 The Plants 396
  - General Characteristics of Benthic Algae 396
  - Kinds of Seaweeds 397
  - Other Plants 397

- 16.2 The Animals 399

Animals of the Rocky

Shore 399

Symbiotic Relationships 404

Tide Pools 404

Animals of the Soft

Substrates 405

The Deep Sea Floor 408

Fouling and Boring

Organisms 409

- 16.3 Classification Summary of the Benthos 410

- 16.4 The Tropical Coral Reefs 410

- 16.5 High Energy

Environments 413

- 16.6 Deep-Ocean Chemosynthetic

Communities 413

- 16.7 Sampling the Benthos 414

- 16.8 Practical Considerations:

Harvesting the Benthos 415

The Animals 415

The Algae 417

Kelp Bioconversion 417

Drugs from the Benthos 417

*Box: Genetic Manipulation of Fish and Shellfish 420*

*Summary 421*

*Key Terms 421*

*Study Questions 422*

*Suggested Readings 422*

*Appendix 423*

*Glossary 427*

*Credits 438*

*Index 440*
