

# Contents

## Preface

## PART I: MINERAL PROPERTIES AND OCCURRENCES

# 1

### Elements and Minerals

	xii	Abundance of Elements	19
		Anionic Complexes	19
		<i>Box 1.4 Chemical Formulas of Minerals</i>	21
	1	Major Elements, Minor Elements, and Trace Elements	21
		<i>Box 1.5 How To Normalize a Mineral Analysis</i>	22
		Questions for Thought	24
		Resources	24
		General References	25
	3		
	2		
		<b>Crystallization and Classification of Minerals</b>	<b>26</b>
		Crystals and Crystallization	26
		<i>Box 2.1 Pegmatites Contain the Largest Crystals</i>	28
		Crystal Imperfections: Defects	29
		Crystal Imperfections: Compositional Zoning	30
		Crystal Imperfections: Twinning	30
		Igneous Minerals	31
		<i>Box 2.2 Making Glass from Minerals</i>	32
		Minerals That Precipitate from Aqueous Solutions	33
		Metamorphic and Diagenetic Minerals	34
		Common Rocks and Minerals	35
		Life Spans of Minerals	36
		The Laws of Thermodynamics	37
		<i>Box 2.3 Scientific Laws, Theories, and Hypotheses</i>	37
		Classification of Minerals	38
		A Classified List of Minerals	40
		<i>Box 2.4 Plotting Mineral Compositions</i>	41
		Questions for Thought	43
		Resources	43
Minerals	3		
The Importance of Minerals	4		
<i>Box 1.1 The Amoco Building, Chicago</i>	4		
Elements: The Basic Building Blocks	5		
Historical Views of Elements and Matter	5		
Modern Views of Elements and Matter: A Review of Basic Chemistry	6		
Grouping of Elements and the Periodic Chart	6		
Atoms and Elements	8		
The Bohr Model	8		
Modifications to the Bohr Model	9		
Ions	10		
The Modern Periodic Table	11		
Periods	11		
Groups	13		
Atomic Number and Mass	13		
<i>Box 1.2 What Is a Mole of Quartz?</i>	14		
Bonding in Minerals	14		
<i>Box 1.3 Ionic, Covalent, and Metallic Crystals</i>	15		
Origin of the Elements and the Earth	17		
Hubble's Contributions	17		
In the Beginning	17		
The Formation of Our Solar System	18		
Abundant Elements and Minerals	18		
Goldschmidt's Classification	18		

**3****Mineral Properties: Hand Specimen Mineralogy**

## Identification of Minerals

## Mineral Appearance

Luster

Diaphaneity

Color

Streak

Luminescence

Play of Colors

## Crystal Shape

*Box 3.1 What's Wrong With This Picture?*

## Strength and Breaking of Minerals

Tenacity

*Box 3.2 Asbestiform Minerals and Health Risks*

Fracture, Cleavage, and Parting

Hardness

*Box 3.3 Hard and Soft Minerals*

## Density and Specific Gravity

## Magnetism of Minerals

## Electrical Properties

*Box 3.4 What Is a Pycnometer?*

## Reaction to Dilute Hydrochloric Acid

## Other Properties

## Questions for Thought

## Resources

	Interaction of Light and Crystals	73
	Double Refraction	73
	Crystals Between Crossed Polars	75
	Interference Colors	75
	Uniaxial and Biaxial Minerals	75
<b>45</b>		
45	<i>Box 4.3 Determining the Extinction Angle and the Sign of Elongation</i>	78
46	Accessory Plates and the Sign of Elongation	80
46	Uniaxial Interference Figures	80
47	Biaxial Interference Figures	80
48	<i>Box 4.4 Obtaining an Interference Figure</i>	81
48	<i>Box 4.5 Determining the Optic Sign of a Uniaxial Mineral</i>	81
48	Other Mineral Characteristics	82
49	in Thin Sections	83
50	Cleavage	83
50	Twining	83
52	<i>Box 4.6 The Four Kinds of Oriented Biaxial Interference Figures</i>	84
53	<i>Box 4.7 Determining Sign and 2V from a Bxa Figure</i>	86
55	<i>Box 4.8 Determining Sign and 2V from an Optic Axis Figure</i>	87
56	Questions for Thought	87
57	Resources	87

**5****Igneous Rocks and Silicate Minerals**

		88
	Magmas and Igneous Rocks	88
	Compositions of Igneous Rocks	89
	Mafic and Silicic Magmas	89
	Volatiles	89
<b>63</b>		
64	<i>Box 5.1 Compositions of Magmas Producing Igneous Rocks (oxide wt. %)</i>	90
64	Crystallization of Magmas	90
64	Equilibrium Between Crystals and Melt	90
65	Bowen's Reaction Series	91
65	Disequilibrium	93
67	Silicate Minerals	93
67	SiO <sub>2</sub> Polymorphs	93
67	<i>Box 5.2 Experimental Petrology and Phase Diagrams</i>	95
69	Feldspar Group	96
70	<i>Box 5.3 How to Use Triangular Diagrams</i>	97
70	<i>Box 5.4 Miscibility Gaps</i>	99
71	<i>Box 5.5 The Plagioclase Phase Diagram and Fractional Crystallization</i>	100
72	Feldspathoid Group	102

**4****Optical Mineralogy**

## What Is Light?

The Properties of Light

*Box 4.1 Optical Classification of Minerals*

Interference

## Polarization of Light and the

Polarizing Microscope

Polarized Light

Polarizing Microscopes

*Box 4.2 Identifying Minerals*

With a Polarizing Microscope

Colors in Plane Polarized (PP) Light and Crossed Polarized (XP) Light

## The Velocity of Light in Crystals

and the Refractive Index

Snell's Law and Light Refraction

Relief and Becke Lines

Mica Group	102	Questions for Thought	132
Chain Silicates	102	Resources	132
Pyroxene Group	103		
Amphibole Group	106		
<i>Box 5.6 Diopside-Enstatite Solvus and Geothermometry</i>	107		
Olivine Group	109		
Other Minerals in Igneous Rocks	109		
The Naming of Igneous Rocks	110		
Simple Classification Scheme	110		
Mineral Modes	110		
Common Types of Igneous Rock	110		
Silicic Igneous Rocks (>20% Quartz)	110		
Intermediate and Mafic Igneous Rocks (0–20% Quartz)	112		
Ultramafic Igneous Rocks	114		
<i>Box 5.7 Minerals from the Moon</i>	115		
Questions for Thought	115		
Resources	116		
<b>6</b>			
<b>Sedimentary Minerals and Sedimentary Rocks</b>	<b>117</b>		
Weathering	118		
Transportation, Deposition, and Lithification	120		
Sedimentary Minerals	120		
Silicates	120		
Clay Minerals	120		
<i>Box 6.1 Zeolites</i>	121		
Carbonate Minerals	123		
<i>Box 6.2 Clays Used in Industry, Arts, and Ceramics</i>	123		
<i>Box 6.3 Lime Kilns, Mortar, and Cement</i>	123		
Sulfate Minerals	124		
Halides	126		
Chert	126		
Common Sedimentary Rocks	127		
Detrital Sedimentary Rocks	127		
<i>Box 6.4 Gypsum: Ingredient of Plaster and Sheetrock</i>	128		
Chemical Sedimentary Rocks	128		
<i>Box 6.5 Disposal of Radioactive Waste in Salt Domes</i>	129		
<i>Box 6.6 Did the Mediterranean Sea Repeatedly Dry up in the Past?</i>	130		
Other Chemical Sedimentary Rocks	130		
<i>Box 6.7 Iron Formation</i>	131		
Diagenesis	131		
<i>Box 6.8 Laterites and Bauxites</i>	131		
<b>7</b>			
<b>Metamorphic Minerals and Metamorphic Rocks</b>	<b>133</b>		
The Causes of Metamorphism	133		
<i>Box 7.1 Extremes of Metamorphism</i>	135		
Metamorphic Textures	136		
Metamorphic Minerals	137		
Metamorphic Facies	138		
Some Common Types of Metamorphic Rock	140		
Metamorphosed Pelitic Rocks (Metapelites)	140		
Metamorphosed Psammitic Rocks (Metapsammites)	142		
Metamorphosed Mafic Rocks (Metabasites)	142		
Metamorphosed Limestones and Dolostones (Marbles)	142		
Metamorphosed Ultramafic Rocks and Iron Formations	144		
Metamorphosed Granitic Rocks	144		
High-Pressure Rocks	145		
Metamorphic Reactions	145		
Equilibrium	146		
<i>Box 7.2 Examples of Metamorphic Reactions</i>	146		
<i>Box 7.3 Thermodynamic Laws and Definitions</i>	147		
Metamorphic Phase Diagrams and the Phase Rule	148		
The Thermodynamics of Reactions	149		
The Gibbs Free Energy	149		
Changes in Gibbs Energy With Pressure and Temperature	151		
<i>Box 7.4 Using Phase Diagrams To Interpret Rocks</i>	152		
Questions for Thought	153		
Resources	154		
<b>8</b>			
<b>Ore Deposits and Economic Minerals</b>	<b>155</b>		
Mineral Use and Profitability	155		
Types of Ore Deposits	157		
Magmatic Ore Deposits	158		
Hydrothermal Ore Deposits	158		

<b>Box 8.1 Strategic Minerals and Metals</b>	
Sedimentary Ore Deposits	159
Ore Minerals	160
Native Elements: Metals, Semimetals, and Nonmetals	160
<b>Box 8.2 The Witwatersrand Gold Deposits</b>	
Sulfides and Sulfosalts	162
Oxides and Hydroxides	164
<b>Box 8.3 Another Look at the Phase Rule and Cu-Fe Sulfide Minerals</b>	
Gems and Gem Minerals	164
Synthetic Gems and Color Alteration	167
<b>Box 8.4 The World's Major Diamond Producers</b>	
Cutting and Polishing Gems	167
<b>Box 8.5 Mining, the Environment, and Politics</b>	
Questions for Thought	168
Resources	170
<b>PART II: SYMMETRY, CRYSTALLOGRAPHY, AND ATOMIC STRUCTURE</b>	
<b>9</b>	
<b>Crystal Morphology and Symmetry</b>	
Symmetry	173
Mirror Planes	175
Rotational Symmetry	175
Inversion Centers	177
Symmetry Is a Property	178
Stereo Diagrams	180
Symmetry on Stereo Diagrams	180
Special Points and General Points	181
Rotoinversion	182
Combinations of Symmetry	184
Elements: Point Groups	185
Special Angles and General Angles	187
Forms and Crystal Morphology	187
Forms	187
<i>Box 9.1 Proper Rotation Axes and Stereo Diagrams</i>	188
<i>Box 9.2 Rotation Axes With Perpendicular Mirror Planes</i>	190
<i>Box 9.3 Rotoinversion and Stereo Diagrams</i>	191
Combinations of Forms	192
<i>Box 9.4 Names of the Most Important Forms</i>	194
<b>10</b>	
<b>Crystallography</b>	
Observations in Seventeenth and Eighteenth Centuries	206
Unit Cells and Lattices in Two Dimensions	208
Shapes of Unit Cells in Two Dimensions	208
Motifs and Lattices	210
<i>Box 10.1 Choices of a Unit Cell</i>	212
Symmetry of the Motif and the Lattice	212
Unit Cells and Lattices in Three Dimensions	215
What Shapes Are Possible?	215
<i>Box 10.2 Lattices and Vectors in Two Dimensions</i>	216
Cells With Extra Lattice Points	218
<i>Box 10.3 Vectors and Space Lattices</i>	220
Bravais Lattices	221
Unit Cell Symmetry and Crystal Symmetry	222
Point Groups and Crystal Systems	225
Symmetry of Three-Dimensional Crystal Structures	229
Space Group Operators	229
Screw Axes	229
Glide Planes	230
Space Groups	230
Crystal Habit and Crystal Faces	232
<i>Box 10.4 Why Are There Only 230 Space Groups?</i>	233
Questions for Thought	236
Resources	236
<b>11</b>	
<b>Unit Cells, Points, Lines, and Planes</b>	
Unit Cell Parameters and Crystallographic Axes	237
The Composition of Unit Cells	240

Points in Unit Cells	240	Ionic Crystals	271
Lines and Directions in Crystals	242	Ionic Radii	272
Planes in Crystals	242	Coordination Number	274
Miller Indices	244	Closest Packing	274
Crystal Forms and the Miller Index	245	Packing in Two Dimensions	274
General Forms and Special Forms	246	Packing in Three Dimensions	275
<i>Box 11.1 The Miller Indices of Planes Within a Crystal Structure</i>	246	Exceptions to Closest Packing	275
Zones and Zone Axes	247	Pauling's Rules	277
<i>Box 11.2 Comparison of a Hexoctahedron With Other Forms in the Cubic System</i>	249	Pauling's Rule 1	277
Questions for Thought	250	<i>Box 13.1 Why Are They Called Hexagonal Closest Packed (HCP) and Cubic Closest Packed (CCP)?</i>	278
Resources	250	<i>Box 13.2 Pauling's Rules</i>	279
<b>12</b>	<b>251</b>	<i>Box 13.3 Who Was Linus Pauling?</i>	280
<b>X-ray Diffraction</b>		Pauling's Rule 2	281
What Are X Rays?	252	Pauling's Rule 3	282
<i>Box 12.1 X-ray Tube</i>	253	Pauling's Rule 4	282
Interactions of X Rays and Atoms	253	Pauling's Rule 5	282
Interference of X-ray Waves	254	Oxygen and Other Common Elements	282
Diffraction by a Row of Atoms	254	Silicate Structures in General	284
Planes of Atoms	255	Elemental Substitutions in Silicates	286
The Distance Between Planes in Crystals	256	Structures of the Basic Silicate Subclasses	287
Diffraction by Planes of Atoms	256	Framework Silicates	287
<i>Box 12.2 Cell Parameters and d-values</i>	256	Sheet Silicates	288
Intensity of Diffraction	257	Chain Silicates	288
Diffraction at Different Angles	257	Ring Silicates	289
Extinctions	259	Paired Tetrahedral Silicates	289
Single Crystal Diffraction	259	Isolated Tetrahedral Silicates	290
Routine X-ray Analyses	260	Structures and Chemistry of Nonsilicates	291
Powder Diffraction	260	Questions for Thought	293
Identifying Minerals from	263	Resources	293
Powder Patterns	263		
<i>Box 12.3 Example of Data from the Powder Diffraction File Data Set</i>	265	<b>PART III: MINERAL DESCRIPTIONS</b>	<b>295</b>
<i>Box 12.4 Identification of Minerals from X-ray Patterns the Old Way</i>	267		
Indexing Patterns and Determining Cell Parameters	268	<b>14</b>	
<i>Box 12.5 Indexing a Garnet Pattern and Determining a</i>	268		
Questions for Thought	269	<b>Descriptions of Minerals</b>	<b>297</b>
Resources	270	Framework Silicates	298
<b>13</b>		Sheet Silicates	312
<b>Atomic Structure</b>		Chain Silicates	321
The Impact of X-ray Crystallography	271	Ring Silicates	331
	271	Isolated Tetrahedral Silicates	332
		Paired Tetrahedral Silicates	344
		Native Elements	346
		Sulfides	350
		Halides	361

Oxides	364	<b>Appendix D: Minerals Ordered by Birefringence and Interference Colors in Thin Section</b>
Hydroxides	372	
Carbonates and Nitrates	376	
Borates	384	
Sulfates	387	<b>Appendix E: Minerals Ordered by Hardness</b>
Tungstates, Molybdates, and Chromates	391	
Phosphates, Vanadates, and Arsenates	393	
<b>Appendix A: Classified List of Minerals</b>	<b>401</b>	<b>Appendix F: Minerals Ordered by Specific Gravity</b>
<b>Appendix B: Mineral Identification Tables</b>	<b>406</b>	<b>Glossary</b>
<b>Appendix C: Minerals Separated by Optic System and Sign, and Ordered by Index of Refraction</b>	<b>431</b>	<b>Mineral Index and List of Mineral Properties</b>
		<b>Subject Index</b>
