

CONTENTS OVERVIEW

UNIT I THE EARTH: ITS ORIGIN, INTERNAL PROCESSES, AND MINERALS **I**

- 1. Geology and the Earth **2**
- 2. Plate Tectonics: A First Look **18**
- 3. Minerals **40**

UNIT II ROCKS **65**

- 4. Igneous Rocks **66**
- 5. Plutons and Volcanoes **86**
- 6. Weathering and Soil **110**
- 7. Sedimentary Rocks **132**
- 8. Metamorphic Rocks **152**
- 9. Geologic Time: A Story in the Rocks **168**

UNIT III AN ACTIVE EARTH **189**

- 10. Earthquakes and the Earth's Structure **190**
- 11. Ocean Basins **220**
- 12. Geologic Structures, Mountain Ranges, and Continents **244**

UNIT IV SURFACE PROCESSES **269**

- 13. Mass Wasting **270**
- 14. Fresh Water: Streams and Lakes **286**
- 15. Fresh Water: Ground Water and Wetlands **318**
- 16. Deserts **346**
- 17. Glaciers and Ice Ages **366**
- 18. Coastlines **390**

UNIT V SPECIAL TOPICS IN GEOLOGY **416**

- 19. Geologic Resources **418**
- 20. Geology and Climate Change **446**
- 21. The Geological Evolution of North America **471**
- 22. Planets and Their Moons **496**

CONTENTS

UNIT I

THE EARTH: ITS ORIGIN, INTERNAL PROCESSES, AND MINERALS I

1. GEOLOGY AND THE EARTH 2

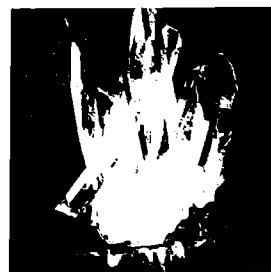

- 1.1 The Science of Geology 4
- 1.2 Uniformitarianism and Catastrophism 6
- 1.3 Geologic Time 9
- 1.4 The Earth's Origin 9
- 1.5 Geologic Change and the Environment 14
- Focus On** Hypothesis, Theory, and Law 10

2. PLATE TECTONICS: A FIRST LOOK 15

- 2.1 An Overview of Plate Tectonics 20
- 2.2 The Earth's Layers 20
- 2.3 Plates and Plate Tectonics 24
- 2.4 The Anatomy of a Tectonic Plate 27
- 2.5 Consequences of Moving Plates 28
- 2.6 The Search for a Mechanism 30
- 2.7 Supercontinents 36
- 2.8 Isostasy: Vertical Movement of the Lithosphere 36
- Focus On** Alfred Wegener and the Origin of an Idea 32

3. MINERALS 40

- 3.1 What Is a Mineral? 42
- 3.2 Elements, Atoms, and the Chemical Composition of Minerals 42
- 3.3 Crystals: The Crystalline Nature of Minerals 44
- 3.4 Physical Properties of Minerals 45
- 3.5 Rock-Forming Minerals, Accessory Minerals, Gems, Ore Minerals, and Industrial Minerals 52
- 3.6 Mineral Classification 53
- 3.7 Ionic Substitution 58
- Focus On** Chemical Bonds 46
- Focus On** Crystals: Geometric Perfection in Nature 49
- Focus On** Asbestos and Cancer 59

UNIT II

ROCKS 65

4. IGNEOUS ROCKS 66

- 4.1 Rocks and the Rock Cycle 68
- 4.2 Igneous Rocks: The Origins of Magma 69
- 4.3 Classification of Igneous Rocks 74
- 4.4 Common Igneous Rocks 78
- 4.5 Partial Melting and the Origins of Common Igneous Rocks 80
- Focus On** Rocks and Radon 76
- Focus On** Cooling and Crystallization of Magma: Bowen's Experiment 81
- Focus On** Terms Commonly Used by Geologists 71
- Focus On** Pegmatites 79

5. PLUTONS AND VOLCANOES 86

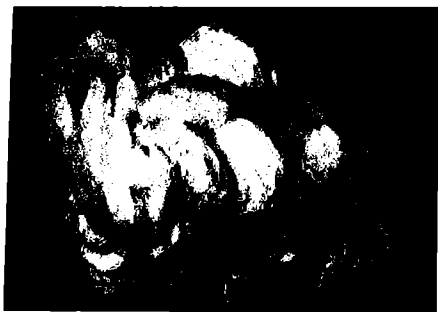

- 5.1 The Behavior of Magma 88
- 5.2 Plutons 89
- 5.3 Volcanic Rocks and Volcanoes 92
- 5.4 Violent Magma: Ash-Flow Tuffs and Calderas 100
- 5.5 Risk Assessment: Predicting Volcanic Eruptions 103
- Focus On** Historical Volcanic Eruptions 104
- Focus On** Sills and Lava Flows 93

6. WEATHERING AND SOIL 110

- 6.1 Weathering 112
- 6.2 Mechanical Weathering 113
- 6.3 Chemical Weathering 115
- 6.4 Chemical and Mechanical Weathering Operating Together 119
- 6.5 Soil 121
- 6.6 Soil Nutrients 123
- 6.7 Soil Forming Factors 123
- Focus On** Acid Rain 117
- Focus On** Representative Reactions in Chemical Weathering 116
- Focus On** Tropical Rainforests 126

7. SEDIMENTARY ROCKS 132

- 7.1 Types of Sedimentary Rocks 134
- 7.2 Clastic Sedimentary Rocks 134
- 7.3 Organic Sedimentary Rocks 139
- 7.4 Chemical Sedimentary Rocks 140
- 7.5 Bioclastic Rocks 141

- 7.6 Sedimentary Structures 142
- 7.7 Interpreting Sedimentary Rocks: Depositional Environments 145
- CASE STUDY: Torrey Pines Bluff--San Diego County, California 147
- Focus On** Naming Sedimentary Rock Units 136

8. METAMORPHIC ROCKS 152

- 8.1 Mineral Stability and Metamorphism 154
- 8.2 Metamorphic Changes 154
- 8.3 Types of Metamorphism and Metamorphic Rocks 157
- 8.4 Measuring Metamorphic Grade 164
- Focus On** Metamorphism: The One-Way Path 163

9. GEOLOGIC TIME: A STORY IN THE ROCKS 168

- 9.1 Geologic Time 170
- 9.2 Relative Geologic Time 170
- 9.3 Unconformities 172
- 9.4 Fossils and Faunal Succession 174
- 9.5 Correlation 177
- 9.6 Absolute Geologic Time 178
- 9.7 The Geologic Column and Time Scale 182
- Focus On** Relative Time Interpretation 174
- Focus On** Fossil DNA 176
- Focus On** Carbon-14 Dating 181

UNIT III

AN ACTIVE EARTH 189

10. EARTHQUAKES AND THE EARTH'S STRUCTURE 190

- 10.1 What Is an Earthquake? 192
- 10.2 Earthquake Waves 194
- 10.3 Earthquake Damage 200
- 10.4 Earthquakes and Tectonic Plate Boundaries 203
- CASE STUDY: The Northridge Earthquake of January 1994 204
- CASE STUDY: The Kobe Earthquake: Japan 206
- CASE STUDY: Earthquake Activity in the Pacific Northwest 207
- 10.5 Earthquake Prediction 208
- 10.6 Studying the Earth's Interior 210
- 10.7 The Earth's Magnetism 214
- Focus On** Deep Earthquakes 210
- Focus On** Fine Detail of the Earth's Interior: Seismic Tomography 213

11. OCEAN BASINS 220

- 11.1 The Earth's Oceans 222
- 11.2 Studying the Sea Floor 222
- 11.3 Sea-Floor Magnetism 224
- 11.4 The Mid-Oceanic Ridge 225

- 11.5 Sediment and Rocks of the Deep Sea Floor 230
- 11.6 Continental Margins 231
- 11.7 Island Arcs 235
- 11.8 Seamounts and Oceanic Islands 237
- 11.9 Geologic Resources of the Sea Floor 238
- Focus On** Life in the Sea 240
- Focus On** Global Sea-Level Changes and the Mid-Oceanic Ridge 229

12. GEOLOGIC STRUCTURES, MOUNTAIN RANGES, AND CONTINENTS 244

► GEOLOGIC STRUCTURES 246

- 12.1 Rock Deformation 246
- 12.2 Geologic Structures 247

► MOUNTAIN RANGES AND CONTINENTS 255

- 12.3 Mountains and Mountain Ranges 255
- 12.4 Island Arcs: Mountain Building During Convergence Between Two Oceanic Plates 256
- 12.5 The Andes: Subduction at a Continental Margin 256
- 12.6 The Himalayan Mountain Chain: A Collision Between Continents 259
- 12.7 The Origin of Continents 262

UNIT IV

SURFACE PROCESSES 269

13. MASS WASTING 270

- 13.1 Mass Wasting 272
- 13.2 Factors that Control Mass Wasting 272
- 13.3 Types of Mass Wasting 274
- CASE STUDY: Permafrost and the Alaska Pipeline 278
- CASE STUDY: Rock Avalanche near Kelly, Wyoming 280
- 13.4 Three Case Studies: Mass Wasting Triggered by Earthquakes and Volcanic Eruptions 280
- 13.5 Predicting and Avoiding Landslides 283
- CASE STUDY: Lost Trail Pass, Montana 283

14. FRESH WATER: STREAMS AND LAKES 286

- 14.1 The Water Cycle 288
- 14.2 Streams 288
- 14.3 Stream Erosion 289
- 14.4 Stream Deposits 292
- 14.5 Downcutting and Base Level 297
- 14.6 Drainage Basins 302
- 14.7 Floods 304

- CASE STUDY:** Flood Control and the 1993 Mississippi River Floods 306
- 14.8 Dams 308
- 14.9 Lakes 310
- Focus On** Stream Velocity and Erosion 293
- 15. FRESH WATER: GROUND WATER AND WETLANDS 318**
- 15.1 Characteristics of Ground Water 320
- 15.2 Movement of Ground Water 322
- 15.3 Use of Ground Water 323
- CASE STUDY:** The High Plains and the Ogallala Aquifer 325
- 15.4 Ground Water Pollution 328
- CASE STUDY:** Love Canal 328
- CASE STUDY:** Remediation: The Lapari Landfill, Pitman, New Jersey 333
- 15.5 Ground Water and Nuclear Waste Disposal 334
- CASE STUDY:** The Yucca Mountain Repository 334
- 15.6 Caverns and Karst Topography 335
- 15.7 Hot Springs and Geysers 338
- 15.8 Geothermal Energy 339
- 15.9 Wetlands 340
- Focus On** Sewage and Septic Systems 329
- 16. DESERTS 346**
- 16.1 Why Do Deserts Exist? 348
- 16.2 Desert Landforms 351
- 16.3 Two Desert Landscapes in the United States 354
- 16.4 Wind in Deserts 356
- 16.5 Changing Deserts 362
- Focus On** Wind Erosion: The Dust Bowl 358
- 17. GLACIERS AND ICE AGES 366**
- 17.1 Formation of Glaciers 368
- 17.2 Glacial Movement 369
- CASE STUDY:** The Hubbard Glacier Surge in 1986 370
- 17.3 Glacial Erosion 374
- 17.4 Glacial Deposits 378
- 17.5 The Pleistocene Ice Age 383
- CASE STUDY:** Pleistocene Glaciers and the Great Lakes 386

18. COASTLINES 390

- 18.1 Waves, Tides, and Currents 392
- 18.2 The Water's Edge 396
- 18.3 Emergent and Submergent Coastlines 397
- 18.4 Sandy and Rocky Coastlines 399
- CASE STUDY: Chesapeake Bay 403
- 18.5 Development of Coastlines 403
- CASE STUDY: Long Island 403
- CASE STUDY: The Mississippi Delta 404
- CASE STUDY: San Diego County 407
- 18.6 Coastal Development and Public Policy 408
- 18.7 Global Warming and Sea-Level Rise 409

UNIT V

SPECIAL TOPICS IN GEOLOGY 416

19. GEOLOGIC RESOURCES 418

- 19.1 Geologic Resources 418
- 19.2 Nonmetallic Mineral Resources 418
- 19.3 Metals and Ore 418
- 19.4 How Ore Forms 420
- 19.5 Mineral Reserves 425
- 19.6 Coal 426
- 19.7 Mines and Mining 428
- 19.8 Petroleum and Natural Gas 431
- 19.9 Nuclear Fuels and Reactors 435
- 19.10 Energy Strategies for the United States 439
- 19.11 Alternative Energy Resources 440
- Focus On** The 1872 Mining Law 430

20. GEOLOGY AND CLIMATE CHANGE 446

- 20.1 Measuring Climate Change 448
- 20.2 Climate Change in Earth History 450
- 20.3 Modeling the Earth's Climate 453
- 20.4 Changes in Atmospheric Composition 455
- 20.5 Tectonics and Climate Change 460
- 20.6 Astronomical Causes of Climate Change 462
- 20.7 Industrial Activity and Climate Change 466
- Focus On** Depletion of the Ozone Layer 463

21. THE GEOLOGICAL EVOLUTION OF NORTH AMERICA 471

- 21.1 The North American Continent 476
- 21.2 The Craton 476
- 21.3 North America: 2 Billion Years Ago 477
- 21.4 North America: 1 Billion Years Ago 478
- 21.5 North America: One-Half Billion Years Ago 478
- 21.6 Breakup of Pangea III 481
- 21.7 Building of the Western Mountains 483
- 21.8 The Pleistocene Ice Age and the Arrival of Humans in North America 490

Focus On The Laramide Orogeny 491

22. PLANETS AND THEIR MOONS 496

- 22.1 Mercury: A Planet the Size of the Moon 498
- 22.2 Venus: The Greenhouse Planet 498
- 22.3 The Moon: Our Nearest Neighbor 502
- 22.4 Mars: A Search for Extraterrestrial Life 504
- 22.5 Jupiter: A Star That Failed 507
- 22.6 Saturn: The Ringed Giant 512
- 22.7 Uranus and Neptune: Distant Giants 513
- 22.8 Pluto: The Ice Dwarf 514
- 22.9 Asteroids, Meteoroids, and Comets 515

Focus On Extraterrestrial Life 508

APPENDIX A IDENTIFYING COMMON MINERALS

APPENDIX B SYSTEMS OF MEASUREMENT

APPENDIX C THE ELEMENTS

INTERNATIONAL TABLE OF ATOMIC WEIGHTS

APPENDIX D ROCK SYMBOLS

GLOSSARY GL-I
