

# BRIEF CONTENTS

Preface xvii

Introduction xxi

- 1** Introduction to Planet “Earth” 1
- 2** Plate Tectonics and the Ocean Floor 34
- 3** Marine Provinces 72
- 4** Marine Sediments 98
- 5** Water and Seawater 130
- 6** Air-Sea Interaction 166
- 7** Ocean Circulation 202
- 8** Waves and Water Dynamics 244
- 9** Tides 276
- 10** The Coast: Beaches and Shoreline Processes 300
- 11** The Coastal Ocean 328
- 12** Marine Life and the Marine Environment 360
- 13** Biological Productivity and Energy Transfer 386
- 14** Animals of the Pelagic Environment 422
- 15** Animals of the Benthic Environment 452

Afterword 484

Appendices 487

- I Metric and English Units Compared* 487
- II Geographic Locations* 490
- III Latitude and Longitude on Earth* 492
- IV A Chemical Background: Why Water Has 2 H's and 1 O* 494
- V Careers in Oceanography* 497

Glossary 501

Credits and Acknowledgments 519

Index 524

What's New in This Edition? xviii

The New Instructional Package xviii

Acknowledgments xix

Introduction xxi

**Key Questions** xxi

1.1 What Is Oceanography? xxiii

1.2 How Are Earth's Oceans Unique? xxiv

1.3 What Is Rational Use of Technology? xxiv

## 1 INTRODUCTION TO PLANET "EARTH" 1

**Key Questions** 1

1.1 How Many Oceans Exist on Earth? 1

*The Four Principal Oceans, Plus One 1*

*Oceans versus Seas: What Are the Seven Seas? 3*

*Comparing the Oceans to the Continents 3*

1.2 How Was Early Exploration of the Oceans Achieved? 4

*Early History 4*

**BOX 1.1** Voyages to Inner Space: Visiting the Deep Ocean Floor in Submersibles 5

*The Middle Ages 7*

**BOX 1.2** How Do Sailors Know Where They Are at Sea?: From Stick Charts to Satellites 8

*The Age of Discovery in Europe 9*

*The Beginning of Voyaging for Science 11*

*History of Oceanography ... To Be Continued 12*

**BOX 1.3** The Bermuda Triangle: Fact or Fiction? 12

1.3 What Is the Nature of Scientific Inquiry? 13

*Observations 13*

*Hypothesis 13*

*Testing 13*

*Theory 14*

*Theories and the Truth 14*

1.4 How Were Earth and the Solar System Created? 15

*The Nebular Hypothesis 15*

*Protoearth 17*

*Density and Density Stratification 17*

*Earth's Internal Structure 18*

1.5 How Were Earth's Atmosphere and Oceans Created? 21

*Origin of Earth's Atmosphere 21*

*Origin of Earth's Oceans 22*

1.6 Did Life Begin in the Oceans? 22

*The Importance of Oxygen to Life 23*

*Stanley Miller's Experiment 23*

*Evolution and Natural Selection 24*

**BOX 1.4** Charles Darwin and the Voyage of HMS *Beagle* 25

*Plants and Animals Evolve 26*

1.7 How Old Is Earth? 28

*Radiometric Age Dating 29*

*The Geologic Time Scale 29*

**BOX 1.5** "Deep" Time 30

Chapter in Review 32

Key Terms 32

Review Questions 33

Critical Thinking Exercises 33

Oceanography on the Web 33

## 2 PLATE TECTONICS AND THE OCEAN FLOOR 34

**Key Questions** 34

2.1 What Evidence Supports Continental Drift? 36

*Fit of the Continents 36*

*Matching Sequences of Rocks and Mountain Chains 37*

*Glacial Ages and Other Climate Evidence 37*

*Distribution of Organisms 38*

*Objections to the Continental Drift Model 38*

2.2 What Evidence Supports Plate Tectonics? 40

*Earth's Magnetic Field and Paleomagnetism 40*

**BOX 2.1** Do Sea Turtles (and Other Animals) Use Earth's Magnetic Field for Navigation? 42

- Sea Floor Spreading and Features of the Ocean Basins* 43
- Other Evidence from the Ocean Basins* 45
- The Acceptance of a Theory* 49
- 2.3 **What Features Occur at Plate Boundaries?** 50
  - Divergent Boundary Features* 51
  - Convergent Boundary Features* 55
- BOX 2.2 The NEPTUNE Project: An Interactive Sea Floor Observatory** 57
  - Transform Boundary Features* 59
- 2.4 **Testing the Model: What Are Some Applications of Plate Tectonics?** 60
  - Hotspots and Mantle Plumes* 60
  - Seamounts and Tablemounts* 63
  - Coral Reef Development* 63
  - Detecting Plate Motion with Satellites* 65
- 2.5 **How Has Earth Changed in the Past ... And How Will It Look in the Future?** 65
  - The Past: Paleogeography* 65
  - The Future: Some Bold Predictions* 66
- 2.6 **Plate Tectonics ... To Be Continued** 68
  - Chapter in Review 70
  - Key Terms 70
  - Review Questions 71
  - Critical Thinking Exercises 71
  - Oceanography on the Web 71

## 3 MARINE PROVINCES 72

### Key Questions 72

- 3.1 **What Techniques Are Used to Determine Ocean Bathymetry?** 72
  - Soundings* 74
  - Echo Soundings* 74

#### **BOX 3.1 Sea Floor Mapping from Space** 76

- Seismic Reflection Profiles* 78
- 3.2 **What Does Earth's Hypsographic Curve Reveal?** 78
- 3.3 **What Features Exist on Continental Margins?** 80
  - Passive versus Active Continental Margins* 80
  - Continental Shelf* 81
  - Continental Slope* 82
  - Submarine Canyons and Turbidity Currents* 83
  - Continental Rise* 84

#### **BOX 3.2 Experiments in Underwater Living** 85

- BOX 3.3 A Grand "Break": Evidence for Turbidity Currents** 86
- 3.4 **What Features Exist in the Deep-Ocean Basins?** 86
  - Abyssal Plains* 87
  - Volcanic Peaks of the Abyssal Plains* 87

#### **BOX 3.4 Run Silent, Run Deep... Run into a Seamount?** 88

- Ocean Trenches and Volcanic Arcs* 88
- 3.5 **What Features Exist along the Mid-Ocean Ridge?** 91
  - Volcanic Features* 92

- Hydrothermal Vents* 93
- Fracture Zones and Transform Faults* 94
- Chapter in Review 96
- Key Terms 96
- Review Questions 97
- Critical Thinking Exercises 97
- Oceanography on the Web 97

## 4 MARINE SEDIMENTS 98

### Key Questions 98

- 4.1 **What Is Lithogenous Sediment?** 101
  - Origin* 101
  - Composition* 102
  - Sediment Texture* 102
  - Distribution* 105
- 4.2 **What Is Biogenous Sediment?** 107
  - Origin* 106
  - Composition* 106

#### **BOX 4.1 Diatoms: The Most Important Things You Have (Probably) Never Heard Of** 109

- Distribution* 109
- 4.3 **What Is Hydrogenous Sediment?** 115
  - Origin* 115
  - Composition and Distribution* 115

#### **BOX 4.2 When a Sea Was Dry: Clues from the Mediterranean** 117

- 4.4 **What Is Cosmogenous Sediment?** 117
  - Origin, Composition, and Distribution* 117

#### **BOX 4.3 When the Dinosaurs Died: The Cretaceous-Tertiary (K-T) Event** 118

- 4.5 **What Mixtures of Sediment Exist?** 120
- 4.6 **A Summary: How Are Pelagic and Neritic Deposits Distributed?** 120

<i>Neritic Deposits</i>	120
<i>Pelagic Deposits</i>	121
<i>How Sea Floor Sediments Represent Surface Conditions</i>	122
<i>Worldwide Thickness of Marine Sediments</i>	122
<b>4.7</b> What Events Are Revealed by Sea Floor Sediments?	123
<b>BOX 4.4</b> Collecting the Historical Record of the Deep-Ocean Floor	124
<b>4.8</b> What Resources Do Ocean Sediments Provide?	125
<i>Energy Resources</i>	125
<i>Other Resources</i>	126
Chapter in Review	128
Key Terms	128
Review Questions	129
Critical Thinking Exercises	129
Oceanography on the Web	129

<b>BOX 5.3</b> The Hot and Cold about OTEC Systems	157
<b>5.8</b> What Methods Are Used to Desalinate Seawater?	158
<i>Distillation</i>	158
<i>Membrane Processes</i>	159
<i>Other Methods of Desalination</i>	159
Chapter in Review	160
Key Terms	160
Review Questions	161
Critical Thinking Exercises	161
Oceanography on the Web	161

## 5 WATER AND SEAWATER 130

### Key Questions 130

<b>5.1</b> Why Does Water Have Such Unusual Chemical Properties?	130
<i>Atomic Structure</i>	130
<i>The Water Molecule</i>	132
<b>5.2</b> What Other Important Properties Does Water Possess?	134
<i>Water's Thermal Properties</i>	134
<i>Water Density</i>	138
<b>5.3</b> How Salty Is Seawater?	140
<i>Salinity</i>	140
<i>Determining Salinity</i>	142

### BOX 5.1 How to Avoid Goiters 143

### BOX 5.2 The HMS Challenger Expedition: Birth of Oceanography 144

<i>Comparing Pure Water and Seawater</i>	145
<b>5.4</b> Why Does Seawater Salinity Vary?	146
<i>Salinity Variations</i>	146
<i>Processes Affecting Seawater Salinity</i>	147
<i>Dissolved Components Added and Removed from Seawater</i>	149
<b>5.5</b> Is Seawater Acidic or Basic?	150
<i>The pH Scale</i>	151
<i>The Carbonate Buffering System</i>	151
<i>Recent Increase in Ocean Acidity</i>	152
<b>5.6</b> How Does Seawater Salinity Vary at the Surface and with Depth?	153
<i>Surface Salinity Variation</i>	153
<i>Salinity Variation with Depth</i>	154
<i>Halocline</i>	154
<b>5.7</b> How Does Seawater Density Vary with Depth?	155
<i>Factors Affecting Seawater Density</i>	155
<i>Density Variation with Depth</i>	156
<i>Pycnocline and Thermocline</i>	156

## 6 AIR-SEA INTERACTION 162

### Key Questions 162

<b>6.1</b> What Causes Earth's Seasons?	164
<b>6.2</b> How Does Uneven Solar Heating Affect Earth?	165
<i>Distribution of Solar Energy</i>	165
<i>Oceanic Heat Flow</i>	166
<b>6.3</b> What Physical Properties Does the Atmosphere Possess?	167
<i>Composition</i>	167
<i>Temperature</i>	167
<i>Density</i>	167
<i>Water Vapor Content</i>	167
<i>Pressure</i>	168
<i>Movement</i>	168
<i>An Example: A Nonspinning Earth</i>	169
<b>6.4</b> How Does the Coriolis Effect Influence Moving Objects?	169
<i>Example 1: Perspectives and Frames of Reference on a Merry-Go-Round</i>	170
<i>Example 2: A Tale of Two Missiles</i>	170
<i>Changes in the Coriolis Effect with Latitude</i>	171
<b>6.5</b> What Global Atmospheric Circulation Patterns Exist?	172

- Circulation Cells* 172
- Pressure* 172
- Wind Belts* 174
- Boundaries* 174
- Circulation Cells: Idealized or Real?* 174

**BOX 6.1** Why Christopher Columbus Never Set Foot on North America 176

- 6.6 What Weather and Climate Patterns Does the Ocean Exhibit? 177
- Weather versus Climate* 177
- Winds* 177
- Storms and Fronts* 178
- Tropical Cyclones (Hurricanes)* 179

**BOX 6.2** The Record-Breaking 2005 Atlantic Hurricane Season: Hurricanes Katrina, Rita, and Wilma 181

- The Ocean's Climate Patterns* 186
- 6.7 How Do Sea Ice and Icebergs Form? 187
- Formation of Sea Ice* 187
- Formation of Icebergs* 189
- 6.8 What Causes the Atmosphere's Greenhouse Effect? 190

**BOX 6.3** RMS *Titanic*: Lost (1912) and Found (1985) 191

- Earth's Heat Budget and Changes in Wavelength* 192
- Which Gases Contribute to the Greenhouse Effect?* 192
- What Changes Will Occur as a Result of Increased Global Warming?* 194
- What Should Be Done to Reduce Greenhouse Gases?* 195
- 6.9 Can Power from the Wind Be Harnessed as a Source of Energy? 198

**BOX 6.4** The ATOC Experiment: SOFAR So Good? 199

- Chapter in Review 200
- Key Terms 200
- Review Questions 201
- Critical Thinking Exercises 201
- Oceanography on the Web 201

## 7 OCEAN CIRCULATION 202

### Key Questions 202

- 7.1 How Are Ocean Currents Measured? 204
- Surface Current Measurement* 204
- Deep Current Measurement* 204

**BOX 7.1** Running Shoes as Drift Meters: Just Do It 206

- 7.2 How Are Ocean Surface Currents Organized? 207
- Origin of Surface Currents* 207
- Main Components of Ocean Surface Circulation* 208
- Other Factors Affecting Ocean Surface Circulation* 210

**BOX 7.2** The Voyage of the *Fram*: A 1000-Mile Journey Locked in Ice 212

- Ocean Currents and Climate* 215

- 7.3 What Causes Upwelling and Downwelling? 216
- Diverging Surface Water* 217
- Converging Surface Water* 217
- Coastal Upwelling and Downwelling* 217
- Other Causes of Upwelling* 222
- 7.4 What Are the Main Surface Circulation Patterns in Each Ocean? 218
- Antarctic Circulation* 218
- Atlantic Ocean Circulation* 219

**BOX 7.3** Benjamin Franklin: The World's Most Famous Physical Oceanographer 224

- Indian Ocean Circulation* 225
- Pacific Ocean Circulation* 227

**BOX 7.4** El Niño and the Incredible Shrinking Marine Iguanas of the Galápagos Islands 232

- 7.5 What Deep-Ocean Currents Exist? 236
- Origin of Thermohaline Circulation* 236
- Sources of Deep Water* 236
- Worldwide Deep-Water Circulation* 238
- 7.6 Can Power from Currents Be Harnessed as a Source of Energy? 240
- Chapter in Review 241
- Key Terms 242
- Review Questions 242
- Critical Thinking Exercises 243
- Oceanography on the Web 243

## 8 WAVES AND WATER DYNAMICS 244

### Key Questions 244

- 8.1 What Causes Waves? 246
- 8.2 How Do Waves Move? 247
- 8.3 What Characteristics Do Waves Possess? 249
- Wave Terminology* 249

*Circular Orbital Motion* 249  
*Deep-Water Waves* 250  
*Shallow-Water Waves* 251  
*Transitional Waves* 251

**8.4** How Do Wind-Generated Waves Develop? 252  
*Wave Development* 252  
*Interference Patterns* 257

**BOX 8.1** Rogue Waves: Ships Beware! 258

**8.5** How Do Waves Change in the Surf Zone? 258  
*Physical Changes as Waves Approach Shore* 258  
*Breakers and Surfing* 260  
*Wave Refraction* 261  
*Wave Reflection* 263

**8.6** How Are Tsunami Created? 264

**BOX 8.2** The Biggest Wave in Recorded History: Lituya Bay, Alaska (1958) 266  
*Coastal Effects* 267  
*Some Examples of Historic Tsunami* 267  
*Tsunami Warning System* 269

**BOX 8.3** Waves of Destruction: The 2004 Indian Ocean Tsunami 270

**8.7** Can Power from Waves Be Harnessed as a Source of Energy? 272  
*LIMPET 500: An Example of a Wave Power Plant* 273  
*Global Coastal Wave Energy Resources* 273

Chapter in Review 274  
Key Terms 274  
Review Questions 275  
Critical Thinking Exercises 275  
Oceanography on the Web 275

**9 TIDES 276**

**Key Questions** 276

**9.1** What Causes the Tides? 278  
*Tide-Generating Forces* 278  
*Tidal Bulges: The Moon's Effect* 281  
*Tidal Bulges: The Sun's Effect* 282  
*Earth's Rotation and the Tides* 282

**9.2** How Do Tides Vary during a Monthly Tidal Cycle? 282  
*The Monthly Tidal Cycle* 282  
*Complicating Factors* 284  
*Idealized Tide Prediction* 285

**9.3** What Do Tides Really Look Like in the Ocean? 287  
*Amphidromic Points and Cotidal Lines* 287  
*Effect of the Continents* 288  
*Other Considerations* 288

**9.4** What Types of Tidal Patterns Exist? 288  
*Diurnal Tidal Pattern* 288  
*Semidiurnal Tidal Pattern* 288  
*Mixed Tidal Pattern* 289

**9.5** What Tidal Phenomena Occur in Coastal Regions? 290  
*An Example of Tidal Extremes: The Bay of Fundy* 291

**9.6** Can Tidal Power Be Harnessed as a Source of Energy? 296  
*Tidal Power Plants* 296

Chapter in Review 298  
Key Terms 298  
Review Questions 299  
Critical Thinking Exercises 299  
Oceanography on the Web 299

## 10 THE COAST: BEACHES AND SHORELINE PROCESSES 300

**Key Questions** 300

**10.1** How Are Coastal Regions Defined? 300  
*Beach Terminology* 300  
*Beach Composition* 302

**10.2** How Does Sand Move on the Beach? 302  
*Movement Perpendicular to Shoreline* 303  
*Movement Parallel to Shoreline* 303

**10.3** What Features Exist along Erosional and Depositional Shores? 305  
*Features of Erosional Shores* 305

**BOX 10.1** Warning: Rip Currents ... Do You Know What to Do? 306  
*Features of Depositional Shores* 307

**10.4** How Do Changes in Sea Level Produce Emerging and Submerging Shorelines? 312  
*Features of Emerging Shorelines* 313  
*Features of Submerging Shorelines* 313

*Changes in Sea Level* 313  
 10.5 What Characteristics Do U.S. Coasts Exhibit? 316  
*The Atlantic Coast* 317  
*The Gulf Coast* 318  
*The Pacific Coast* 318  
 10.6 What Is Hard Stabilization? 319  
*Groins and Groin Fields* 320  
*Jetties* 320  
*Breakwaters* 321  
*Seawalls* 322  
 10.7 What Alternatives to Hard Stabilization Exist? 323  
*Construction Restrictions* 323  
*Beach Replenishment* 323  
*Relocation* 323  
**BOX 10.2** The Move of the Century: Relocating the Cape Hatteras Lighthouse 325  
 Chapter in Review 326  
 Key Terms 326  
 Review Questions 327  
 Critical Thinking Exercises 327  
 Oceanography on the Web 327

Review Questions 359  
 Critical Thinking Exercises 359  
 Oceanography on the Web 359

## 11 THE COASTAL OCEAN 328

**Key Questions** 328  
 11.1 What Laws Govern Ocean Ownership? 330  
*Mare Liberum and the Territorial Sea* 330  
*Law of the Sea* 330  
 11.2 What Characteristics Do Coastal Waters Exhibit? 331  
*Salinity* 331  
*Temperature* 332  
*Coastal Geostrophic Currents* 332  
 11.3 What Types of Coastal Waters Exist? 333  
*Estuaries* 334  
*Coastal Wetlands* 337  
*Lagoons* 340  
*Marginal Seas* 341  
 11.4 What Is Pollution? 342  
*Marine Pollution: A Definition* 342  
*Standard Laboratory Bioassay* 343  
*The Issue of Waste Disposal in the Ocean* 343  
 11.5 What Are the Main Types of Marine Pollution? 343  
*Petroleum* 344  
**BOX 11.1** The *Exxon Valdez* Oil Spill: Not the Worst Spill Ever 346  
*Sewage Sludge* 350  
*DDT and PCBs* 351  
*Mercury and Minamata Disease* 353  
*Non-Point-Source Pollution and Trash* 354  
**BOX 11.2** From A to Z in Plastics: The Miracle Substance? 357  
 Chapter in Review 358  
 Key Terms 358

## 12 MARINE LIFE AND THE MARINE ENVIRONMENT 360

**Key Questions** 360  
 12.1 What Are Living Things and How Are They Classified? 360  
*A Working Definition of Life* 362  
*The Three Domains of Life* 362  
*The Five Kingdoms of Organisms* 362  
*Taxonomic Classification* 364  
 12.2 How Are Marine Organisms Classified? 364  
*Plankton (Floaters)* 365  
*Nekton (Swimmers)* 366  
*Benthos (Bottom Dwellers)* 366  
 12.3 How Many Marine Species Exist? 369  
*Why Are There So Few Marine Species?* 369  
*Species in Pelagic and Benthic Environments* 369  
 12.4 How Are Marine Organisms Adapted for the Physical Conditions of the Ocean? 370  
*Need for Physical Support* 370  
*Water's Viscosity* 370  
**BOX 12.1** Alexander Agassiz: Advancements in Ocean Sampling 371  
*Temperature* 372  
*Salinity* 374  
*Dissolved Gases* 375  
*Water's High Transparency* 376  
**BOX 12.2** A False Bottom: The Deep Scattering Layer (DSL) 377  
*Pressure* 378  
 12.5 What Are the Main Divisions of the Marine Environment? 379  
*Pelagic (Open Sea) Environment* 379

**BOX 12.3** Diving into the Marine Environment 380*Benthic (Sea Bottom) Environment* 383

Chapter in Review 384

Key Terms 384

Review Questions 385

Critical Thinking Exercises 385

Oceanography on the Web 385

## Review Questions 421

Critical Thinking Exercises 421

Oceanography on the Web 421

## 13 BIOLOGICAL PRODUCTIVITY AND ENERGY TRANSFER 386

**Key Questions** 386

13.1 What Is Primary Productivity? 386

*Measurement of Primary Productivity* 388*Factors Affecting Primary Productivity* 389*Light Transmission in Ocean Water* 390*Why Are the Margins of the Oceans So Rich in Life?* 392

13.2 What Kinds of Photosynthetic Marine Organisms Exist? 394

*Seed-Bearing Plants (Anthophyta)* 394*Macroscopic (Large) Algae* 394*Microscopic (Small) Algae* 397**BOX 13.1** Red Tides: Was Alfred Hitchcock's *The Birds* Based on Fact? 398**BOX 13.2** *Pfiesteria*: A Morphing Peril to Fish and Humans 400*Photosynthetic Bacteria* 401

13.3 How Does Regional Primary Productivity Vary? 401

*Productivity in Polar Oceans* 402*Productivity in Tropical Oceans* 403*Productivity in Temperate Oceans* 404*Comparing Regional Productivity* 405**BOX 13.3** Ocean Eutrophication and the Dead Zone 406

13.4 How Are Energy and Nutrients Passed Along in Marine Ecosystems? 406

*Flow of Energy in Marine Ecosystems* 407*Flow of Nutrients in Marine Ecosystems* 407

13.5 What Oceanic Feeding Relationships Exist? 408

*Feeding Strategies* 408*Trophic Levels* 408*Transfer Efficiency* 409*Food Chains, Food Webs, and the Biomass Pyramid* 410*Symbiosis* 412

13.6 What Issues Affect Marine Fisheries? 413

*Marine Ecosystems and Fisheries* 413*Overfishing* 413*Incidental Catch* 414*Fisheries Management* 415**BOX 13.4** A Case Study in Fisheries Mismanagement: The Peruvian Anchoveta Fishery 416*Seafood Choices* 419

Chapter in Review 420

Key Terms 420

## ANIMALS OF THE PELAGIC ENVIRONMENT 422

**Key Questions** 422

14.1 How Are Marine Organisms Able to Stay above the Ocean Floor? 422

*Use of Gas Containers* 424*Ability to Float* 424*Ability to Swim* 425*The Diversity of Planktonic Animals* 425**BOX 14.1** Some Myths (and Facts) about Sharks 429

14.2 What Adaptations Do Pelagic Organisms Possess for Seeking Prey? 430

*Mobility: Lungers versus Cruisers* 430*Swimming Speed* 431*Cold-Blooded versus Warm-Blooded Organisms* 431*Adaptations of Deep-Water Nekton* 432

14.3 What Adaptations Do Pelagic Organisms Possess to Avoid Being Prey? 433

*Schooling* 433*Other Adaptations* 434

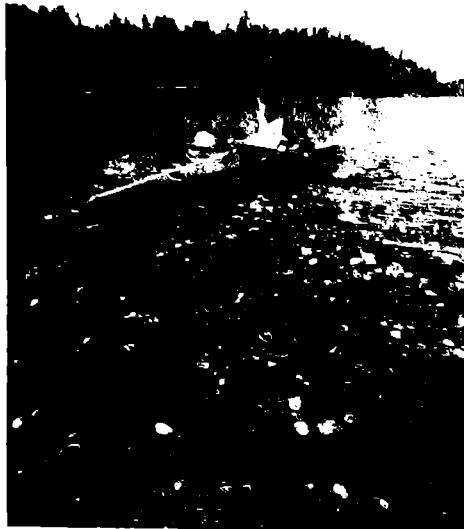

14.4 What Characteristics Do Marine Mammals Possess? 434

*Mammalian Characteristics* 435*Order Carnivora* 435*Order Sirenia* 436*Order Cetacea* 437**BOX 14.2** Killer Whales: A Reputation Deserved? 447

14.5 An Example of Migration: Why Do Gray Whales Migrate? 447

*Migration Route* 447*Reasons for Migration* 448

<i>Timing of Migration</i>	448
<i>Gray Whales as Endangered Species</i>	449
Chapter in Review	450
Key Terms	450
Review Questions	451
Critical Thinking Exercises	451
Oceanography on the Web	451

## 15 ANIMALS OF THE BENTHIC ENVIRONMENT 452

### Key Questions 452

15.1 How Are Benthic Organisms Distributed?	452
15.2 What Communities Exist along Rocky Shores?	454
<i>Intertidal Zonation</i>	454
<i>The Spray (Supratidal) Zone: Organisms and Their Adaptations</i>	455
<i>The High Tide Zone: Organisms and Their Adaptations</i>	458
<i>The Middle Tide Zone: Organisms and Their Adaptations</i>	458
<i>The Low Tide Zone: Organisms and Their Adaptations</i>	460
15.3 What Communities Exist along Sediment-Covered Shores?	461
<i>Physical Environment of the Sediment</i>	461
<i>Intertidal Zonation</i>	462
<i>Sandy Beaches: Organisms and Their Adaptations</i>	462
<i>Mud Flats: Organisms and Their Adaptations</i>	464
15.4 What Communities Exist on the Shallow Offshore Ocean Floor?	464
<i>Rocky Bottoms (Subtidal): Organisms and Their Adaptations</i>	464
<i>Coral Reefs: Organisms and Their Adaptations</i>	467
<b>BOX 15.1</b> How White I Am: Coral Bleaching and Other Diseases	468
15.5 What Communities Exist on the Deep-Ocean Floor?	472

### BOX 15.2 The Great Debate on Life in the Deep Ocean: The Rosses versus Edward Forbes and His Azoic Theory 473

<i>The Physical Environment</i>	474
<i>Food Sources and Species Diversity</i>	474

### BOX 15.3 How Long Would Your Remains Remain on the Sea Floor? 475

<i>Deep-Sea Hydrothermal Vent Biocommunities: Organisms and Their Adaptations</i>	475
<i>Low-Temperature Seep Biocommunities: Organisms and Their Adaptations</i>	479
<i>The Deep Biosphere: A New Frontier</i>	481

### Chapter in Review 482

### Key Terms 482

### Review Questions 483
