## Preface vii

1. Introduction to Descriptive Physical Oceanography 1
2. Ocean Dimensions, Shapes, and Bottom Materials 7
3. Physical Properties of Seawater 29
4. Typical Distributions of Water Characteristics 67
5. Mass, Salt, and Heat Budgets and Wind Forcing 111
6. Data Analysis Concepts and Observational Methods 147
7. Dynamical Processes for Descriptive Ocean Circulation 187
8. Gravity Waves, Tides, and Coastal Oceanography 223
9. Atlantic Ocean 245
10. Pacific Ocean 303

11. Indian Ocean 363
12. Arctic Ocean and Nordic Seas 401
13. Southern Ocean 437
14. Global Circulation and Water Properties 473

## References 513

## Index 545

## Supplementary Materials

<http://booksite.academicpress.com/DPO>

- S1. Brief History of Physical Oceanography
- S7. Dynamical Processes for Descriptive Ocean Circulation (Expanded Version)
- S8. Estuaries, Coral Reefs, and Adjacent Seas
- S15. Climate and the Oceans
- S16. Instruments and Methods

Supplementary Figures for many chapters
