

Table of Contents

I: Theory of Conjugated Polymers

1. On the Transport, Optical, and Self-Assembly Properties of π -Conjugated Materials: A Combined Theoretical/Experimental Insight..... 1-3
David Beljonne, Jérôme Cornil, Veaceslav Coropceanu, Demetrio A. da Silva Filho, Victor Geskin, Roberto Lazzaroni, Philippe Leclère, and Jean-Luc Brédas
2. Theoretical Studies of Electron–Lattice Dynamics in Organic Systems 2-1
Sven Stafström

II: Synthesis and Classes of Conjugated Polymers

3. Helical Polyacetylene Synthesized in Chiral Nematic Liquid Crystal 3-3
Kazuo Akagi
4. Synthesis and Properties of Poly(arylene vinylene)s 4-1
Andrew C. Grimsdale and Andrew B. Holmes
5. Blue-Emitting Poly(*para*-Phenylene)-Type Polymers 5-1
Emil Jachim Wolfgang List and Ullrich Scherf
6. Poly(*para*Phenyleneethynylene)s and Poly(aryleneethynylenes): Materials with a Bright Future..... 6-1
Uwe H.F. Bunz
7. Polyaniline Nanofibers: Syntheses, Properties, and Applications..... 7-1
Jiaying Huang and Richard B. Kaner
8. Recent Advances in Polypyrrole 8-1
Seung Hyun Cho, Ki Tae Song, and Jun Young Lee
9. Regioregular Polythiophenes 9-1
Malika Jeffries-El and Richard D. McCullough
10. Poly(3,4-Ethylenedioxythiophene)—Scientific Importance, Remarkable Properties, and Applications 10-1
Stephan Kirchmeyer, Knud Reuter, and Jill C. Simpson

11. Thienothiophenes: From Monomers to Polymers	11-1
<i>Gregory A. Sotzing, Venkataramanan Seshadri, and Francis J. Waller</i>	
12. Low Bandgap Conducting Polymers	12-1
<i>Seth C. Rasmussen and Martin Pomerantz</i>	
13. Advanced Functional Polythiophenes Based on Tailored Precursors.....	13-1
<i>Philippe Blanchard, Philippe Leriche, Pierre Frère, and Jean Roncali</i>	
14. Structure–Property Relationships and Applications of Conjugated Polyelectrolytes	14-1
<i>Kirk S. Schanze and Xiaoyong Zhao</i>	

III: Properties and Characterization of Conjugated Polymers

15. Insulator–Metal Transition and Metallic State in Conducting Polymers	15-3
<i>Arthur J. Epstein</i>	
16. One-Dimensional Charge Transport in Conducting Polymer Nanofibers.....	16-1
<i>A.N. Aleshin and Y.W. Park</i>	
17. Structure Studies of π- and σ-Conjugated Polymers	17-1
<i>Michael J. Winokur</i>	
18. Electrochemistry of Conducting Polymers.....	18-1
<i>P. Audebert and Fabien Miomandre</i>	
19. Internal Fields and Electrode Interfaces in Organic Semiconductor Devices: Noninvasive Investigations via Electroabsorption	19-1
<i>Thomas M. Brown and Franco Cacialli</i>	
20. Electrochromism of Conjugated Conducting Polymers.....	20-1
<i>Aubrey L. Dyer and John R. Reynolds</i>	
21. Photoelectron Spectroscopy of Conjugated Polymers.....	21-1
<i>M.P. de Jong, G. Greczynski, W. Osikowicz, R. Friedlein, X. Crispin, M. Fahlman, and W.R. Salaneck</i>	
22. Ultrafast Exciton Dynamics and Laser Action in π-Conjugated Semiconductors.....	22-1
<i>Z. Valy Vardeny and O. Korovyanko</i>
