

# CONTENTS

## REVIEW ARTICLES

List of contributors	vii
On the current understanding of somaclonal variation <i>Angela Karp</i>	1
Biology and molecular biology of starch synthesis and its regulation <i>Jack Preiss</i>	59
Chromatin structure of plant genes <i>Rosalind E. Slatter and John C. Gray</i>	115
Shikimate pathway: why does it mean so much to so many? <i>Bijay K. Singh, Daniel L. Siehl and James A. Connelly</i>	143
Genetic analysis of leaf development <i>Sarah Hake and Neelima Sinha</i>	187
Nuclear RNA splicing and small nuclear RNAs and their genes in higher plants <i>Gregory J. Goodall, Tamás Kiss and Witold Filipowicz</i>	255
Cellular and molecular biology of pathogenesis related proteins <i>Y. Eyal and R. Fluhr</i>	223
Insight to replication strategies and evolution of (+) strand RNA viruses provided by Brome Mosaic Virus <i>Loren E. Marsh, Gregory P. Pogue, Clayton C. Huntley and Timothy C. Hall</i>	297
