

Contents

Contributors	vi
Preface	vii
1. Principles and Instrumentation	1
<i>Alan T. Marshall</i>	
2. Preparation of Specimens:	
Changes in Chemical Integrity	65
<i>A. John Morgan</i>	
3. Frozen-Hydrated Bulk Specimens	167
<i>Alan T. Marshall</i>	
4. Frozen-Hydrated Sections	197
<i>Alan T. Marshall</i>	
5. Sections of Freeze-Substituted Specimens	207
<i>Alan T. Marshall</i>	
6. Influence of Specimen Topography on Microanalysis	241
<i>F. D. Hess</i>	
7. The Skeletal Muscle	263
<i>Michael Sjöström</i>	
8. Liquid Droplets and Isolated Cells	307
<i>Joseph V. Bonventre, Kristina Blouch, and Claude Lechene</i>	
9. Quantitative X-Ray Microanalysis of Bulk Specimens	367
<i>F. Duane Ingram and Mary Jo Ingram</i>	
10. Quantitative X-Ray Microanalysis of Thin Sections	401
<i>Godfried M. Roomans</i>	
Author Index	455
Subject Index	467
