Preface

What is Microbiology? <i>R. Y. Stanier</i>	1/1
Form and Function – I. Bacteria <i>R. G. E. Murray</i>	2/1
Form and Function – II. Fungi <i>C. Booth</i>	3/1
Form and Function – III. Viruses <i>D. Watson</i>	4/1
Form and Function – IV. Protozoa <i>C. R. Curds and C. G. Ogden</i>	5/1
The Chemistry and Composition of Microorganisms <i>P. Meadow</i>	6/1
Dynamics of Microbial Growth <i>D. W. Tempest</i>	7/1
Intermediary Metabolism <i>P. H. Clarke</i>	8/1
Classification of Microorganisms <i>P. H. A. Sneath</i>	9/1
Identification of Microorganisms <i>P. H. A. Sneath</i>	10/1
The Genetic Organization of Bacteria and its Expression <i>M. H. Richmond</i>	11/1
Interactions between Phage and Bacteria <i>D. Kay</i>	12/1
The Determinants of Microbial Pathogenicity <i>H. Smith</i>	13/1

Resistant Forms	14/1
<i>R. Slepecky</i>	
Symbiosis in the Microbial World	15/1
<i>D. C. Smith</i>	
Bacterial Nutrition	16/1
<i>R. Whittenbury</i>	
Subject Index	SI/1
