

Table of contents

Abbreviations	11
Executive summary	13
Chapter 1. A framework for city-level water management	17
Introduction	19
Water-related risks to cities in OECD countries	19
Ageing infrastructure	26
Institutional changes affecting urban water governance	31
A framework for urban water management	34
Clustering cities and policy responses to water management	40
<i>Annex 1.A1. Two city typologies relevant to water management.</i>	48
References	50
Chapter 2. Financing urban water management	55
Introduction	57
Financing constraints in cities in OECD countries	57
Options to minimise costs	64
Water tariffs contribute to water resource management	69
Diversified revenue streams	73
A role for private investors	78
<i>Annex 2.A1. Financing urban water management in Korea.</i>	85
References	89
Chapter 3. Supporting the diffusion of innovative pathways for urban water management	93
Introduction	95
Opportunities for disruptive technical innovations	95
The benefits of non-technical innovations	104
Barriers to the diffusion of innovation for urban water management	109
Overcoming barriers to innovative urban water management	113
References	115
Chapter 4. Urban-rural co-operation for water management	119
Introduction	121
Managing competition between urban and rural areas to access water	123
Mitigating flood risks in urban areas	134
Water quality standards and PES	136
Implementation issues	141
References	146
Chapter 5. Governance for urban water management	151
Preliminary remark	153
Governance challenges to urban water management	153

Governance arrangements for urban water management	162
<i>Annex 5.A1. Characterisation of respondents to the OECD Survey on urban water governance</i>	172
<i>Annex 5.A2. Regulators who responded to the OECD survey on the Governance of Water Regulators</i> ...	174
<i>Annex 5.A3. Typology of regulatory functions for WSS</i>	175
References	176
Glossary	177
