

Table of contents

Executive summary.....	15
<i>Introduction.....</i>	17
OECD activities on novel food and feed safety	17
The emergence of the concept of consensus documents	18
Background and principles surrounding the use of consensus documents.....	18
The process through which consensus documents are prepared	20
Current and future trends.....	20
References and additional reading	22
Part I Towards harmonised assessments for food and feed safety.....	23
<i>Chapter 1 Animal feedstuffs derived from genetically modified plants</i>	25
Summary	26
Scope and purpose.....	28
Genetically modified plants used as animal feed	29
Assessment of genetically modified feedstuffs	32
Fate of DNA and protein in animal feeding	33
Animal feeding studies as part of a safety assessment	38
Post-market surveillance/monitoring	41
By-products of industrial crops	42
Agronomic versus quality traits: Future genetically modified feedstuffs	43
Current legislative process applied to genetically modified feed.....	44
References	44
<i>Chapter 2 Unique Identifier for transgenic plants</i>	51
OECD guidance on the Unique Identifier for transgenic plants – 2006 revised version	52
Introduction	52
Development and designation of the Unique Identifier	53
Future development.....	55
<i>Annex 2A.1</i> Digits and alphabetic characters to be used in the Unique Identifier.....	56
Part II Compositional considerations for transgenic crops	57
<i>Chapter 3 Sugar beet (<i>Beta vulgaris</i>)</i>	59
Background	60
Nutrients and anti-nutrients in sugar beets	62
Identification of key sugar beet products consumed by animals.....	66
Consideration for the assessment of new sugar beet varieties.....	67
References	68

Chapter 4 Potato (<i>Solanum tuberosum</i> ssp. <i>tuberosum</i>)	71
Background	72
Key food and feed nutrients	75
Toxins and allergens	78
Anti-nutrients	79
Considerations for the assessment of new potato varieties	80
References	81
Chapter 5 Maize (<i>Zea mays</i>)	83
Background	84
Nutrients in maize and maize products	89
Anti-nutrients and allergens in maize	96
Secondary plant metabolites	98
Food use	99
Feed use	100
References	103
Chapter 6 Wheat (<i>Triticum aestivum</i>)	107
Background	108
Nutrients in wheat and wheat products	114
Anti-nutrients, allergens and other compounds in wheat and wheat products	121
Food use	123
Feed use	124
References	126
Chapter 7 Rice (<i>Oryza sativa</i>)	131
Background	132
Nutrients in rice	136
Food use	146
Feed use	146
References	149
Chapter 8 Barley (<i>Hordeum vulgare</i>)	155
Background	156
Nutrients in barley and barley products	163
Anti-nutrients and other compounds in barley and barley products	170
Food use	171
Feed use	173
Annex 8.A1 Barley fractionation for starch and ethanol production	176
Annex 8.A2 Overview of malt, beer and malt syrup production steps	177
Annex 8.A3 Barley flour milling	178
Annex 8.A4 Barley flaking process	179
References	180
Chapter 9 Alfalfa (<i>Medicago sativa</i>) and other temperate forage legumes	183
Introduction	184
Alfalfa (<i>Medicago sativa</i> L.)	184
Nutrients in alfalfa	187
Anti-nutrients and secondary metabolites in alfalfa	187
Feed use of alfalfa and alfalfa products	196

Food uses of alfalfa	197
Identification of key products and suggested analysis for new forage varieties	198
Forage legumes other than alfalfa	200
References	212
Chapter 10 Cultivated mushroom (<i>Agaricus bisporus</i>)	223
Background	224
Nutrients in <i>Agaricus bisporus</i>	229
Anti-nutrients in <i>Agaricus bisporus</i>	239
Toxicants in <i>Agaricus bisporus</i>	240
Food use	242
Feed use	243
References	244
Chapter 11 Sunflower (<i>Helianthus annuus</i>)	251
Sunflower origins, production and processing of the seeds, appropriate comparators and traditional characteristics	252
Nutrients in whole sunflower and sunflower products	255
Anti-nutrients and toxicants in sunflower	261
Sunflower for food	261
Sunflower for feed	263
References	266
Chapter 12 Tomato (<i>Lycopersicon esculentum</i>)	269
Background	270
Nutrients	275
Other constituents: Toxicants and allergens	283
Suggested constituents to be analysed related to food use	287
Suggested constituents to be analysed related to feed use	288
References	289
List of OECD consensus documents on the safety of novel foods and feeds, 2002-14	295
