Preface	v
Contributors	xi
Glossary of terms	
John C. Cushman	xvii
I. Genes and genetics	
1. <i>Nicotiana</i> chloroplast genes for components of the photosynthetic apparatus. by Kazuo Shinozaki, Nobuaki Hayashida and Masahiro Sug-iura	1
2. Gene organization and newly identified groups of genes of the chloroplast genome from a liverwort <i>Marchantia polymorpha</i> . by Kanji Ohyama, Takayuki Kohchi, Hideya Fukuzawa, Tohru Sano, Kazuhiko Umesono and Haruo Ozeki	27
3. Introns in chloroplast protein-coding genes of land plants. by Aine L. Plant and John C. Gray	43
4. Pea chloroplast tRNA ^{Lys} (UUU) gene: transcription and analysis of an intron-containing gene. by Scott K. Boyer and John E. Mullet	61
5. Transposon mutagenesis of nuclear photosynthetic genes in <i>Zea mays</i> . by William B. Cook and Donald Miles	77
6. Using bacteria to analyze sequences involved in chloroplast gene expression. by Anthony A. Gatenby, Steven J. Rothstein and Douglas Bradley	105
7. Binding, uptake and expression of foreign DNA by cyanobacteria and isolated etioplasts. by Bruce A. McFadden and Henry Daniell	121
II. Light harvesting systems	
8. The <i>puf</i> operon region of <i>Rhodobacter sphaeroides</i> . by Timothy J. Donohue, Patricia J. Kiley and Samuel Kaplan	137

9. Characterization of phycobiliprotein and linker polypeptide genes in *Fremyella diplosiphon* and their regulated expression during complementary chromatic adaptation.
by Arthur R. Grossman, Peggy G. Lemaux, Pamela B. Conley, Brigitte U. Bruns and Lamont K. Anderson 161
 10. Photoregulation of gene expression in the filamentous cyanobacterium *Calothrix* sp. PCC 7601: light-harvesting complexes and cell differentiation.
by Nicole Tandeau De Marsac, Didier Mazel, Thierry Damerval, Gérard Guglielmi, Véronique Capuano and Jean Houmard 195
 11. Regulation of cyanobacterial pigment-protein composition and organization by environmental factors.
by Harold Riethman, George Bullerjahn, K.J. Reddy and Louis A. Sherman 229
 12. The major light-harvesting complex of Photosystem II: aspects of its molecular and cell biology.
by Parag R. Chitnis and J. Philip Thornber 259
 13. Regulation and expression of the multigene family coding light-harvesting chlorophyll *a/b* binding proteins of Photosystem II.
by Dennis E. Buetow, Houqi Chen, Géza Erdős and Lee S.H. Yi 283
- III. Reaction centers; herbicide resistance**
14. Reaction centers from three herbicide-resistant mutants of *Rhodobacter sphaeroides* 2.4.1: sequence analysis and preliminary characterization.
by Mark L. Paddock, Scott H. Rongey, Edward C. Abresch, George Feher and Melvin Y. Okamura 321
 15. Molecular genetics of herbicide resistance in cyanobacteria.
by Judy Brusslan and Robert Haselkorn 343
 16. Genetic analysis of two new mutations resulting in herbicide resistance in the cyanobacterium *Synechococcus* sp. PCC 7002.
by Jeffrey C. Gingrich, Jeffrey S. Buzby, Veronica L. Stirewalt and Donald A. Bryant 353
 17. Nucleotide sequence of the genes encoding cytochrome b-559 from the cyanelle genome of *Cyanophora paradoxa*.
by Amanda Cantrell and Donald A. Bryant 371
 18. Protein composition of the Photosystem II core complex in genetically engineered mutants of the cyanobacterium *Synechocystis* sp. PCC 6803.
by W.F.J. Vermaas, M. Ikeuchi and Y. Inoue 389

19. The Q_B site modulates the conformation of the Photosystem II reaction center polypeptides.
by Achim Trebst, Brigitte Depka, Bernd Kraft and
Udo Johanningmeier 407
20. Photoregulation of *psbA* transcript levels in mustard cotyledons.
by J.E. Hughes and G. Link 423
21. The molecular mechanism of the Bicarbonate effect at the Plastoquinone reductase site of Photosynthesis.
by Danny J. Blubaugh and Govindjee 441
22. Photosystem I complex.
by Patricia Reilly and Nathan Nelson 485
- IV. Electron transport components; ATP synthase**
23. Synthesis and assembly of the cytochrome *b-f* complex in higher plants.
by David L. Willey and John C. Gray 497
24. Genes encoding ferredoxins from *Anabaena* sp. PCC 7937 and *Synechococcus* sp. PCC 7942: structure and regulation.
by Jan Van Der Plas, Rolf De Groot, Martin Woortman,
Fons Cremers, Mies Borrias, Gerard Van Arkel and Peter
Weisbeek 517
25. Structure, organization and expression of cyanobacterial ATP synthase genes.
by Stephanie E. Curtis 543
26. The chloroplast genes encoding subunits of the H^+ -ATP synthase.
by Graham S. Hudson and John G. Mason 565
- V. Carbon; Rubisco**
27. Structural gene regions of *Rhodobacter sphaeroides* involved in CO_2 fixation.
by Paul L. Hallenbeck and Samuel Kaplan 583
28. Uptake and utilization of inorganic carbon by cyanobacteria.
by John Pierce and Tatsuo Omata 593
29. Synthesis and assembly of bacterial and higher plant Rubisco subunits in *Escherichia coli*.
by Anthony A. Gatenby 607
30. Organization and expression of the genes encoding ribulose-1,5-bisphosphate carboxylase in higher plants.
by Thianda Manzara and Wilhelm Gruissem 621
31. Cloning, expression and directed mutagenesis of the genes for ribulose bisphosphate carboxylase/oxygenase.
by Bruce A. McFadden and Christopher L. Small 645

32.	The Rubisco subunit binding protein. by R. John Ellis and Saskia M. Van Der Vies	661
33.	The value of mutants unable to carry out photorespiration. by Ray D. Blackwell, Alan J.S. Murray, Peter J. Lea, Alan C. Kendall, Nigel P. Hall, Janice C. Turner and Roger C. Wallsgrave	677
34.	Gene expression during CAM induction under salt stress in <i>Mesembryanthemum</i> : cDNA library and increased levels of mRNA for phosphoenolpyruvate carboxylase and pyruvate orthophosphate dikinase. by Jürgen M. Schmitt, Christine Michalowski and Hans J. Bohnert	699
 VI. Protein transport; synthesis		
35.	Transport of proteins into chloroplasts. by Thomas H. Lubben, Steven M. Theg and Kenneth Keegstra	713
36.	Protein transport towards the thylakoid lumen: post-translation- al translocation in tandem. by Sjef Smeekens and Peter Weisbeek	735
37.	Recent developments in chloroplast transport. by Michael L. Mishkind and Scott E. Scioli	745
38.	Protein synthesis by isolated chloroplasts. by A. Gnanam, C.C. Subbaiah and R. Mannar Mannan	777
	Subject index	801
