Preface.....	xi
Editors	xix
List of Contributors.....	xxi

SECTION I *Fabrication Processes for Polymeric Membrane*

Chapter 1	Polymeric Membranes.....	3
	<i>Alberto Figoli, Silvia Simone, and Enrico Drioli</i>	
Chapter 2	Electrospinning: A Practical Approach for Membrane Fabrication.....	45
	<i>Luke Burke, Amir Keshvari, Nidal Hilal, and Chris J. Wright</i>	
Chapter 3	Control of Crystallization of Poly(Lactic Acid) Membranes.....	75
	<i>Shuichi Sato, Ryohei Shindo, Shinji Kanehashi, and Kazukiyo Nagai</i>	
Chapter 4	Innovative Methods to Improve Nanofiltration Performance through Membrane Fabrication and Surface Modification Using Various Types of Polyelectrolytes	103
	<i>Law Yong Ng and Abdul Wahab Mohammad</i>	
Chapter 5	Polysaccharides: A Membrane Material	161
	<i>Seema Shrikant Shenvi, Arun Mohan Isloor, and Ahmad Fauzi Ismail</i>	
Chapter 6	Cellulose and Its Derivatives for Membrane Separation Processes	193
	<i>Boor Singh Lalia, Farah E. Ahmed, Shaheen Fatima Anis, and Raed Hashaikeh</i>	
Chapter 7	PVDF Hollow-Fiber Membrane Formation and Production.....	215
	<i>Panu Sukitpaneenit, Yee Kang Ong, and Tai-Shung Chung</i>	

Chapter 8	PVDF Membranes for Membrane Distillation: Controlling Pore Structure, Porosity, Hydrophobicity, and Mechanical Strength.....	249
	<i>Rinku Thomas, Muhammad Ro'il Bilad, and Hassan Ali Arafat</i>	
Chapter 9	Membrane Contactor for Carbon Dioxide Absorption and Stripping	285
	<i>Rosmawati Naim, Masoud Rahbari-Sisakht, and Ahmad Fauzi Ismail</i>	
 SECTION II <i>Fabrication Processes for Inorganic Membrane</i>		
Chapter 10	Microstructured Ceramic Hollow-Fiber Membranes: Development and Application	317
	<i>Zhentao Wu, Benjamin F.K. Kingsbury, and Kang Li</i>	
Chapter 11	Ceramic Hollow-Fiber Support through a Phase Inversion-Based Extrusion/Sintering Technique for High-Temperature Energy Conversion Systems	347
	<i>Mohd Hafiz Dzarfan Othman, Mukhlis A. Rahman, Kang Li, Juhana Jaafar, Hasrinah Hasbullah, and Ahmad Fauzi Ismail</i>	
Chapter 12	Development of Large-Scale Industrial Applications of Novel Membrane Materials: Carbon Nanotubes, Aquaporins, Nanofibers, Graphene, and Metal-Organic Frameworks	383
	<i>Kailash Chandra Khulbe, Chaoyang Feng, Ahmad Fauzi Ismail, and Takeshi Matsuura</i>	
Chapter 13	Pd-Based Membranes and Membrane Reactors for Hydrogen Production	437
	<i>Silvano Tosti</i>	

SECTION III *Fabrication Processes for Composite Membrane*

Chapter 14	Current Progress of Nanomaterial/Polymer Mixed-Matrix Membrane for Desalination.....	489
	<i>Goh Pei Sean, Ng Be Cheer, and Ahmad Fauzi Ismail</i>	
Chapter 15	Fabrication of Polymeric and Composite Membranes	511
	<i>Chun Heng Loh, Yuan Liao, Laurentia Setiawan, and Rong Wang</i>	
Chapter 16	Strategies to Use Nanoparticles in Polymeric Membranes	569
	<i>Bart Van der Bruggen, Ruixin Zhang, and Jeonghwan Kim</i>	
Chapter 17	Surface Modification of Inorganic Materials for Membrane Preparation.....	589
	<i>Dipak Rana, Takeshi Matsuura, and Ahmad Fauzi Ismail</i>	
Chapter 18	Fabrication of Low-Fouling Composite Membranes for Water Treatment.....	615
	<i>Victor Kochkodan and Nidal Hilal</i>	
Chapter 19	Fabrication of Polymer Nanocomposite Membrane by Intercalating Nanoparticles for Direct Methanol Fuel Cell	655
	<i>Juhana Jaafar, Ahmad Fauzi Ismail, Mohd Hafiz Dzarfan Othman, and Mukhlis A. Rahman</i>	
Chapter 20	Effects of Solvent and Blending on the Physical Properties of Sulfonated Poly(Ether Ether Ketone): A Promising Membrane Material for PEMFC	681
	<i>Amir-Al-Ahmed, Abdullah S. Sultan, and S.M. Javaid Zaidi</i>	
Index		711
