

Contents

Preface	xv
Acknowledgments	xvii
1. Introduction	1
2. Plants	11
A. Collecting and Preserving Plants	11
B. Marking or Tagging Plants	12
C. Preventing Visitation	13
D. Abiotic Pollination	19
1. Hydrophily	19
2. Anemophily	20
E. Flowering Phenology	22
F. Seeds	29
1. Seed Predation	29
2. Seed Viability	30
G. Suggestions for Planning Studies	33
3. Flowers	35
A. Marking or Tagging Flowers	35
B. Preventing Visitation	37
C. Morphological Measurements	39
1. Floral Measurements And Intercorrelations	39
a. Corolla tubes	41
b. Other floral measurements	42
c. Flower orientation	44
2. Inflorescence Structure	45

Contents

3. Energy Content	46
D. Floral Fragrance	47
E. Flower Color	57
1. Visual Appearance to Humans	58
2. Measuring Visible Light Reflectance Levels	58
3. Measuring Spectral Reflectance	59
4. Ultraviolet Reflectance Patterns	63
F. Gynoecium	65
1. Stigma Secretions	65
2. Stigma Receptivity	67
3. Techniques for Observing Ovules	71
4. Ovule Viability	75
G. Suggestions for Planning Studies	75
4. Pollen	77
A. Pollen Identification	78
1. Preparing Pollen for Viewing	79
a. Light microscopy	79
i. Acetolysis	79
ii. Glycerin (Glycerol) jelly slides	83
iii. Hoyer's medium	84
iv. Polyvinyl lactophenol mounting medium	85
b. Scanning electron microscopy	85
c. Transmission electron microscopy	89
B. Pollen Size	89
C. Collecting Pollen	90
1. Anemophilous Pollen — Sticky Traps	91
2. Collecting from Anthers	92
D. Pollen Quantification	94
1. Hemacytometers	96
2. Particle Counters	96
3. Other Methods	97
E. Pollen Viability	98

Contents

1. Germination Tests	100
a. In vivo	100
b. In vitro	101
c. Semi-vivo growth of pollen tubes	106
2. Fluorochromatic Procedure	106
3. Tests for Enzyme Activity	108
a. Nitro blue tetrazolium	108
b. Triphenyl tetrazolium chloride	109
c. Peroxidase reaction	109
4. Stains	109
a. Alexander's stain	110
b. Lactophenol–aniline blue	111
c. Acetocarmine jelly	111
5. Nuclear Magnetic Resonance	112
F. Storing Pollen to Maintain Viability	112
G. Testing the Effects of External Factors on Pollen Viability	113
H. Counting Pollen Grains on Stigmas	115
J. Hand-pollination	119
1. Application	120
2. Estimating Numbers of Pollen Grains Applied	123
K. Pollen Tubes	124
1. Light and Fluorescence Microscopic Examination of Pollen Tubes	126
a. Aniline blue epifluorescence	126
b. Basic fuchsin/fast green	130
c. Acidified aniline blue/acetocarmine	130
d. Acetocarmine/basic fuchsin	131
e. Aniline blue in lactophenol	131
f. Alexander's combination of four stains	131
2. Electron Microscopy of Pollen Tubes Following Semi-Vivo Culture	132
L. Pollen Dispersal	133
1. Anemophilous Systems	134

Contents

2. Entomophilous Systems	135
a. Stains	135
b. Fluorescent powder dyes	136
c. Radioactive labels	140
d. Neutron activation analysis	142
e. Genetic markers	144
f. Backscatter SEM and X-ray microanalysis	145
M. Pollen Interference: Mechanical and Biochemical	146
N. Pollen as a Resource	147
O. Pollen as an Attractant	148
P. Pollen Presentation Schedules	148
Q. Staining Pollen Components	150
R. Electrostatic Effects on Pollen Transfer	150
S. Suggestions for Planning Studies	151
 5. Nectar	 153
A. Locating Nectaries	155
B. Nectar Volumes and Standing Crop	155
1. Collection Techniques	160
a. Capillary tubes	161
b. Syringes	161
c. Centrifugation	162
d. Wicks	163
e. Rinsing flowers	164
f. Homogenization	165
g. Micrometer measurements	166
2. Rate of Secretion	166
3. Cost of Nectar Production	167
4. Determining Organic Carbon Content	168
C. Sugar Concentration	168
1. Refractometers	169
2. Spot-Staining Technique	171
3. Photometric Procedures	174

Contents

4. Freezing-Point Depression	181
D. Sugar Identifications	182
1. Paper Chromatography	184
a. Methods	184
b. Additional reagents for visualizing chromatograms	187
2. Thin-Layer Chromatography (TLC)	190
3. Gas Chromatography	191
4. High-performance Liquid Chromatography	193
E. Identifying and Determining Amino Acid Concentrations	194
1. Ninhydrin Test for Total Amino Acid Content	195
2. Paper Chromatography	196
3. Thin-Layer Chromatography	196
4. Gas Chromatography	197
5. High-Performance Liquid Chromatography	199
6. Amino Acid Analyzers	200
F. Other Nectar Constituents	200
1. Alkaloids	200
2. Vitamins	203
3. Proteins	205
a. Electrophoresis	205
b. Photometric procedures	206
c. Spot staining	207
d. Protein test strips	207
4. Phenolics	208
5. Lipids	208
6. Organics	209
7. Microorganisms	209
8. Flavonoids	210
9. Iridoids	210
1. Acids	210
11. Ions	210
G. Nectar Viscosity	211
H. Nectar in Insects	212

Contents

I. Other Floral Rewards: Oils and Resins	213
J. Suggestions for Planning Studies	215
6. Mating Systems	217
A. Field Tests for the Ability to Self-Pollinate	218
B. Quantitative Studies of Mating System Parameters	222
1. Electrophoresis and Molecular Techniques	223
2. Models	225
a. Inbreeding coefficients	225
b. Mixed mating model	226
c. Biparental inbreeding and correlated mating models	228
d. Multilocus estimates of outcrossing	229
e. Paternity analysis	229
f. Computer programs for mating system analysis	230
C. Analyzing Differential Reproductive Success	231
D. Neighborhood	231
E. Carryover	234
F. Optimal Outcrossing Distance	235
G. Self-Incompatibility	236
1. Gametophytic Systems	236
2. Sporophytic Systems	237
3. Distinguishing Gametophytic and Sporophytic Self-Incompatibility	238
4. Heteromorphic Systems	238
5. Cryptic Self-Fertility	239
6. Overcoming Incompatibility Mechanisms	239
H. Functional Gender	240
I. Gender Adjustment and Gender Diphasy	244
J. Pollen-Ovule (P/O) Ratios	247
K. Gametophytic Competition	248
L. Pollinator Efficiency	249
M. Pollen and Resource Limitation of Seed Production	253

Contents

N. Phenotypic Selection	259
O. Isolation of Gametes	260
P. Suggestions for Planning Studies	260
7. Animals	263
A. Collecting Insects	263
1. Insect Nets	263
2. Killing Jars	264
3. CO ₂	267
4. Sticky Traps and Water Traps	268
5. Vacuum Collectors	270
6. Baits	271
7. Malaise Traps and Window Traps	273
8. Light Traps	274
9. Fly Larvae	274
B. Preparing Collections	276
1. Pinning and Preserving Insects	276
2. Preserving Insects in Alcohol	279
3. Labeling Specimens	279
C. Identifying Insects	281
D. Collecting Other Types of Pollinators	284
1. Birds	284
2. Bats and Other Mammals	288
E. Collection of Pollen from Pollinators	288
1. Pollen Carried Externally	288
a. Insects	289
b. Birds and other vertebrates	294
2. Gut Contents or Feces Containing Pollen	297
3. Collecting Pollen from Insect Nests	299
F. Collecting Nectar from Pollinators	300
G. Morphological Measurements	305
1. Proboscis Length	305
2. Mass	311

Contents

3. Bird Bills and Tongues	312
4. Other Morphological Measurements	314
H. Pollinator Vision	315
I. Physiological Measurements	316
1. Body or Flight Temperatures	316
2. Energy Budgets	318
3. Electrolyte Balance	320
J. Marking or Banding Animals	321
1. Insects	321
a. General techniques	321
b. Hymenoptera and Diptera	324
c. Lepidoptera	328
d. Coleoptera	330
2. Birds	332
3. Mammals	334
K. Foraging Behavior	335
1. Visitation Rates	335
2. Patterns of Movement	343
3. Artificial Flowers	347
a. Making them	347
i. Insects	347
ii. Hummingbirds	358
iii. Manipulating real flowers	361
b. Training animals to use them	362
4. Choice Experiments	364
5. Color Preferences	367
6. Manipulating Resources	369
7. Pollen-Harvesting Rates	371
8. Nectar-Harvesting Rates	373
9. Pollen Deposition and Carryover	373
1. Flower Constancy	374
11. Photographic Studies of Behavior	376
12. Manipulating Cues for Pollinators	378

Contents

L. Estimating Pollinator Population Size	381
M. Trap-Nesting Pollinators in the Field	383
N. Maintaining Pollinators in Captivity	385
O. Methods for Nocturnal Pollination Studies	388
P. Suggestions for Planning Studies	390
8. Environmental Measurements for Pollination Studies	393
A. Air Temperature	394
B. Flower Temperature	395
C. Solar Radiation	395
D. Relative Humidity	397
E. Wind Speed	400
F. Soil Moisture	401
G. Reporting Time of Day	403
H. Suggestions for Planning Studies	403
9. Experimental Considerations	405
A. Documenting Studies	405
B. Sample Sizes	406
C. Natural Systems with Characteristics Good for Certain Types of Work	407
Appendix 1. References to the Pollen Literature	411
Appendix 2. Sources of Equipment and Supplies	416
Appendix 3. Chemicals and Stains	445
Appendix 4. Computer Programs	464
Appendix 5. Glossary	473
Bibliography	493
Index of Subjects	561
Index of Plants	572
Index of Animals	576
Index of Chemicals	579
