

C O N T E N T S

A. ETHYLENE BIOSYNTHESIS AND MODE OF ACTION

| | |
|--|----|
| 1. The formation of ethylene from 1-aminocyclopropane-1-carboxylic acid | 1 |
| S.F. Yang | |
| 2. The biochemistry and physiology of 1-aminocyclopropane-1-carboxylic acid conjugation | 11 |
| N. Amrhein, U. Dorzok, C. Kionka, U. Kondziolka, H. Skorupka and S. Tophof | |
| 3. Model systems for the formation of ethylene from 1-amino-cyclopropane-1-carboxylic acid | 21 |
| J.E. Thompson, R.L. Legge, D.G. McRae and P.S. Covello | |
| 4. Occurrence of membrane-bound enzyme catalyzing the formation of ethylene from 1-aminocyclopropane-1-carboxylic acid from carnation plants | 33 |
| S. Mayak, Z. Adam and A. Borochov | |
| 5. Distribution and properties of ethylene-binding from plant tissue | 45 |
| E.C. Sisler | |
| 6. Binding sites for ethylene | 55 |
| M.A. Hall, A.R. Smith, C.J.R. Thomas and C.J. Howarth | |

| | |
|---|----|
| 7. Why do plants metabolize ethylene? | 65 |
| E.M. Beyer, Jr. | |
| 8. Role of ethylene oxidation in the mechanism of ethylene action | 75 |
| F.B. Abeles | |
| 9. Superinduction of ACC synthase in tomato pericarp by lithium ions | 87 |
| T. Boller | |
| 10. 1-aminocyclopropane-1-carboxylic acid (ACC)-dependent ethylene synthesis in vacuoles of pea and bean leaves | 89 |
| M. Guy and H. Kende | |
| 11. ACC conversion to ethylene by mitochondria from etiolated pea (<i>Pisum sativum</i>) seedlings | 91 |
| C. Vinkler and A. Apelbaum | |
| 12. Wound-induced ethylene production and its control in the mesocarp tissue of winter squash fruit | 93 |
| H. Hyodo, K. Tanaka, K. Watanabe and N. Aoshima | |
| 13. Characterization of the carbohydrates-stimulated ethylene production in tobacco leaf discs | 95 |
| S. Philosoph-Hadas, S. Meir and N. Aharoni | |
| 14. Role of sucrose in the metabolism of IAA-conjugates as related to ethylene production by tobacco leaf discs | 97 |
| S. Meir, S. Philosoph-Hadas, E. Epstein and N. Aharoni | |

15. The effect of cycloalkenes on ethylene binding 99
A.R. Smith, C.J. Howarth, I.O. Sanders and M.A. Hall

B. ETHYLENE IN DEVELOPMENT AND SENESCENCE

16. Ethylene and flower senescence 101
R. Nichols

17. On ethylene, calcium and oxidative mediation of whole apple fruit senescence by core control 111
Y.Y. Leshem, I.B. Ferguson and S. Grossmann

18. Ethylene-mediated growth response in submerged deep-water rice 121
H. Kende, J.P. Metraux and I. Raskin

19. Control of the biosynthesis of ethylene in senescing tissues 129
N. Aharoni, S. Philosoph-Hadas and S. Meir

20. Wound-induced increase in 1-aminocyclopropane-1-carboxylate synthase activity: regulatory aspects and membrane association of the enzyme 139
A.K. Mattoo and J.D. Anderson

21. Reduced S-adenosylmethionine decarboxylase activity in ethylene-treated etiolated pea seedlings 149
A. Apelbaum, I. Icekson and A. Goldlust

| | |
|--|-----|
| 22. 1-aminocyclopropane-1-carboxylic acid (ACC) and ethylene production during senescence of oat leaf segments | 159 |
| R. Preger and S. Gepstein | |
| 23. Effect of naturally produced ethylene in tissue culture jars | 161 |
| R. Jona, I. Gribaudo and R. Vigliocco | |
| 24. Involvement of ethylene in <i>Liatriis</i> corm dormancy | 163 |
| V. Keren-Paz and A. Borochov | |
| 25. Endogenous ethylene production and flowering of Bromeliaceae | 165 |
| M. De Proft, L. Jacobs and J.A. De Greef | |
| 26. Role of ethylene in distribution of assimilates in carnations | 167 |
| H. Veen and A.A.M Kwakkenbos | |
| 27. Characterization of an endogenous inhibitor of ethylene biosynthesis in carnation petals | 169 |
| H. Itzhaki, A. Borochov and S. Mayak | |

C. ETHYLENE IN STRESS AND DISEASE

| | |
|--|-----|
| 28. Regulation of pathogenesis and symptom expression in diseased plants by ethylene | 171 |
| L.C. Van Loon | |

29. Ethylene biosynthesis in tobacco leaf discs in relation to ethylene treatment, Cellulysin application and fungal infection 181
E. Chalutz, A.K. Mattoo and J.D. Anderson

30. Purification and properties of the ethylene-inducing factor from the cell wall digesting mixture, Cellulysin 189
J.D. Anderson, E. Chalutz and A.K. Mattoo

31. The involvement of callose and elicitors in ethylene production caused by mechanical perturbation 199
M.J. Jaffe

32. Elicitors and ethylene trigger defense response in plants 217
M.T. Esquerre-Tugayé, D. Mazau, B. Pelissier, D. Roby and A. Toppan

33. The role of ethylene in the pathogenic symptoms by *Meloidogyne javanica* nematode-infected tomato plants 219
I. Glazer, A. Apelbaum and D. Orion

D. ETHYLENE IN THE CONTROL OF ABSCISSION

34. Abscission and recognition of zone specific target cells 221
D.J. Osborne and M.T. McManus

35. Is ethylene the natural regulator of abscission? 231
P.W. Morgan

| | |
|---|-----|
| 36. Anatomical aspects of citrus abscission - effect of ethylene on leaf and fruit explants | 241 |
| R. Goren, M. Huberman and E. Zambski | |
| 37. Ethephon action in growth and abscission control | 255 |
| S. Lavee | |
| 38. Effect of ethylene on indol-3-acetic acid transport, metabolism and level in leaf tissues of woody plants during abscission | 267 |
| J. Riov, O. Sagee and R. Goren | |
| 39. Effects of the defoliant thidiazuron on leaf abscission and ethylene evolution from cotton seedlings | 277 |
| J.C. Suttle | |
| 40. Ethylene and auxin transport and metabolism in peach fruit abscission | 279 |
| A. Ramina, A. Masia and G. Vizzotto | |

E. ETHYLENE IN FRUIT RIPENING AND STORAGE

| | |
|--|-----|
| 41. Ethylene and the control of tomato fruit ripening | 281 |
| G.E. Hobson, J.E. Harman and R. Nichols | |
| 42. Experiments to prevent ethylene biosynthesis and/or action and effect of exogenous ethylene on ripening and storage of apple fruit | 291 |
| F. Bangerth, G. Bufler and H. Halder-Doll | |

| | |
|---|-----|
| 43. Possible role of fruit cell wall oxidative activity in ethylene evolution | 303 |
| C. Frenkel and M.K. Mukai | |
| 44. Compartmentation of amino acids in tomato fruit pericarp tissue | 317 |
| J.E. Baker and R.A. Saftner | |
| 45. Effect of salinity on the ripening process in tomato fruit: possible role of ethylene | 329 |
| Y. Mizrahi and S. (Malis) Arad | |
| 46. Effect of mannose on ethylene evolution and ripening of pear fruit | 333 |
| C.B. Watkins and C. Frenkel | |
| F. PARTICIPANTS | 335 |
| G. INDEX | 343 |
