

## TABLE OF CONTENTS

### VOLUME I

|                                                                                                              |     |
|--------------------------------------------------------------------------------------------------------------|-----|
| Chapter 1                                                                                                    |     |
| Chromatin Structure and Gene Regulation.....                                                                 | 1   |
| <b>R. S. Gilmour</b>                                                                                         |     |
| Chapter 2                                                                                                    |     |
| The Structure of Transcripts and the Regulation of Transcriptions.....                                       | 33  |
| <b>G. P. Georgiev and A. P. Ryskov</b>                                                                       |     |
| Chapter 3                                                                                                    |     |
| Cascade Regulation: A Model of Integrative Control of Gene Expression in Eukaryotic Cells and Organisms..... | 55  |
| <b>K. Scherrer</b>                                                                                           |     |
| Chapter 4                                                                                                    |     |
| Selective Gene De-Repression by De-Repressor RNA.....                                                        | 129 |
| <b>J. H. Frenster</b>                                                                                        |     |
| Chapter 5                                                                                                    |     |
| The Primer Hypothesis for the Regulation of Eukaryotic Gene Expression.....                                  | 143 |
| <b>G. M. Kolodny</b>                                                                                         |     |
| Index .....                                                                                                  | 179 |

### VOLUME II

|                                                                                                                  |     |
|------------------------------------------------------------------------------------------------------------------|-----|
| Chapter 1                                                                                                        |     |
| Eukaryotic DNA Dependent RNA Polymerases: an Evaluation of their Role in the Regulation of Gene Expression ..... | 1   |
| <b>T. J. C. Beebee and P. H. W. Butterworth</b>                                                                  |     |
| Chapter 2                                                                                                        |     |
| Role of Histones in Cell Differentiation .....                                                                   | 57  |
| <b>R. Tsanev</b>                                                                                                 |     |
| Chapter 3                                                                                                        |     |
| Role of Nonhistone Chromosomal Proteins in Selective Gene Expression .....                                       | 113 |
| <b>I. R. Phillips, E. A. Shephard, J. L. Stein, and G. S. Stein</b>                                              |     |
| Chapter 4                                                                                                        |     |
| Hormonal Regulation of Gene Transcription.....                                                                   | 179 |
| <b>R. F. Cox</b>                                                                                                 |     |
| Index .....                                                                                                      | 229 |
