
Contents

PART A:	PROTEIN ANNOTATION TOOLS	1
Chapter 1	Genomics and the Genome Era <i>Nicola J. Mulder and Rolf Apweiler</i>	3
Chapter 2	Sequence Clustering as a Method of Protein Functional Annotation <i>R. Petryszak and P. Kersey</i>	11
Chapter 3	Function Prediction with Protein Signatures and InterPro <i>Nicola J. Mulder and Rolf Apweiler</i>	25
Chapter 4	The Gene Ontology Annotation (GOA) Database: Sharing Biological Knowledge with GO <i>Evelyn Camon, Daniel Barrell, Emily Dimmer and Vivian Lee</i>	37
Chapter 5	Curator-Driven Protein Sequence Analysis and Annotation <i>Michele Magrane and Claire O'Donovan</i>	55
Chapter 6	Automated Annotation of Proteins <i>Ernst Kretschmann and Daniela Wieser</i>	71
Chapter 7	Guilt by Association: Using Protein Interactions and Expression Patterns to Predict Protein Function <i>Sandra Orchard and Henning Hermjakob</i>	79
PART B:	GENOME ANNOTATION PIPELINES AND BROWSERS	89
Chapter 8	Artemis and ACT: DNA Sequence Viewing, Annotation and Comparison Tools <i>Tim J. Carver, Stephen Bentley, Nicholas Thomson, Matthew T.G. Holden and Julian Parkhill</i>	91
Chapter 9	Ensembl's Annotation Pipeline and Its Use in Eukaryotic Genomes <i>Xosé M. Fernández, Steve Searle and Ewan Birney</i>	109
Chapter 10	Genome Annotation and Viewing in Vega <i>Jennifer Harrow and Laurens Wilming</i>	125

Chapter 11	The PEDANT Genome Database <i>Dmitrij Frishman, Klaus Heumann and Hans-Werner Mewes</i>	147
Chapter 12	Microbial Genomes at NCBI <i>William Klimke and Tatiana Tatusova</i>	157
Chapter 13	PlasmoDB: The Plasmodium Genomics and Functional Genomics Resource <i>Patricia L. Whetzel, Shailesh V. Date, Kobby Essien, Martin J. Fraunholz, Bindu Gajria, Gregory R. Grant, John Iodice, Jessica C. Kissinger, Philip T. Labo, Arthur J. Milgram, David S. Roos and Christian J. Stoeckert Jr.</i>	185
Chapter 14	Integr8: Navigating Genome Reviews and the Proteome Analysis Database <i>Paul Kersey, Tamara Kulikova, Manuela Pruess and Rolf Apweiler</i>	201
