

# Contents

List of Contributors	xi
Introduction	xiii
<b>1. Ethanol Industry: Surpassing Uncertainties and Looking Forward</b>	
<i>Wilson A. Araújo</i>	
Introduction	1
Bioeconomy Toward a Renewable World	2
Biofuels	6
Ethanol Industry: The Uphill Task Toward a Second-Generation Scene	9
Final Remarks	28
Acknowledgments	29
References	29
<b>2. Ethanol Use in the United States: Status, Threats and the Potential Future</b>	
<i>W.M. Griffin, B.A. Saville and H.L. MacLean</i>	
Introduction	34
Corn Ethanol	35
Cellulosic Ethanol	37
Algae and Photosynthetic Bacteria	39
Butanol	41
Current Legislative Initiatives for Biofuel Use	44
Energy Policy Act of 2005 (RFS1)	44
Energy Independence and Security Act 2007 (RFS2)	44
California Low Carbon Fuel Standard	47
CAFE Standard	48
Greenhouse Gas Emissions	50
Fuel Production in the United States	53
Biochemical Ethanol Production Processes	53
Thermochemical Biofuel Production Process	56
Final Remarks	58
References	58

**3. Political Orientations, State Regulation and Biofuels in the Context of the Food–Energy–Climate Change Trilemma**

*M. Harvey and Z.P. Bharucha*

<b>Introduction</b>	63
<b>The Trilemma Approach</b>	65
<b>Biofuels in the EU and Germany</b>	67
Biofuels in Europe	68
Germany	70
<b>India: Food Versus Fuel and Stillborn Biofuel Markets</b>	74
Indian Biofuels Policy and the Trilemma	76
Bioethanol	78
The Future for Biofuels in India	79
<b>China: Squeezed by Land Scarcity, Food and Energy Security</b>	80
<b>Brazil: A Trilemma Trajectory Derailed at Home and Blocked From Abroad?</b>	83
<b>Final Remarks</b>	86
<b>Acknowledgment</b>	88
<b>References</b>	88

**4. Innovation Systems of Ethanol in Brazil and the United States: Making a New Fuel Competitive**

*L.C. de Sousa, N.S. Vonortas, I.T. Santos and D.F. de Toledo Filho*

<b>Introduction</b>	93
<b>Technology Innovation System and System Functions</b>	95
<b>Biofuels: Industrial, Agricultural and Energy Policies</b>	99
Industrial, Agricultural and Energy Policies in the United States	99
Industrial, Agricultural and Energy Policies in Brazil	101
<b>Ethanol Through an Environmental Perspective</b>	103
Environmental Impacts of Fuels	103
The New Energy Paradigm and the Fuel Mix	104
<b>Biofuel Regulation</b>	106
Regulation in the United States	106
Regulation in Brazil	107
<b>Comparison of Innovation Functions Between the United States and Brazilian Biofuel TIS</b>	108
Feedstock	108
Maintaining a Long-Term Commitment	110
Setting an Adequate Environment for Innovation	111
Institutional Design's Influence on Proactivity	113
<b>Final Remarks</b>	113
<b>Acknowledgments</b>	116
<b>References</b>	119

**5. Innovation in the Brazilian Bioethanol Sector:  
Questioning Leadership***S. Salles-Filho, A. Bin, P.F.D. Castro, A.F.P. Ferro and S. Corder*

<b>Introduction</b>	122
<b>Main Trends</b>	124
<b>Studying Innovation in Bioethanol</b>	126
Innovation Survey	127
Innovation Challenges	127
<b>What Is Going On in the Brazilian Case</b>	128
Profile of the Companies Surveyed	128
Technological Innovation in Corporate Strategy	130
Innovation Management	135
Innovation Challenges According to Companies	135
<b>Final Remarks</b>	137
<b>References</b>	139

**6. Policies Towards Bioethanol and Their Implications:  
Case Brazil***L.A.B. Cortez and R. Baldassin, Jr.*

<b>Historical Development of the Brazilian Ethanol Program (PROÁLCOOL)</b>	142
<b>The Creation of the “Brazilian Sugarcane Ethanol Model”</b>	145
<b>How Did Innovation Help the Evolution of the “Brazilian Model”</b>	149
Development of New Sugarcane Varieties	150
The Introduction of Green Cane Harvesting and Sugarcane Harvest Mechanization in Central-South Brazil	150
Evolution in Industrial Parameters of Ethanol Production	151
<b>How Did Sustainability Criticism Help the Ethanol Industry in Brazil</b>	153
<b>Forecasting and Planning the Future Sugarcane Bioenergy     Production: The Creation of “New Models”</b>	156
Inventing a New Sustainable Agriculture for Sugarcane Bioenergy	157
New Industrial Production Models Integrated With the Oil, Electricity, Chemical and Other Related Industries	158
<b>Conclusions on the Prospects of the Bioethanol Industry in     Brazil and Its Productive Model</b>	159
<b>Acknowledgment</b>	160
<b>References</b>	160

**7. Ethanol Production Technologies in the US:  
Status and Future Developments***B.A. Saville, W.M. Griffin and H.L. MacLean*

<b>Introduction</b>	163
<b>First-Generation Technology</b>	164

Feedstock Choices: Corn Versus Other Grains	164
Dry Milling	164
Wet Milling	166
Recent Technological Advances, Efficiency Improvements and New Coproducts	166
<b>Second-Generation Technology</b>	167
Role of Feedstocks and Feedstock Preprocessing	167
Pretreatment Options	170
Enzyme Hydrolysis	171
Fermentation	172
Recovery and Use of Solid Residues	173
Coproduct Options: Technical, Financial and Market Effects	174
Performance and Life Cycle Financial and GHG Emissions Impacts	174
<b>Synopsis of Commercial Plants</b>	175
<b>Future Developments for Cellulosic Ethanol</b>	176
Increasing Scale: Technology and Efficiency Improvements	176
Role of Feedstocks in Industry Expansion	177
Colocation and Other Synergies	177
<b>Final Remarks</b>	178
<b>References</b>	178
<b>8. Technological Foresight of the Bioethanol Case</b>	
<i>José Maria F. J. da Silveira, M.E.S. Dal Poz, L.G. Antonio de Souza and I.R.L. Huamani</i>	
<b>Introduction</b>	181
<b>Collecting Information From Data Banks</b>	182
<b>Applying Scientometrics to Scientific Papers in the Bioenergy Sector: Network Analysis in Second-Generation Ethanol</b>	184
<b>Using Patents to Forecast Technological Trends</b>	190
<b>Final Remarks</b>	193
<b>Annex I</b>	194
<b>References</b>	195
<b>9. China's Fuel Ethanol Market</b>	
<i>H. Lu</i>	
<b>Introduction</b>	197
<b>Development of Fuel Ethanol in China</b>	199
<b>Fuel Ethanol Policies for the Future</b>	203
<b>Trends and Policy Implications</b>	206
<b>Final Remarks</b>	208
<b>Relevant Websites</b>	208

**10. Fuel Ethanol in Africa: A Panoramic View With an Accent on Bénin and Kenya***S.C. Trindade*

<b>Introduction</b>	209
<b>Fuel Ethanol in Kenya</b>	210
<b>Fuel Ethanol in Bénin</b>	213
<b>Final Remarks</b>	216
<b>References</b>	219

**11. Future of Global Bioethanol: An Appraisal of Results, Risk and Uncertainties***P. Lemos and F.C. Mesquita*

<b>Introduction</b>	221
<b>International Markets of Bioethanol: Production and Consumption</b>	222
<b>Bioethanol Supply and Demand: Pros and Cons</b>	226
<b>Cons</b>	226
<b>Pros</b>	228
<b>Bioethanol: A Truly Globally Traded Energy Commodity?</b>	229
The Importance of Bioethanol Policies: Blending, Targeting and Potential (Dis)continuities	230
Global Governance: The Process of Standardization and Harmonization in Technical and Sustainability Matters	231
The Different Approaches of Leading Countries for Global Commoditization Process	233
<b>Final Remarks</b>	234
<b>References</b>	235
<b>Conclusions: Futures of Bioethanol—Main Findings and Prospects</b>	238
<i>S. Salles-Filho</i>	
<b>Index</b>	249
