

CONTENTS

Part I. Introductory Material	1
1. History	3
2. Evidence	21
3. Methods: Limits and Compromises; Models, Analogies, and Mathematics; Simplification; Semantics; Carabid Beetles	35
Part II. Processes And Levels Of Directional Change	51
4. The Essential Process: Sets and Set Selection	53
5. Below the Darwinian Level	67
6. Evolution at the Darwinian Level	87
A. Prerequisites and Components	87
B. The Process as a Whole	104
C. Consequences and Examples	117
7. Above the Darwinian Level: Group Selection; Altruism and Kin Selection; Societies; Sets of Species; Area, Climate, and Evolution	139

Part III. The Actual Course of Organic Evolution

8. Evolutionary Tracks and Timetables	165
9. Human Evolution	189
A. Fabric and Ribbon: Beginning To Mammals	190
B. Tree Shrew to Ape-Man	194
C. Ape-Man to Man	204
D. Brain, Intelligence, and Consequences	213

CONTENTS

Part IV. Evolutionary Philosophy and Ethics

10. Philosophical and Ethical Implications of Evolution	231
---	-----

Index

1. Evolution	255
a. Definitions	255
b. Theories	255
c. Evidence	255
d. Evolutionary Philosophy	255
e. Ethics	255
f. History	255
g. Methods	255
h. Problems	255
i. Selection	255
j. Theory	255
k. Types of Evolution	255
l. Variation	255
m. Variation and Selection	255
n. Variation and Selection	255
o. Variation and Selection	255
p. Variation and Selection	255
q. Variation and Selection	255
r. Variation and Selection	255
s. Variation and Selection	255
t. Variation and Selection	255
u. Variation and Selection	255
v. Variation and Selection	255
w. Variation and Selection	255
x. Variation and Selection	255
y. Variation and Selection	255
z. Variation and Selection	255
