<i>Preface</i>	xi
PROLOGUE	
1 How far will Darwin take us? <i>A. F. Huxley</i>	3
EVOLUTIONARY HISTORY	
2 Darwin, intellectual revolutionary <i>Ernst Mayr</i>	23
3 The development of Darwin's general biological theorizing <i>M. J. S. Hodge</i>	43
4 Darwin and the nature of science <i>D. L. Hull</i>	63
5 The several faces of Darwin: materialism in nineteenth and twentieth century evolutionary theory <i>G. E. Allen</i>	81
MOLECULAR AND CELLULAR EVOLUTION	
6 Self-replication and molecular evolution <i>M. Eigen</i>	105
7 Molecular tinkering in evolution <i>F. Jacob</i>	131
8 Intimations of evolution from the three-dimensional structures of proteins <i>D. C. Phillips, M. J. E. Sternberg and B. J. Sutton</i>	145

9	Evolution of gene families: the globin genes <i>A. J. Jeffreys, S. Harris, P. A. Barrie, D. Wood, A. Blanchetot and S. M. Adams</i>	175
10	Gene clusters and genome evolution <i>W. F. Bodmer</i>	197
11	The primary lines of descent and the universal ancestor <i>C. R. Woese</i>	209
12	Experimental evolution <i>P. H. Clarke</i>	235
13	Variation as a genetic engineering process <i>J. A. Shapiro</i>	253
EVOLUTION OF WHOLE ORGANISMS		
14	Gene, organism and environment <i>R. C. Lewontin</i>	273
15	Population genetics and ecology: the interface <i>E. Nevo</i>	287
16	A Darwinian plant ecology <i>J. L. Harper</i>	323
17	Irrelevance, submission and partnership: the changing role of palaeontology in Darwin's three centennials and a modest proposal for macroevolution <i>S. J. Gould</i>	347
18	Plate tectonics and evolution <i>A. Hallam</i>	367
19	Microevolution and macroevolution <i>F. J. Ayala</i>	387
20	Universal Darwinism <i>R. Dawkins</i>	403
EVOLUTION OF SOCIAL BEHAVIOUR		
21	The development of an evolutionary ethology <i>R. W. Burkhardt</i>	429
22	Game theory and the evolution of cooperation <i>J. Maynard Smith</i>	445
23	Selection in relation to sex <i>T. H. Clutton-Brock</i>	457
24	Rules for changing the rules <i>P. P. G. Bateson</i>	483
25	Aspects of human evolution <i>G. Ll. Isaac</i>	509

26	Sociobiology and the Darwinian approach to mind and culture <i>E. O. Wilson</i>	545
27	Evolution, ethics, and the representation problem <i>Bernard Williams</i>	555
EPILOGUE		
28	The mysterious case of Charles Darwin <i>J. Passmore</i>	569
	<i>Index</i>	577
