PREFACE v

- 1 Effects of Amino Acid Composition
and Microenvironment on Protein
Structure, *K. E. Van Holde* 1
- 2 Denaturation and Renaturation of
Proteins, *J. R. Whitaker* 14
- 3 Water and Protein Hydration,
O. Fennema 50
- 4 Cellular Degradation of Proteins,
A. Tappel 91
- 5 Protein Separation and Analysis By
Electrophoretic Methods: An Overview
of Principles, *N. Catsimpoolas* 106
- 6 Muscle Proteins, *D. E. Goll, R. M.
Robson and M. H. Stromer* 121
- 7 Milk Proteins, *J. R. Brunner* 175
- 8 Egg Proteins, *D. T. Osuga and
R. E. Feeney* 209
- 9 Cereal Proteins, *G. E. Inglett* 267
- 10 Legumes: Seed Composition and Structure,
Processing into Protein Products, and
Protein Properties, *W. J. Wolf* 291
- 11 Single-Cell Protein, *S. R. Tannenbaum* 315

12	Some Observations on the Roles of Basic Research in Development of High Protein Food Products, <i>J. M. McIntire</i>	331
13	Nutrition and Technology: The Role of Sensory Properties of Proteins, <i>C. F. E. von Sydow and I. H. Qvist</i>	337
14	Protein Quality and Its Determination, <i>D. M. Hegsted</i>	347
15	Human Amino Acid and Nitrogen Requirements As The Basis For Evaluation of Nutritional Quality of Proteins, <i>A. E. Harper</i>	363
16	Functional Properties of Proteins and Their Measurement, <i>H. M. Schoen</i>	387
17	Chemical and Nutritional Modifications of Food Proteins Due to Processing and Storage, <i>J. C. Cheftel</i>	401
18	Effects of Lysine Modification on Chemical, Physical, Nutritive, and Functional Properties of Proteins, <i>M. Friedman</i>	446
19	Protein Texturization, <i>F. E. Horan</i>	484
20	Plant Protein Sources, <i>G. O. Kohler and C. K. Lyon</i>	516
21	Food Protein Production: Land, Energy, and Economics, <i>D. Pimentel and M. Pimentel</i>	542
22	Outlook for Alternative Protein Sources in Processed Foods, <i>R. H. Forsythe and E. J. Briskey</i>	554
23	Research Needs in Protein Resources, <i>M. Milner, N. S. Scrimshaw and D. I. C. Wang</i>	571
