

Table of Contents

List of Contributors	xv
About the Editor	xix
Preface	xxi
Acknowledgments	xxiii
Introduction	xxv
1. CNT Basics and Characteristics	1
<i>Roghayeh Ghasempour, Hamid Narei</i>	
1.1 Introduction to Carbon	1
1.2 History	3
1.3 Structure	5
1.4 Physical Properties of CNTs	7
1.5 Characterization of CNTs	14
1.6 Conclusions	21
References	21
2. Engineering Applications of Carbon Nanotubes	25
<i>Soheil Jafari</i>	
2.1 Introduction	25
2.2 Structural Reinforcement	27
2.3 Coatings and Films Applications of CNTs	29
2.4 CNTs in Electromagnetics	30
2.5 Biotechnological and Biomedical Applications of CNTs	31
2.6 Sensors and Actuators Applications of CNTs	32
2.7 Acoustic and Electroacoustic Applications of CNTs	34
2.8 Other Applications of CNTs	35
2.9 Conclusions	36
References	36

3. Carbon Nanotubes Processing	41
<i>Reza Malekimoghadam, Roham Rafiee</i>	
3.1 Introduction	41
3.2 Arc Discharge	43
3.3 Laser Ablation	45
3.4 Thermal CVD	50
3.5 Plasma-Enhanced CVD	52
3.6 Catalyst Preparation	55
3.7 Purification	55
3.8 Conclusions	55
References	56
4. Fabrication of Carbon Nanotube/Polymer Nanocomposites	61
<i>Tejendra K. Gupta, Shanmugam Kumar</i>	
4.1 Introduction	61
4.2 Fabrication of CNT/Polymer Nanocomposites	64
4.3 Dispersion and Alignment of CNTs in Polymer Matrices for Processing of Polymer Nanocomposites	69
4.4 Chemical Modifications of CNTs for Processing of Polymer Nanocomposites	70
4.5 Conclusions and Future Scope	76
References	76
5. Improving Carbon Nanotube/Polymer Interactions in Nanocomposites	83
<i>Francis Avilés, Juan V. Cauich-Rodríguez, Patricio Toro-Estay, Mehrdad Yazdani-Pedram, Héctor Aguilar-Bolados</i>	
5.1 Introduction	83
5.2 Carbon Nanotube Functionalization Methods	84
5.3 Carbon Nanotube Functionalization for Improved Properties of Polymer Composites	95
References	108

6. Deposition of Carbon Nanotubes on Fibers	117
<i>Francis Avilés, José de Jesús Kú-Herrera, Andrés I. Oliva-Avilés</i>	
6.1 Introduction	117
6.2 Methods of Deposition and Growth of Carbon Nanotubes on Engineering Fibers	118
6.3 Carbon Nanotube-Modified Fibers for Multiscale Polymer Composites	128
References	138
7. Toxicity and Safety Issues of Carbon Nanotubes	145
<i>Hamid Narei, Roghayeh Ghasempour, Omid Akhavan</i>	
7.1 Introduction	145
7.2 Effects of CNTs on Systems and Organs of the Human Body	147
7.3 Determinants of CNT-Induced Toxicity	154
7.4 Mechanisms of CNT-Induced Toxicity	159
7.5 Ecotoxicological Effects of CNTs	162
7.6 Conclusions	164
References	165
8. Mechanical Properties of Isolated Carbon Nanotube	173
<i>Ghanshyam Pal, Shanmugam Kumar</i>	
8.1 Introduction	173
8.2 Structure of Carbon Nanotubes	174
8.3 Elastic Properties of CNTs	176
8.4 Large Elastic Deformation in CNTs	185
8.5 Tensile Strength of CNTs	188
8.6 Epilogue	191
References	192

9. Mechanical Properties of CNT/Polymer	201
<i>Antonio Pantano</i>	
9.1 Introduction	201
9.2 Polyethylene–Carbon Nanotube Composites	202
9.3 Polymethyl Methacrylate–Carbon Nanotube Composites	206
9.4 Polypropylene–Carbon Nanotube Composites	207
9.5 Polyvinyl Alcohol–Carbon Nanotube Composites	208
9.6 Polystyrene–Carbon Nanotube Composites	211
9.7 Polyvinyl Chloride–Carbon Nanotube Composites	212
9.8 Polystyrene- <i>co</i> -Butyl Acrylate–Carbon Nanotube Composites	214
9.9 Epoxy–Carbon Nanotube Composites	215
9.10 Nylon–Carbon Nanotube Composites	218
9.11 Polyimide–Carbon Nanotube Composites	220
9.12 Polystyrene- <i>b</i> -Butadiene- <i>co</i> -Butylene- <i>b</i> -Styrene–Carbon Nanotube Composites	223
9.13 Methyl-Ethyl Methacrylate–Carbon Nanotube Composites	225
9.14 Polyethyleneimine–Carbon Nanotube Composites	226
References	230
10. Electrical and Electromagnetic Properties of CNT/Polymer Composites	233
<i>Seyed Amin Mirmohammadi, Samaheh Sadjadi, Naeimeh Bahri-Laleh</i>	
10.1 Introduction	233
10.2 Basic Concepts in Electromagnetism and Electrical Conductivity	235
10.3 Electrical/Electromagnetic Behavior of CNT/Polymer Composites	239
10.4 Conclusions	252
References	253

11. Atomistic Simulations of Carbon Nanotubes: Stiffness, Strength, and Toughness of Locally Buckled CNTs	259
<i>Nuno Silvestre, Bruno Faria, José N. Canongia Lopes</i>	
11.1 Introduction	259
11.2 Atomistic Modeling and Molecular Dynamics	264
11.3 Behavior of Locally Buckled Carbon Nanotubes	273
11.4 Final Remarks and Future Developments	287
References	288
12. Finite Element Modeling of Nanotubes	291
<i>Androniki S. Tsiamaki, Georgios I. Giannopoulos, Stylianos K. Georgantzinos, Nick K. Anifantis</i>	
12.1 Introduction	291
12.2 Atomistic Geometry of Nanotubes	293
12.3 Potential Energy Description	294
12.4 Modeling of Nanotube Interatomic Interactions	296
12.5 Governing Equations	300
12.6 Results	302
12.7 Conclusions	308
References	308
13. Multiscale Simulation of Impact Response of Carbon Nanotube/Polymer Nanocomposites	311
<i>Asimina K. Manta, Konstantinos I. Tserpes</i>	
13.1 Introduction	312
13.2 The Multiscale Approach	313
13.3 RVEs	314
13.4 Modeling of Nanoindentation Test	319
13.5 Parametric Studies	322
13.6 Simulation of Nanoindentation	339
13.7 Conclusions	343
References	344

14. Theoretical Modeling of CNT–Polymer Interactions	347
<i>Abbas Montazeri, Behzad Mehrafrooz</i>	
14.1 Introduction	347
14.2 Experimental Investigations	349
14.3 Numerical Modeling Techniques	351
14.4 Concluding Remarks	377
References	378
 15. Continuum/Finite Element Modeling of Carbon Nanotube–Reinforced Polymers	 385
<i>Nam Vu-Bac, Timon Rabczuk, Xiaoying Zhuang</i>	
15.1 Introduction	385
15.2 Models at the Nanoscale	387
15.3 Models at the Microscale	393
15.4 Models at the Mesoscale	397
15.5 Models at the Macroscale	402
15.6 Conclusions	404
References	404
 16. Multiscale Continuum Modeling of Carbon Nanotube–Reinforced Polymers	 411
<i>Konstantinos I. Tserpes, Aggeliki Chanteli</i>	
16.1 Introduction	412
16.2 The Method of Continuum Multiscale Modeling	413
16.3 Models of the RVE and RUC	413
16.4 Parametric Studies	419
16.5 Experiments	424
16.6 Modeling of the MWCNT/PP Tension Specimen	429
16.7 Numerical Results	432
16.8 Conclusions	435
References	436

17. Nonlinear Multiscale Modeling of CNT/Polymer Nanocomposites	439
<i>David Weidt, Łukasz Figiel</i>	
17.1 Introduction	439
17.2 Experimental Part	442
17.3 Nonlinear Multiscale Nanocomposite Model	448
17.4 Results and Discussion	454
17.5 Conclusions	461
References	462
18. Computational Multiscale Modeling of Carbon Nanotube–Reinforced Polymers	465
<i>Mohammad Silani, Timon Rabczuk, Xiaoying Zhuang</i>	
18.1 Introduction	465
18.2 Hierarchical Multiscale Methods for CNRPs	468
18.3 Semiconcurrent Multiscale Methods for CNRPs	469
18.4 Concurrent Multiscale Methods for CNRPs	470
18.5 Challenges and Concluding Remarks	474
References	475
19. Macroscopic Elastic Properties of Nonbonded Wavy Carbon Nanotube Composites	479
<i>Saeed Herasati, Liangchi Zhang, Majid Elyasi</i>	
19.1 Introduction	479
19.2 Multiscale Modeling of CNT Composites	481
19.3 Simplifications on NRVE (Three-Phase Model)	492
19.4 A Case Study on the Effect of Interphase	495
19.5 Conclusions	497
References	497
20. Stochastic Multiscale Modeling of CNT/Polymer	503
<i>Roham Rafiee, Vahid Firouzbakht</i>	
20.1 Introduction	503
20.2 Definition of RVEs for Each Scale	505

20.3	Multiscale Modeling	506
20.4	Integrated Modeling Procedure	514
20.5	Model Validation	517
20.6	Conclusions	518
	References	519
21.	Stochastic Modeling of CNT-Grown Fibers	521
	<i>Roham Rafiee, Amin Ghorbanhosseini</i>	
21.1	Introduction	521
21.2	Modeling Framework	522
21.3	Top-Down Scanning	523
21.4	Bottom-Up Modeling	524
21.5	Stochastic Modeling	533
21.6	Model Validation	535
21.7	Parametric Study	536
21.8	Concluding Remarks	538
	References	539
	Index	541
