Preface.....	xiii
Editor	xv
Contributors	xvii

SECTION I *Fundamentals*

Chapter 1 Overview of Encapsulation and Controlled Release	3
<i>Munmaya K. Mishra</i>	

SECTION II *Processes*

Chapter 2 Process-Selection Criteria	23
<i>James Oxley</i>	
Chapter 3 Microencapsulation by Spray Drying	35
<i>Stephan Drusch and S. Diekmann</i>	
Chapter 4 Spray Drying and Its Application in Food Processing.....	47
<i>Huang Li Xin and Arun S. Mujumdar</i>	
Chapter 5 Encapsulation via Spray Chilling/Cooling/Congeaing	71
<i>Carmen Sílvia Favaro-Trindade, Paula Kiyomi Okuro, and Fernando Eustáquio de Matos Jr.</i>	
Chapter 6 Encapsulation via Spinning Disk Technology	89
<i>Aurélie Demont and Ian W. Marison</i>	
Chapter 7 Encapsulation via Fluidized Bed Coating Technology	111
<i>Charles R. Frey</i>	
Chapter 8 Encapsulation via Pan-Coating	147
<i>Charles R. Frey</i>	
Chapter 9 Microencapsulation by Dripping and Jet Break-Up	177
<i>Aurélie Demont and Ian W. Marison</i>	

Chapter 10	Microencapsulation by Annular Jet Process	201
	<i>Thorsten Brandau</i>	
Chapter 11	Encapsulation via Hot-Melt Extrusion	213
	<i>Hemlata Patil, Roshan V. Tiwari, and Michael A. Repka</i>	
Chapter 12	Microencapsulation with Coacervation.....	235
	<i>Michael Yan</i>	
Chapter 13	Encapsulation via Microemulsion.....	247
	<i>Sushama Talegaonkar, Lalit Mohan Negi, and Harshita Sharma</i>	
Chapter 14	Iontropic Gelation and Polyelectrolyte Complexation Technique: Novel Approach to Drug Encapsulation	273
	<i>J.S. Patil, S.C. Marapur, P.B. Gurav, and A.V. Banagar</i>	
Chapter 15	Microencapsulation via Interfacial Polymerization	297
	<i>Biao Duan</i>	
Chapter 16	Microencapsulation via <i>In Situ</i> Polymerization	307
	<i>Biao Duan</i>	
Chapter 17	Microencapsulation with Miniemulsion Technology.....	315
	<i>Michael Yan</i>	
Chapter 18	Silica-Based Sol-Gel Microencapsulation and Applications	329
	<i>Rosaria Ciriminna and Mario Pagliaro</i>	
Chapter 19	Microencapsulation by Phase Inversion Precipitation	347
	<i>Ricard Garcia-Valls and Cinta Panisello</i>	
Chapter 20	Microfluidic Encapsulation Process	359
	<i>Fabrizio Sarghini</i>	
Chapter 21	Encapsulation Process in Granulation Technology	385
	<i>Himanshu K. Solanki</i>	
Chapter 22	Encapsulation via Electrohydrodynamic Atomization Spray Technology (Electrospray)	411
	<i>Milad Jafari-Nodoushan, Hamid Mobedi, and Jalal Barzin</i>	

Chapter 23	Encapsulation Process: Pulsed Combustion Spray Drying.....	439
	<i>Chilwin Tanamal and James A. Rehkopf</i>	
Chapter 24	Supercritical Fluid Technology for Encapsulation.....	447
	<i>Ángel Martín, Marta Fraile, Soraya Rodríguez-Rojo, and María José Cocero</i>	
Chapter 25	Melt-Dispersion Technique for Encapsulation	469
	<i>Verica Djordjević, Steva Lević, Thomas Koupantsis, Fani Mantzouridou, Adamantini Paraskevopoulou, Viktor Nedović, and Branko Bugarski</i>	

SECTION III *Ingredients*

Chapter 26	Materials of Natural Origin for Encapsulation	493
	<i>Munmaya K. Mishra</i>	
Chapter 27	Cellulose Ethers: Applications	517
	<i>Robert Schmitt, True Rogers, William Porter III, Oliver Petermann, and Britta Huebner-Keese</i>	
Chapter 28	Cellulose-Based Biopolymers: Formulation and Delivery Applications	535
	<i>J.D.N. Ogbonna, F.C. Kenechukwu, S.A. Chime, and A.A. Attama</i>	
Chapter 29	Starch-Based Polymeric Biomaterial: Drug Delivery	575
	<i>Akhilesh Vikram Singh and Ashok M. Raichur</i>	
Chapter 30	Biodegradable Polymers: Drug Delivery Applications	583
	<i>Satish Shilpi and Sanjay K. Jain</i>	

SECTION IV *Characterization*

Chapter 31	Encapsulation Field Polymers: Fourier Transform Infrared Spectroscopy (FTIR)	617
	<i>Oana Lelia Pop, Dan Cristian Vodnar, and Carmen Socaciu</i>	

SECTION V *Applications*

Chapter 32	Encapsulation Technologies for Modifying Food Performance	643
	<i>Maria Inês Ré, Maria Helena Andrade Santana, and Marcos Akira d'Ávila</i>	

Chapter 33	Microencapsulation: Probiotics.....	685
	<i>Dan Cristian Vodnar, Oana Lelia Pop, and Carmen Socaci</i>	
Chapter 34	Organogels as Food Delivery Systems.....	697
	<i>Tarun Garg, Goutam Rath, and Amit K. Goyal</i>	
Chapter 35	β -Lactoglobulin: Bioactive Nutrients Delivery	729
	<i>Li Liang and Muriel Subirade</i>	
Chapter 36	Encapsulation of Polyphenolics.....	741
	<i>Florence Edwards-Lévy and Aude Munin-César</i>	
Chapter 37	Encapsulation of Bioactive Compounds.....	765
	<i>Francesco Donsì, Mariarenata Sessa, and Giovanna Ferrari</i>	
Chapter 38	Encapsulation of Flavors, Nutraceuticals, and Antibacterials	801
	<i>Stéphane Desobry and Frédéric Debeaufort</i>	
Chapter 39	Encapsulation of Aroma.....	833
	<i>Christelle Turchiuli and Elisabeth Dumoulin</i>	
Chapter 40	Molecular (Cyclodextrin) Encapsulation of Volatiles and Essential Oils	867
	<i>Paulo José Salústio, Maria Graça Miguel, and Helena Cabral-Marques</i>	
Chapter 41	Microencapsulation: Artificial Cells	907
	<i>Thomas Ming Swi Chang</i>	
Chapter 42	Cell Encapsulation.....	917
	<i>James Blanchette</i>	
Chapter 43	Cell Immobilization Technologies for Applications in Alcoholic Beverages.....	933
	<i>Argyro Bekatorou, Stavros Plessas, and Athanasios Mallouchos</i>	
Chapter 44	Enzyme Immobilization in Biodegradable Polymers for Biomedical Applications	957
	<i>S.A. Costa, Helena S. Azevedo, and Rui L. Reis</i>	
Chapter 45	Emulsion-Solvent Removal System for Drug Delivery.....	981
	<i>Wasfy M. Obeidat</i>	
Chapter 46	Organogels in Controlled Drug Delivery	1035
	<i>V.K. Singh, B. Behera, Sai S. Sagiri, Kunal Pal, Arfat Anis, and Mrinal K. Bhattacharya</i>	

Chapter 47	Microparticulate Drug Delivery Systems	1067
	<i>Hemant Kumar Singh Yadav, M. Navya, Abhay Raizaday, V. Naga Sravan Kumar Varma, and H.G. Shivakumar</i>	
Chapter 48	Colloid Drug Delivery Systems.....	1111
	<i>Monzer Fanun</i>	
Chapter 49	Melt Extrusion: Pharmaceutical Applications	1127
	<i>James DiNunzio, Seth Forster, and Chad Brown</i>	
Chapter 50	Nanoparticles: Biomaterials for Drug Delivery	1151
	<i>Abhijit Gokhale, Thomas Williams, and Jason M. Vaughn</i>	
Chapter 51	Polymer Systems for Ophthalmic Drug Delivery	1167
	<i>Sepideh Khoei and Frazaneh Hashemi Nasr</i>	
Chapter 52	Drug Delivery Systems: Oral Mucosal	1225
	<i>Javier Octavio Morales</i>	
Chapter 53	Polymeric Biomaterials for Controlled Drug Delivery	1255
	<i>Sutapa Mondal Roy and Suban K. Sahoo</i>	
Chapter 54	Nanogels: Chemical Approaches to Preparation.....	1271
	<i>Sepideh Khoei and Hamed Asadi</i>	
Chapter 55	Electrospinning Technology: Polymeric Nanofiber Drug Delivery	1311
	<i>Narendra Pal Singh Chauhan, Kiran Meghwal, Priya Juneja, and Pinki B. Punjabi</i>	
Chapter 56	Polyelectrolyte Complexes: Drug Delivery Technology	1333
	<i>Lankalapalli Srinivas</i>	
Chapter 57	Polymeric Nano/Microparticles for Oral Delivery of Proteins and Peptides	1359
	<i>S. Sajeesh and Chandra P. Sharma</i>	
Chapter 58	Vegetable Oil–Based Formulations for Controlled Drug Delivery.....	1381
	<i>V.K. Singh, Sai S. Sagiri, K. Pramanik, Arfat Anis, S.S. Ray, I. Banerjee, and Kunal Pal</i>	
Chapter 59	Introduction to Commercial Microencapsulation	1413
	<i>George A. Stahler</i>	

Chapter 60	Stable Core-Shell Microcapsules for Industrial Applications.....	1423
	<i>Klaus Last</i>	
Chapter 61	Microencapsulation Applications in Food Packaging.....	1439
	<i>Artur Bartkowiak, Agnieszka Bednarczyk-Drag, Wioletta Krawczynska, Agnieszka Krudos, and Katarzyna Sobecka</i>	
Chapter 62	Microencapsulation of Phase Change Materials.....	1455
	<i>Jessica Giro-Paloma, Mònica Martínez, A. Inés Fernández, and Luisa F. Cabeza</i>	
Index		1483
