

CONTENTS

PREFACE, ix

1 GENERAL TECHNIQUES: PREPARATION OF MATERIALS, 1

J. M. Brewer

- 1.1 Cleaning Glass- and Plasticware and Cuvettes, 1
- 1.2 Procedure for Cleaning Dialysis Tubing, 3
- 1.3 Preparation of Chromatographic Materials, 4
- 1.4 Preparation of Reagents, 6
- 1.5 Pipettes and Pipetting, 8
- References, 9

2

**TREATMENT OF GAUSSIAN
MEASUREMENT DATA, 10***R. Ballentine*

- 2.1 Introduction, 10
- 2.2 Some Definitions, 11
- 2.3 Confidence and Fiducial Limits, 16
- 2.4 Errors and the Rejection of Data, 19
- 2.5 Compounding Standard Deviations, 22
- 2.6 Comparison Between Groups;
Tests of Significance, 24
- 2.7 Summary, 29
- References, 31

3

CHROMATOGRAPHY, 32*A. J. Pesce, R. Gaver, and R. B. Ashworth*

- 3.1 Introduction, 32
- 3.2 Chromatographic Methods Based Primarily
on Partition, 33
- 3.3 Adsorption Chromatographic Methods, 68
- 3.4 Practical Aspects of Column Chromatography, 84
- 3.5 Analysis of Data, 93
- 3.6 Summary, 94
- References, 94

4

IMMUNOCHEMISTRY, 97*C. Schreiner and A. J. Pesce*

- 4.1 Introduction: The "Immune Response", 97
- 4.2 Origin of the Immune Response, 99
- 4.3 Preparation of Antibody, 102
- 4.4 Measurement of Antibody Activity:
Experimental Procedures, 107
- 4.5 Summary, 126
- References, 127

5 ELECTROPHORESIS, 128*J. M. Brewer*

- 5.1 Introduction, 128
- 5.2 Theory of Electrophoresis, 129
- 5.3 Instrumentation, 145
- 5.4 Experimental Procedures, 146
- 5.5 Practical Aspects, 153
- 5.6 Analysis of Results, 156
- 5.7 Limitations of Methods, 159
- References, 159

6 ULTRACENTRIFUGATION, 161*J. M. Brewer, A. J. Pesce, and T. E. Spencer*

- 6.1 Introduction, 161
- 6.2 Theory of Ultracentrifugation, 162
- 6.3 Instrumentation, 175
- 6.4 Practical Applications, 186
- 6.5 Practical Aspects, 208
- 6.6 Analysis and Interpretation of Results, 211
- 6.7 Summary of Advantages and Disadvantages of Methods, 213
- References, 214

7 ABSORPTION AND FLUORESCENCE, 216*J. M. Brewer, A. J. Pesce, and S. R. Anderson*

- 7.1 Introduction, 216
- 7.2 Theory, 217
- 7.3 Instrumentation, 237
- 7.4 Experimental Methods, 242
- 7.5 Practical Aspects, 258
- 7.6 Summary, 261
- References, 261

8 RADIOACTIVITY AND COUNTING, 263*A. J. Pesce*

- 8.1 Introduction, 263
- 8.2 Origin and Nature of Radioactivity, 264
- 8.3 Instrumentation, 281
- 8.4 Experimental Procedures, 289
- 8.5 Practical Aspects, 301
- 8.6 Treatment of Data: Counting Statistics, 305
- 8.7 Summary, 310
- References, 310

APPENDICES, 313

- 1. Properties of Plastics, 316
- 2. Capacities of Dialysis Tubing, 322
- 3. Concentration of Common Acids and Bases, 322
- 4. pK Values of Some Important Compounds in Biochemistry, 323
- 5. Tables for Adjustment of Concentration of Ammonium Sulfate Solutions, 325
- 6. Methods of Determination of Protein Concentration, 328
- 7. Procedure for Phosphate Determination, 330
- 8. Statistical Tables, 331
- 9. Paper Chromatography of Amino Acids, Nucleotides, Carbohydrates and Lipids, 334
- 10. R_f 's of DNP- and Dansyl Amino Acids in Various Solvents, 341
- 11. Chromatographic Methods, 343
- 12. Solutions for Electrophoresis Experiments, 351
- 13. Physical Properties of Various Proteins, 355
- 14. Densities and Viscosities of Solutions, 356
- 15. Computer Programs for Calculation of Schlieren Areas and for Fitting Lines by the Least Squares Method, 359
- 16. Extinction Coefficients of Some Biochemically Important Compounds, 364
- 17. Concentration and Biological Half-Life of Ingested Radioisotopes, 366

INDEX, 367
