
Contents

Preface	ix
List of Contributors	xiii
1 Homogenization of the Integro-Differential Burgers Equation	
<i>A. Amosov, G. Panasenko</i>	1
2 Geometric Versus Spectral Convergence for the Neumann Laplacian under Exterior Perturbations of the Domain	
<i>J.M. Arrieta, D. Krejčířík</i>	9
3 Dyadic Elastic Scattering by Point Sources: Direct and Inverse Problems	
<i>C.E. Athanasiadis, V. Sevrouglou, and I.G. Stratis</i>	21
4 Two-Operator Boundary–Domain Integral Equations for a Variable-Coefficient BVP	
<i>T.G. Ayele, S.E. Mikhailov</i>	29
5 Solution of a Class of Nonlinear Matrix Differential Equations with Application to General Relativity	
<i>M. Azreg-Aïnou</i>	41
6 The Bottom of the Spectrum in a Double-Contrast Periodic Model	
<i>N.O. Babych</i>	53
7 Fredholm Characterization of Wiener–Hopf–Hankel Integral Operators with Piecewise Almost Periodic Symbols	
<i>G. Bogveradze, L.P. Castro</i>	65

8 Fractal Relaxed Problems in Elasticity	
<i>A. Brillard, M. El Jarroudi</i>	75
9 Hyers–Ulam and Hyers–Ulam–Rassias Stability of Volterra Integral Equations with Delay	
<i>L.P. Castro, A. Ramos</i>	85
10 Fredholm Index Formula for a Class of Matrix Wiener–Hopf Plus and Minus Hankel Operators with Symmetry	
<i>L.P. Castro, A.S. Silva</i>	95
11 Invertibility of Singular Integral Operators with Flip Through Explicit Operator Relations	
<i>L.P. Castro, E.M. Rojas</i>	105
12 Contact Problems in Bending of Thermoelastic Plates	
<i>I. Chudinovich, C. Constanda</i>	115
13 On Burnett Coefficients in Periodic Media with Two Phases	
<i>C. Conca, J. San Martín, L. Smaranda, and M. Vanninathan</i>	123
14 On Regular and Singular Perturbations of the Eigenelements of the Laplacian	
<i>R.R. Gadyl'shin</i>	135
15 High-Frequency Vibrations of Systems with Concentrated Masses Along Planes	
<i>D. Gómez, M. Lobo, M.E. Pérez</i>	149
16 On J. Ball's Fundamental Existence Theory and Regularity of Weak Equilibria in Nonlinear Radial Hyperelasticity	
<i>S.M. Haidar</i>	161
17 The Conformal Mapping Method for the Helmholtz Equation	
<i>N. Khatiashvili</i>	173
18 Integral Equation Method in a Problem on Acoustic Scattering by a Thin Cylindrical Screen with Dirichlet and Impedance Boundary Conditions on Opposite Sides of the Screen	
<i>V. Kolybasova, P. Krutitskii</i>	179

19 Existence of a Classical Solution and Nonexistence of a Weak Solution to the Dirichlet Problem for the Laplace Equation in a Plane Domain with Cracks <i>P.A. Krutitskii, N.Ch. Krutitskaya</i>	183
20 On Different Quasimodes for the Homogenization of Steklov-Type Eigenvalue Problems <i>M. Lobo, M.E. Pérez</i>	193
21 Asymptotic Analysis of Spectral Problems in Thick Multi-Level Junctions <i>T.A. Mel'nyk</i>	205
22 Integral Approach to Sensitive Singular Perturbations <i>N. Meunier, É. Sanchez-Palencia</i>	217
23 Regularity of the Green Potential for the Laplacian with Robin Boundary Condition <i>D. Mitrea, I. Mitrea</i>	235
24 On the Dirichlet and Regularity Problems for the Bi-Laplacian in Lipschitz Domains <i>I. Mitrea, M. Mitrea</i>	245
25 Propagation of Waves in Networks of Thin Fibers <i>S. Molchanov, B. Vainberg</i>	255
26 Homogenization of a Convection-Diffusion Equation in a Thin Rod Structure <i>G. Panasenko, I. Pankratova, and A. Piatnitski</i>	279
27 Existence of Extremal Solutions of Singular Functional Cauchy and Cauchy-Nicoletti Problems <i>S. Seikkala, S. Heikkilä</i>	291
28 Asymptotic Behavior of the Solution of an Elliptic Pseudo-Differential Equation Near a Cone <i>V.B. Vasilyev</i>	301
29 Averaging Normal Forms for Partial Differential Equations with Applications to Perturbed Wave Equations <i>F. Verhulst</i>	307
30 Internal Boundary Variations and Discontinuous Transversality Conditions in Mechanics <i>K. Yunt</i>	323

**31 Regularization of Divergent Integrals in Boundary Integral
Equations for Elastostatics**

V. V. Zozulya 333

Index 347
