Preface	xv
Contributors	xvii
1 Use of Elastodynamic Reciprocity Theorems for Field Calculations	
<i>Jan D. Achenbach</i>	1
1.1 Introduction	1
1.2 Use of a Virtual Wave in Reciprocity Arguments	2
1.3 Reciprocity Theorem	5
1.4 Horizontally Polarized Transverse Waves	5
1.5 Reciprocity Considerations	7
1.6 Forced Motion of an Elastic Layer	8
1.7 Interaction of an Incident Wave with a Defect in a Layer	10
1.8 Reflection and Transmission by a Planar Array of Cavities	13
References	14
2 Linear Solvers for the Galerkin Boundary Element Method	
<i>Ore Ademoyero, Michael Bartholomew-Biggs, and Alan Davis</i>	15
2.1 Introduction	15
2.2 Linear Solvers for the Galerkin Method	17
2.3 Implementation on a Parallel Computer	18
2.4 Conclusions	19
References	20
3 Reciprocity of Hopf's and Feautrier's Operators in Radiation Transport Theory	
<i>Mario Ahues and Bernard Rutily</i>	21
3.1 Introduction	21
3.2 Hopf's and Feautrier's Operators	22
3.3 Spectral Series	24
3.4 Application in Transport Theory	26
References	26

4	Spectral Approximation of Weakly Singular Integrable Kernels Using Projections	
	<i>Mario Ahues and Olivier Titaud</i>	27
4.1	Introduction	27
4.2	Projection Approximations	28
4.3	Application	31
	References	32
5	Effect of Imperfect Interface on Thermal Inclusion with an Interior Radial Crack	
	<i>William Amenyah</i>	33
5.1	Introduction	33
5.2	Formulation	33
5.3	Results	36
5.4	Conclusions	37
	References	38
6	An Integrodifferential Equation of Atomic Diffusion	
	<i>Yuri A. Antipov</i>	39
6.1	Introduction	39
6.2	Solution of the Integrodifferential Equation	40
6.3	Asymptotic Expansion of the Solution	43
6.4	Conclusion	44
	References	44
7	Nonradiating Dislocations in Uniform Supersonic Motion in Anisotropic Linear Elastic Solids	
	<i>David M. Barnett and Jonathan A. Zimmerman</i>	45
7.1	Introduction	45
7.2	Subsonic Dislocation Solutions	46
7.3	Supersonic Dislocation Solutions	46
7.4	Nonradiating Dislocations	47
7.5	General Expression of the Radiated Energy of a Dislocation	48
	References	49
8	On the Use of the Conjugate Gradient Method for the Numerical Solution of First-Kind Integral Equations in Two Variables	
	<i>Barbara Bertram and Haiyan Cheng</i>	51
8.1	Introduction	51
8.2	The Methods	51
8.3	The Kernels and Objects	52
8.4	Stopping Criteria	52
8.5	Comparison of One-Pass and Two-Pass Methods	52
8.6	Conclusions	54
	References	56

9	On the Stopping Criteria for Conjugate Gradient Solutions of First-Kind Integral Equations in Two Variables	
	<i>Haiyan Cheng and Barbara Bertram</i>	57
9.1	Introduction	57
9.2	Setting Tolerances for Two Residuals	59
9.3	Heuristic Stopping Rule	60
9.4	Graphical Examples	61
9.5	Conclusions	62
	References	62
10	An Initial-Boundary Value Problem for Thermoelastic Plates	
	<i>Christian Constanda and Keijo Ruotsalainen</i>	63
10.1	The Initial-Boundary Value Problem	63
10.2	Function Spaces	64
10.3	The Thermoelastic Plate Potentials	65
10.4	Weak and Integral Formulations of the Problem	66
10.5	Galerkin Approximation	67
	References	68
11	A Global Existence Result for Functional Differential Equations with Causal Operators	
	<i>Constantin Corduneanu and Yizeng Li</i>	69
11.1	Introduction	69
11.2	Statement of the Problem	70
11.3	The Existence Result	71
11.4	Further Remarks and Comments	73
	References	73
12	Direct Stiffness-Modification Route to Linear Consistency Between Incompatible Finite Element Meshes	
	<i>Brian Driessen</i>	75
12.1	Introduction	75
12.2	Problem Statement	75
12.3	Method	76
12.4	Discussion of Computational Cost	78
12.5	Numerical Examples	79
	References	79
13	Nonlinear Dynamic Analysis of a Curved Beam Structure Using a Finite Element Method	
	<i>Reza Fotouhi</i>	81
13.1	Introduction	81
13.2	Numerical Procedure	82
13.3	Concluding Remarks	86
	References	86

14	Seminal Ideas in Integral Methods	
	<i>Graham M.L. Gladwell</i>	87
14.1	Introduction	87
14.2	Fourier (?) Transforms	88
14.3	Complex Integrals	90
14.4	Return to Transforms	93
14.5	A Case Study	95
14.6	Conclusions	97
	References	97
15	Mixed Boundary Value Problem with Two Displacement Boundaries for Thin Plate Bending	
	<i>Norio Hasebe and Masahiro Miwa</i>	99
15.1	Introduction	99
15.2	Mapping Function and Complex Stress Functions	99
	References	104
16	Use of Cross-Referencing for Solving the Parameter Choice Problem in Generalized CLS	
	<i>John W. Hilgers, Barbara S. Bertram, and William R. Reynolds</i>	105
16.1	Introduction	105
16.2	CREF	106
16.3	Generalized CLS	107
16.4	Combining CREF and GCLS	107
16.5	Example 1	108
16.6	Example 2	109
16.7	Discussion	109
16.8	Summary	110
	References	110
17	Numerical Technique for Solving an Ordinary Differential Equation by Picard's Method	
	<i>Hiroshi Hirayama</i>	111
17.1	Introduction	111
17.2	Taylor Series	111
17.3	Taylor Series for the Solution of the ODE	113
17.4	Padé Series	114
17.5	Numerical Examples	115
17.6	Conclusion	116
	References	116
18	On a Class of Boundary Conditions Splitting Coupled Thermoelasticity Problems	
	<i>Jiri V. Horák</i>	117
18.1	Introduction	117
18.2	Model Problem	117
18.3	Solvability of the Problem	119
18.4	Generalization and Conclusion	122
	References	122

19 Recent Mathematical Developments for Functionally Graded Linearly Elastic Materials	
<i>Cornelius O. Horgan</i>	123
19.1 Introduction	123
19.2 The Torsion Problem	124
19.3 The Pressurized Hollow Cylinder or Disk	127
References	129
20 Ground Vibration Dynamics During Pile Hammering	
<i>Erno Keskinen, Sirpa Launis, Michel Cotsaftis, and Yrjo Raunisto</i>	131
20.1 Introduction	131
20.2 System Model	131
20.3 Longitudinal Oscillations Analysis	133
20.4 Asymptotic, Constant and Linear Time Dependence	135
20.5 Conclusion	136
References	136
21 Connection Between Liquid Crystal Theory and Plate Theory	
<i>Julie Kidd, Christian Constanda, John A. Mackenzie, and Iain W. Stewart</i>	137
21.1 Layer Deformations in Liquid Crystals	137
21.2 Approximation by Means of a System	137
21.3 Numerical Approximation	138
21.4 Approximation by Means of Layer Potentials	140
21.5 Outline of the Approximation Method	141
References	142
22 Product Integration Quadratures for the Radiative Transfer Problem with Hopf's Kernel	
<i>Alain Largillier and Olivier Titautd</i>	143
22.1 Introduction	143
22.2 Product Integration Approximations	144
22.3 Numerical Examples	148
References	148
23 A Numerical Scheme for Determining Diffraction Coefficients in Anisotropic Materials	
<i>Patricia A. Lewis</i>	149
23.1 Introduction	149
23.2 Formulation of the Problem	150
23.3 The Wiener-Hopf Equations	151
23.4 The Diffraction Coefficients	153
23.5 Summary	154
References	154

24	Effect of Imperfect Inclusion/Matrix Interaction Between a Circular Inclusion and a Radial Matrix Crack	
	<i>Yu Liu</i>	155
24.1	Introduction	155
24.2	Problem Formulation	155
24.3	Numerical Results and Discussion	158
	References	160
25	Neutral Equations with Causal Operators	
	<i>Mehran Mahdavi</i>	161
25.1	Introduction	161
25.2	Statement of the Local Existence Result	161
25.3	Proof of Theorem 1	163
25.4	A Result of Global Existence	164
	References	165
26	Computation of Free-Surface Flows Under the Influence of Pressure Distribution	
	<i>Montri Maleewong and Jack Asavanant</i>	167
26.1	Introduction	167
26.2	Formulation of the Problem	167
26.3	Numerical Procedure	168
26.4	Discussion of the Results	169
	References	172
27	Solution of Eigenvalue Problems for Rectangular Plates by Differential Transformation	
	<i>Moinuddin Malik and Charles W. Bert</i>	173
27.1	Introduction	173
27.2	The Differential Transformation	173
27.3	Eigenvalue Problem for Thin Plates Based on the Classical Lamination Theory	174
27.4	Differential Transformation Analysis	175
27.5	Characteristic Equations	176
27.6	Sample Results	177
27.7	Concluding Remarks	178
	References	178
28	Free Vibrations of Structural Hyperbolic Paraboloid Networks	
	<i>Andrew Mioduchowski and Meiping Wang</i>	179
28.1	Introduction	179
28.2	Governing Equations	179
28.3	Numerical Calculations	180
	References	184
29	Sharp Invertibility Results for Layer Potentials in 2D	
	<i>Dorina Mitrea</i>	185
	References	190

30 An Enhanced Theory of Bending of Plates	
<i>Radu Mitric and Christian Constanda</i>	191
30.1 Notation and Prerequisites	191
30.2 Dirichlet and Neumann Boundary Value Problems	192
30.3 The Betti and Somigliana Formulas	193
30.4 The Single-Layer and Double-Layer Potentials	194
30.5 The Classical Indirect Method	196
References	196
31 Comparison of Zonal, Spectral Solutions for Compressible Boundary Layer and Navier–Stokes Equations	
<i>Adriana Nastase</i>	197
31.1 Spectral Solutions for the NSL	197
31.2 The Coupling NSL/Inviscid Flow	200
References	202
32 Hybrid Laplace and Poisson Solvers I: Dirichlet Boundary Conditions	
<i>Fred R. Payne</i>	203
32.1 Introduction	203
32.2 DFI Multiple Algorithms for Higher-Order DEs	205
32.3 Dirichlet Results	206
32.4 DFI Hierarchy for DE Systems	207
32.5 Conclusions	208
References	208
33 Estimation of Boundary Conditions from Different Experimental Data Using the LTS_N Method and Tikhonov Regularization	
<i>Mario R. Retamoso, Haroldo F. de Campos Velho, and Marco T. Vilhena</i>	209
33.1 Introduction	209
33.2 Solving the Radiative Transfer Equation	209
33.3 Formulation of the Inverse Problem	210
33.4 Numerical Results	212
33.5 Final Comments	213
References	213
34 Analytical-Numerical Treatment of the One-Phase Stefan Problem with Constant Applied Heat Flux	
<i>Otto G. Ruehr</i>	215
34.1 Introduction	215
34.2 The One-Phase Stefan Problem	215
34.3 Special Solution of Integral Equation for Prescribed Flux $g(t)$	217
34.4 Series Solution of Ordinary Differential Equation for $g(t)$	218

34.5	First Parametric Numerical Solution	219
34.6	Second Parametric Numerical Solution	219
34.7	Conclusions	220
	References	220
35	Integral Equations Arising in Boundary Value Problems at Resonance	
	<i>Seppo Seikkala and Dmitri Vorobiev</i>	221
35.1	Introduction	221
35.2	The Integral Equations in the Scalar Case	222
35.3	A Resonance Problem for a Second-Order Vector Differential Equation	225
	References	226
36	Thermal Stress Analysis of an Elliptic Inclusion with Imperfect Interface Embedded in an Infinite Elastic Medium	
	<i>Hongnian Shen, Peter Schiavone, Chong Q. Ru, and Andrew Mioduchowski</i>	227
36.1	Problem Formulation	227
36.2	Numerical Calculations and Discussion	228
36.3	Conclusions	231
	References	231
37	Three-Dimensional Elasticity Solutions for Anisotropic and Inhomogeneous Plates and Shells	
	<i>Anthony J.M. Spencer</i>	233
37.1	Introduction	233
37.2	Plane Strain of a Flat Plate	233
37.3	Three-Dimensional Elasticity for a Flat Plate	238
37.4	Cylindrical Shells and Channel Sections	241
37.5	Numerical Solution	243
	References	243
38	A Circular Inclusion with Homogeneous Interface	
	<i>Les J. Sudak</i>	245
38.1	Introduction	245
38.2	Preliminaries	245
38.3	Two Types of Inhomogeneous Imperfect Interface	247
38.4	Conclusions	250
	References	250
39	Multiwavelets for Geometrically Complicated Domains and Their Application to Boundary Element Methods	
	<i>Johannes Tausch</i>	251
39.1	Introduction	251
39.2	Multilevel Basis	252
39.3	Recursive Algorithm for Matrix Coefficients	255
39.4	Numerical Experiments	255

39.5 Conclusion	256
References	256
40 Mathematical Investigation of Contact Problems with Friction in Fracture Dynamics	
<i>Vladimir V. Zozulya</i>	257
40.1 Introduction	257
40.2 Statement of the Problem	258
40.3 Existence Theorems in Fracture Dynamic Contact Problems	259
40.4 Conclusions	261
References	262
