

Contents

<i>Foreword by Professor John G. Torrey</i>	<i>page</i> ix
<i>Preface</i>	xi
1 Introduction	1
2 Genetics versus epigenetics	9
3 Origins of variability in cultured plant cells	24
4 Variants and mutants	41
5 Protoplast fusion	96
6 Organelle uptake	125
7 Introduction of purified DNA	132
8 Applications to plant breeding	148
<i>Bibliography</i>	157
<i>Index</i>	177
