

TABLE OF CONTENTS

	PREFACE	vii		
1	FIXATION	1		
	Objectives			
	Definition			
	Functions of Fixatives			
	Actions of Fixatives			
	Factors Influencing Fixation			
	Reactions of the Cell With Fixatives			
	Simple Aqueous Fixatives or Fixative Ingredients			
	Other Fixative Ingredients			
	Compound or Combined Fixatives			
	Nonaqueous Fixatives			
	Transport Solutions			
	Removal of Fixation Pigments			
	Learning Activities			
	References			
2	PROCESSING	25		
	Objectives			
	Dehydration			
	Clearing			
	Infiltration (Embedding) Media			
	Embedding and Specimen Orientation			
	Special Techniques in Processing			
	Learning Activities			
	References			
3	INSTRUMENTATION	43		
	Objectives			
	Microscopes			
	Microtomes			
	Cryostat			
	Tissue Processors			
	Miscellaneous Equipment			
	Instrument Quality Control			
	Learning Activities			
	References			
4	SAFETY	67		
	Objectives			
	Biological or Infectious Hazards			
	Mechanical Hazards			
	Chemical Hazards			
	Hazard Identification			
	General Safety Practices			
	References			
5	LABORATORY MATHEMATICS AND SOLUTION PREPARATION	75		
	Objectives			
	Percent Solutions			
	Use of the Gravimetric Factor in Solution Preparation			
	Hydrates			
	Normal and Molar Solutions			
	The Metric System			
	Buffers			
	General Guidelines for Solution Preparation, Use, and Storage			
	Stability of Solutions			
	References			
6	NUCLEAR AND CYTOPLASMIC STAINING	83		
	Objectives			
	Ultrastructure of the Cell			
	Staining Mechanisms			
	The Dyes			
	H&E Staining			
	Nucleic Acids			
	Polychromatic Stains			
	Mounted Stained Sections			
	Learning Activities			
	References			
7	CARBOHYDRATES AND AMYLOID	111		
	Objectives			
	Carbohydrates			
	Special Staining Techniques			
	Amyloid			
	Learning Activities			
	References			
8	CONNECTIVE AND MUSCLE TISSUE	131		
	Objectives			
	Connective Tissue			

	Basement Membrane		
	Muscle		
	Special Staining Techniques		
	Silver Techniques for Reticular Fibers		
	Techniques for Lipid		
	Techniques for Connective Tissue Cells		
	Learning Activities		
	References		
9	NERVE 157		
	Objectives		
	The Nervous System		
	Neurons		
	Neuroglia		
	Myelin		
	Special Staining Techniques		
	References		
	Learning Activities		
10	MICROORGANISMS 179		
	Objectives		
	Bacteria		
	Fungi		
	Viruses		
	Protozoans		
	Special Staining Techniques		
	Learning Activities		
	References		
11	PIGMENTS, MINERALS, AND CYTOPLASMIC GRANULES 205		
	Objectives		
	Pigments		
	Endogenous Deposits		
	Minerals		
	Cytoplasmic Granules		
	Special Staining Techniques		
	Learning Activities		
	References		
12	IMMUNOHISTOCHEMISTRY 227		
	Objectives		
	General Immunology		
	Immunohistochemical Staining Methods		
	Methods of Visualization		
	Technical Considerations		
	Special Staining Techniques		
	References		
13	ENZYME HISTOCHEMISTRY 249		
	Objectives		
	Muscle Histology		
	Pathological Changes in Muscle		
	Enzyme Histochemistry		
	Oxidation and Reduction		
	Properties of Enzymes		
	Preservation of Enzymes		
	Classification of Enzymes		
	Freezing Muscle Biopsy Specimens		
	References		
14	ELECTRON MICROSCOPY 271		
	Objectives		
	Fixation		
	Processing		
	Sectioning		
	Staining		
	Special Techniques		
	Processing Tissues Previously Embedded in Paraffin		
	Processing Tissue From an H&E-Stained Paraffin Section		
	References		
	Glossary 287		
	Index 293
