Contents

Preface viii

1. **Polymeric Materials for Gas Separations** 1
   B. D. Freeman and I. Pinnau

2. **Synthesis and Gas Permeability of Poly(diphenylacetylenes) with Substituents** 28
   Toshio Masuda, Masahiro Teraguchi, and Ryoji Nomura

3. **Sorption and Diffusion of *n*-Alkanes and Alcohols in Poly(1-trimethylsilyl-1-propyne)** 38
   F. Doghieri, M. Giacinti, L. Nicolini, and G. C. Sarti

4. **Mixed-Gas Permeation Properties and Physical Aging of Poly(4-methyl-2-pentyne)** 56
   A. Morisato, Z. He, and I. Pinnau

5. **Aging of Gas Permeability in Poly[1-(trimethylsilyl)-1-propyne] (PTMSP) and PTMSP–Poly(*tert*-butylacetylene) Blends** 68
   T. Nakagawa, T. Watanabe, M. Mori, and K. Nagai

6. **Physical Aging Phenomena in Poly(*tert*-butylacetylene) Solvent Cast Films: Influence of Operating Conditions** 85
   G. Costa, C. Iurilli, B. Cavazza, and A. Turturro

7. **Effects of Physical Aging on Gas Permeability and Molecular Motion in Poly(1-trimethylsilyl-1-propyne)** 95
   Kazukiyo Nagai, B. D. Freeman, Tetsuya Watanabe, and Tsutomu Nakagawa

8. **Free Volume in Polymeric Membrane Materials as Determined by Positron Annihilation Lifetime Spectroscopy** 102
   Yuri P. Yampolskii and Victor P. Shantarovich

9. **Facilitated Transport Membranes: Separation of Ethene from Ethane with Silver Ion-Exchanged Nafion®** Hollow Fibers 115
   Odd Ivar Eriksen, Ivar M. Dahl, Ingrid B. Vik, and Mark L. Posey

10. **Poly(vinyl alcohol)–Silver Nitrate Facilitated Transport Membranes for the Separation of Aromatic and Aliphatic Compounds** 127
Carl A. Koval, Debra L. Bryant, Sarah L. Roberts, and Richard D. Noble

11. **Effect of Atmospheric Glow Discharge Plasma Treatment on CO_2 Permeability and Chemical Structure of Poly(dimethylsiloxane) Membranes** 135
Taisuke Maki, Masaaki Teramoto, Motomu Masuda, Tomohiro Morimoto, Qingfa Hwang, and Tomio Sakka

12. **Group Contribution Modeling of Gas Transport in Polymeric Membranes** 151
D. V. Laciak, L. M. Robeson, and C. D. Smith

13. **Solubility of Gaseous Mixtures in Glassy Polymers: NELF Predictions** 179
Ferruccio Doghieri, Michele Canova, and Giulio C. Sarti

14. **Relation between Gas Permeabilities and Structure of Polyimides** 194
Yusei Hirayama, Toshimune Yoshinaga, Shunsuke Nakanishi, and Yoshihiro Kusuki

15. **Regiospecific Polyamide–Imides for Gas Separations** 215
Michael Langsam

16. **Permselectivities of Poly(amide imide)s and Similar Poly(ester imide)s as Dense Films and Thin-Film Composite Membranes** 233
Detlev Fritsch

17. **Crosslinked Diacetylene-Functionalized Polyimides for Gas Separation Membranes: Polymer Reactivity and Resultant Properties** 244
Birgit Bayer, Birgit Schöberl, Karthik Nagapudi, Mary E. Rezac, and Haskell W. Beckham

18. **Indan-Containing Polymers for Gas Separation Membranes** 256
Gerhard Maier, Martin Wolf, Miroslav Bleha, and Zbynek Pientka

19. **Gas Separation Properties of Modified Poly(ether ketone[sulfone]) with Phthalic Side Group: Role of Pendent Groups and Physical Cross-Linking on Gas Permeation Properties of Polymers** 269
Jiping Xu, Zhonggang Wang, and Tianlu Chen

20. Fundamental and Practical Aspects of Mixed Matrix Gas Separation Membranes 277
Rajiv Mahajan, Catherine M. Zimmerman, and William J. Koros

21. CO_2 Sorption Properties of Annealed Syndiotactic Polystyrene 287
K. Tsutsui, Y. Tsujita, H. Yoshimizu, and T. Kinoshita

22. Measurement of Oxygen Permeation in Mixed Gas Systems: An Alternative to Gas Chromatography 300
N. S. M. Stevens and M. E. Rezac
